ALTERNATIVE PERFORMANCE MEASURES

When assessing, discussing and measuring the Group's financial performance, management refer to measures used for internal performance management. These measures are not defined or specified under International Financial Reporting Standards ('IFRS') and as such are considered to be Alternative Performance Measures ('APMs').

By their nature, APMs are not uniformly applied by all preparers including other participants in the Group's industry. Accordingly, APMs used by the Group may not be comparable to other companies within the Group's industry.

Purpose

APMs are used by management to aid comparison and assess historical performance against internal performance benchmarks and across reporting periods. These measures provide an ongoing and consistent basis to assess performance by excluding items that are materially non-recurring, uncontrollable or exceptional. These measures can be classified in terms of their key financial characteristics:

- **Profit measures** allow management to assess and benchmark underlying business performance during the year. They are primarily used by operational management to measure operating profit contribution and are also used by the Board to assess performance against business plan. The Group has six profit measures, of which adjusted operating profit and adjusted profit before tax are the main focus of management through the financial year and adjusted earnings per share is the main focus of management on an annual basis. In order to derive adjusted earnings per share, the Group has defined adjusted operating profit, adjusted net finance costs, and adjusted current tax charge as components of the adjusted earnings per share calculation. Adjusted EBITDA is used by management as a proxy for cash derived from ordinary operations of the Group.
- **Capital measures** allow management to track and assess the progress of the Group's significant ongoing investment in capital assets and projects against their investment cases, including the expected timing of their operational deployment and also to provide a measure of progress against the Group's strategic Net Zero Acceleration Programme Plus objectives.
- **Debt measures** allow management to record and monitor both operating cash generation and the Group's ongoing financing and liquidity position.

There have been no changes to the way the Group calculates its APMs in the current year.

The following section explains the key APMs applied by the Group and referred to in these statements:

Profit measures

Group APM	Purpose	Closest equivalent IFRS measure	Adjustments to reconcile to primary financial statements
Adjusted EBITDA (earnings before interest, tax, depreciation and amortisation)	Profit measure	Operating profit	<ul style="list-style-type: none"> – Movement on operating and joint venture operating derivatives ('certain re-measurements') – Exceptional items – Adjustments to retained Gas Production decommissioning provision – Share of joint ventures and associates' interest and tax – Depreciation and amortisation before exceptional charges (including depreciation and amortisation expense on fair value uplifts) – Share of joint ventures and associates' depreciation and amortisation – Non-controlling share of operating profit – Non-controlling share of depreciation and amortisation – Release of deferred income
Adjusted Operating Profit	Profit measure	Operating profit	<ul style="list-style-type: none"> – Movement on operating and joint venture operating derivatives ('certain re-measurements') – Exceptional items – Adjustments to retained Gas Production decommissioning provision – Depreciation and amortisation expense on fair value uplifts – Share of joint ventures and associates' interest and tax – Non-controlling share of operating profit
Adjusted Profit Before Tax	Profit measure	Profit before tax	<ul style="list-style-type: none"> – Movement on operating and financing derivatives ('certain re-measurements') – Exceptional items – Adjustments to retained Gas Production decommissioning provision – Non-controlling share of profit before tax – Depreciation and amortisation expense on fair value uplifts – Interest on net pension assets/liabilities (IAS 19) – Share of joint ventures and associates' tax
Adjusted Net Finance Costs	Profit measure	Net finance costs	<ul style="list-style-type: none"> – Exceptional items – Movement on financing derivatives – Share of joint ventures and associates' interest – Non-controlling share of financing costs – Interest on net pension assets/liabilities (IAS 19)

Group APM	Purpose	Closest equivalent IFRS measure	Adjustments to reconcile to primary financial statements
Adjusted Current Tax Charge	Profit measure	Tax charge	<ul style="list-style-type: none"> – Share of joint ventures and associates' tax – Non-controlling share of current tax – Deferred tax including share of joint ventures, associates and non-controlling interests – Tax on exceptional items and certain re-measurements
Adjusted Earnings Per Share	Profit measure	Earnings per share	<ul style="list-style-type: none"> – Exceptional items – Adjustments to retained Gas Production decommissioning provision – Movements on operating and financing derivatives ('certain re-measurements') – Depreciation and amortisation expense on fair value uplifts – Interest on net pension assets/liabilities (IAS 19) – Deferred tax including share of joint ventures, associates and non-controlling interests

Rationale for adjustments to profit measure

1 Movement on operating and financing derivatives ('certain re-measurements')

This adjustment can be designated between operating and financing derivatives.

Operating derivatives are contracts where the Group's SSE Energy Markets (formerly Energy Portfolio Management ('EPM') function enters into forward commitments or options to buy or sell electricity, gas and other commodities to meet the future demand requirements of the Group's SSE Business Energy and SSE Airtricity operating units, or to optimise the value of the production from SSE Renewables and Thermal generation assets or to conduct other trading subject to the value at risk limits set out by the Energy Markets Risk Committee. Certain of these contracts (predominantly purchase contracts) are determined to be derivative financial instruments under IFRS 9 and as such are required to be recorded at their fair value. Changes in the fair value of those commodity contracts designated as IFRS 9 financial instruments are reflected in the income statement (as part of 'certain re-measurements'). The Group shows the change in the fair value of these forward contracts separately as this mark-to-market movement is not relevant to the underlying performance of its operating segments due to the volatility that can arise on revaluation. The Group will recognise the underlying value of these contracts as the relevant commodity is delivered, which will predominantly be within the subsequent 12 to 24 months. Conversely, commodity contracts that are not financial instruments under IFRS 9 (predominantly sales contracts) are accounted for as 'own use' contracts and are consequently not recorded until the commodity is delivered and the contract is settled. Gas inventory purchased by the Group's Gas Storage business for secondary trading opportunities is also held at fair value with gains and losses on re-measurement recognised as part of 'certain re-measurements' in the income statement. Finally, the mark-to-market valuation movements on the Group's contracts for difference contracts entered into by SSE Renewables that are not designated as government grants and which are measured as Level 3 fair value financial instruments are also included within 'certain re-measurements'.

