

Independent Limited Assurance Report to the Directors of SSE plc ('SSE') on the reported performance of selected sustainability metrics

Our limited assurance conclusion

Based on the procedures we have performed, as described under the 'Summary of work performed' and the evidence we have obtained, nothing has come to our attention that causes us to believe that the information marked with the symbol (A) in the "Protecting and restoring the natural environment" and "SSE's carbon performance disclosures" sections of SSE's Annual Report for the year ended 31 March 2024 (the 'Report') and summarised below (together, the 'Subject Matter Information'), has not been prepared, in all material respects, in accordance with SSE's GHG and Environmental Reporting Criteria 2024 (the 'Reporting Criteria') available at <https://www.sse.com/sustainability/>.

What we were engaged to assure

The Subject Matter Information needs to be read and understood together with the Reporting Criteria which SSE's Directors are solely responsible for selecting and applying. The Subject Matter Information and the Reporting Criteria are as set out in the table below:

Sustainability metrics	Materiality Reference*	2024 reported performance	Unit	Reporting Criteria
Scope 1 GHG emissions	(1)	4.34	MtCO _{2e}	SSE's GHG and Environmental Reporting Criteria 2024 Available at https://www.sse.com/sustainability/policies-and-assurances/ ¹
Scope 2 GHG emissions	(1)	0.47	MtCO _{2e}	
Scope 3 GHG emissions - (Categories 3, 4, 6, 9, 11 and 15 only)	(1)	4.46	MtCO _{2e}	
GHG emissions from Gas sold (Scope 3 - Category 11)	(1)	2.01	MtCO _{2e}	
Scope 1 GHG emissions intensity of electricity generated	(2)	205.0	gCO _{2e} /kWh	
Total water abstracted	(1)	23,135	million m ³	
Total water consumed	(1)	2.4	million m ³	
Total water returned	(1)	23,133	million m ³	

*The materiality reference refers to our assessment of materiality discussed in the Materiality section of this report.

The scope of our work did not extend to information in respect of earlier periods or to any other information included in, or linked from, the Report.

Our work

Professional standards applied

We performed a limited assurance engagement in accordance with International Standard on Assurance Engagements 3000 (Revised) 'Assurance Engagements other than Audits or Reviews of Historical Financial Information' and, in respect of the greenhouse gas (GHG) emissions, in accordance with International Standard on Assurance Engagements 3410 'Assurance engagements on Greenhouse Gas Statements', issued by the International Auditing and Assurance Standards Board.

Our independence and quality control

We have complied with the Institute of Chartered Accountants in England and Wales Code of Ethics, which includes independence and other requirements founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour, that are at least as demanding as the applicable provisions of the International Ethics Standards Board for Accountants International Code of Ethics for Professional Accountants (including International Independence Standards).

We apply International Standard on Quality Management (UK) 1 and accordingly maintain a comprehensive system of quality management including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Summary of work performed

We performed a limited assurance engagement. Because the level of assurance obtained in a limited assurance can vary, we give more detail about the procedures performed, so that the intended users can understand the nature, timing and extent of procedures we performed as context for our conclusion. These procedures performed vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

In performing our assurance procedures, which were based on our professional judgement, we performed the following:

- evaluated the suitability in the circumstances of SSE's use of the Reporting Criteria as the basis for preparing the Subject Matter Information including the associated reporting boundaries;
- obtained an understanding of SSE's control environment, processes and systems relevant to the preparation of the Subject Matter Information. Our procedures did not include evaluating the suitability of design or operating effectiveness of control activities;
- evaluated the appropriateness of measurement and evaluation methods, reporting policies used and estimates made by SSE, noting that our procedures did not involve testing the data on which the estimates are based or separately developing our own estimates against which to evaluate SSE's estimates;
- compared year on year movements and obtained explanations from management for significant differences we identified;
- performed limited substantive testing on a selective basis of the Subject Matter Information, which is aggregated from information submitted by SSE's business units. Testing involved agreeing arithmetical accuracy of calculations, and agreeing data points to or from source information to check that the underlying subject matter had been appropriately evaluated or measured, recorded, collated and reported;
- undertook physical site visits at Great Island and Peterhead thermal power stations to gain an understanding of the procedures and processes in place to ensure accuracy and completeness of data reported from the perspective of a power station and understand the control environment and governance structure; we selected these sites based on their inherent risk and materiality to SSE, unexpected fluctuations in the site Subject Matter Information since the prior period, and sites not visited in the prior period;
- evaluated the disclosures in, and overall presentation of, the Subject Matter Information.

Materiality

We are required to plan and perform our work to address the areas where we have identified that a material misstatement of the Subject Matter Information is likely to arise. We set certain quantitative thresholds for materiality. These, together with qualitative considerations, helped us to determine the nature, timing and extent of our procedures in support of our conclusion. We believe that it is important that the intended users have the information they need to understand the concept and the level of materiality to place our conclusion in context. Based on our professional judgement, we determined materiality for the Subject Matter Information as follows:

Overall materiality	<p>Materiality may differ depending upon the nature of the Subject Matter Information. We apply professional judgement to consider the most appropriate materiality benchmark for each aspect of the Subject Matter Information, having considered how the intended users may use the information.</p> <p>The benchmark approach for each aspect of the Subject Matter Information is indicated in the Sustainability metrics table above by one of the following numbers;</p> <ol style="list-style-type: none">(1) This metric is an absolute number. A benchmark materiality of 5% has been applied.(2) This metric measures intensity, which is calculated as a ratio between 2 different numbers. A benchmark of 5% has been applied to both the numerator and denominator used in the calculation.
----------------------------	---

We also agreed to report to the Directors misstatements ('reportable misstatements') identified during our work at a level below overall materiality, as well as misstatements below that lower level that in our view warranted reporting for qualitative reasons. The

Directors are responsible for deciding whether adjustments should be made to the Subject Matter Information in respect of those items.

Key assurance matters

We have determined that there are no key assurance matters to communicate in our report.

Challenges of non-financial information

The absence of a significant body of established practice upon which to draw to evaluate and measure non-financial information allows for different, but acceptable, evaluation and measurement techniques that can affect comparability between entities, and over time.

Non-financial information is subject to more inherent limitations than financial information, given the characteristics of the underlying subject matter and the methods used for measuring or evaluating it. The precision of different measurement techniques may also vary.

Reporting on Other Information

The other information comprises all of the information in the Report other than the Subject Matter Information and our assurance report. The Directors are responsible for the other information. As explained above, our conclusion does not extend to the other information and, accordingly, we do not express any form of assurance thereon. In connection with our assurance of the Subject Matter Information, our responsibility is to read the other information. In doing so, we consider whether the other information is materially inconsistent with the Subject Matter Information or our knowledge obtained during the assurance engagement, or otherwise appears to contain a material misstatement of fact. If we identify an apparent material inconsistency or material misstatement of fact, we are required to perform procedures to conclude whether there is a material misstatement of the Subject Matter Information or a material misstatement of the other information, and to take appropriate actions in the circumstances.

Responsibilities of the Directors

The Directors of SSE are responsible for:

- determining appropriate reporting topics and selecting or establishing suitable criteria for measuring or evaluating the underlying subject matter;
- ensuring that those criteria are relevant and appropriate to SSE and the intended users of the Report;
- the preparation of the Subject Matter Information in accordance with the Reporting Criteria including designing, implementing and maintaining systems, processes and internal controls over the evaluation or measurement of the underlying subject matter to result in Subject Matter Information that is free from material misstatement, whether due to fraud or error;
- documenting and retaining underlying data and records to support the Subject Matter Information;
- producing the Report that provides a balanced reflection of SSE's performance in this area and discloses, with supporting rationale, matters relevant to the intended users of the Report; and
- producing a statement of Directors' responsibility.

Our responsibilities

We are responsible for:

- planning and performing the engagement to obtain limited assurance about whether the Subject Matter Information is free from material misstatement, whether due to fraud or error;
- forming an independent conclusion, based on the procedures we have performed and the evidence we have obtained; and
- reporting our conclusion to the Directors of SSE.

Use of our report

Our report, including our conclusion, has been prepared solely for the Directors of SSE in accordance with the agreement between us dated 15 January 2024 (the "agreement"). To the fullest extent permitted by law, we do not accept or assume responsibility or liability to anyone other than the Board of Directors and SSE for our work or our report except where terms are expressly agreed between us in writing.