Financing derivatives include all fair value and cash flow interest rate hedges, non-hedge accounted (mark-to-market) interest rate derivatives, cash flow foreign exchange hedges and non-hedge accounted foreign exchange contracts entered into by the Group to manage its banking and liquidity requirements as well as risk management relating to interest rate and foreign exchange exposures. Changes in the fair value of those financing derivatives are reflected in the income statement (as part of 'certain re-measurements'). The Group shows the change in the fair value of these forward contracts separately as this mark-to-market movement is not relevant to the underlying performance of its operating segments.

The re-measurements arising from operating and financing derivatives, and the tax effects thereof, are disclosed separately to aid understanding of the underlying performance of the Group.

2 Exceptional items

Exceptional charges or credits, and the tax effects thereof, are considered unusual by nature or scale and of such significance that separate disclosure is required for the underlying performance of the Group to be properly understood. Further explanation for the classification of an item as exceptional is included in note 3.2.

3 Adjustments to retained Gas Production decommissioning provision

The Group retains an obligation for 60% of the decommissioning liabilities of its former Gas Production business which was disposed in October 2021. The revaluation adjustments relating to these decommissioning liabilities are accounted for through the Group's consolidated income statement and are removed from the Group's adjusted profit measures as the revaluation of the provision is not considered to be part of the Group's core continuing operations.

4 Share of joint ventures and associates' interest and tax

This adjustment can be split between the Group's share of interest and the Group's share of tax arising from its investments in equity accounted joint ventures and associates. The Group is required to report profit before interest and tax ('operating profit') including its share of the profit after tax from its equity accounted joint ventures and associates. However, for internal performance management purposes and for consistency of treatment, SSE reports its adjusted operating profit measures before its share of the interest and/or tax on joint ventures and associates.

ALTERNATIVE PERFORMANCE MEASURES – CONTINUED

Rationale for adjustments to profit measure continued

5 Share of joint ventures and associates' depreciation and amortisation

For management purposes, the Group considers EBITDA (earnings before interest, tax, depreciation and amortisation) based on a sum-of-the-parts derived metric which includes a share of the EBITDA from equity accounted investments. While this is not equal to adjusted cash generated from operating activities, it is considered useful by management in assessing a proxy for such a measure, given the complexity of the Group structure and the range of investment structures utilised. For the purpose of calculating the 'Net Debt to EBITDA' metric referred at [page 63](#), 'adjusted EBITDA' is further refined to remove the proportion of adjusted EBITDA from equity-accounted joint ventures relating to off-balance sheet debt (see note 5.1(v)).

6 Depreciation and amortisation expense on fair value uplifts

The Group's strategy includes the realisation of value (developer gains) from divestments of stakes in SSE Renewables' offshore and international developments. In addition, for strategic purposes the Group may also decide to bring in equity partners to other businesses and assets. Where SSE's interest in such vehicles changes from full to joint control, and the subsequent arrangement is classified as an equity accounted joint venture, SSE may recognise a fair value uplift on the remeasurement of its retained equity investment. Those non-cash accounting uplifts will be treated as exceptional gains in the year of the relevant transactions completing. Furthermore, SSE may acquire businesses or joint venture interests which are determined to generate an exceptional opening gain on acquisition and accordingly will record an accounting fair value uplift to the opening assets acquired. These uplifts create assets or adjustments to assets, which are depreciated or amortised over the remaining life of the underlying assets or contracts in those businesses with the charge being included in the Group's depreciation and amortisation expense. The Group's adjusted operating profit, adjusted profit before tax and adjusted earnings per share are adjusted to exclude any additional depreciation, amortisation and impairment expense arising from the fair value uplifts given these charges are derived from significant one-off gains, which are treated as exceptional when initially recognised.

7 Release of deferred income

The Group deducts the release of deferred income in the year from its adjusted EBITDA metric as it principally relates to customer contributions against depreciating assets. As the metric adds back depreciation, the income is also deducted.

8 Interest on net pension assets/liabilities (IAS 19 "Employee Benefits")

The Group's interest income relating to defined benefit pension schemes is derived from the net assets of the schemes as valued under IAS 19. This will mean that the credit or charge recognised in any given year will be dependent on the impact of actuarial assumptions such as inflation and discount rates. The Group excludes these from its adjusted profit measures due to the non-cash nature of these charges or credits.

9 Deferred tax

The Group adjusts for deferred tax when arriving at adjusted profit after tax, adjusted earnings per share and its adjusted effective rate of tax. Deferred tax arises as a result of differences in accounting and tax bases that give rise to potential future accounting credits or charges. As the Group remains committed to its ongoing capital programme, the liabilities associated are not expected to reverse and accordingly the Group excludes these from its adjusted profit measures.

10 Results attributable to non-controlling interest holders

The Group's structure includes non-wholly owned but controlled subsidiaries which are consolidated within the financial statements of the Group under IFRS. The most significant of those is SSEN Transmission, a 25% stake in which was divested on 30 November 2022 (see note 12.2 in the financial statements). In the current and prior year the Group has removed the share of profit attributable to holders of non-controlling equity stakes in such businesses from the point when the ownership structure changed (i.e. for SSEN Transmission, with effect from 1 December 2022) from all of its profit measures, to report all metrics based on the share of profits items attributable to the ordinary equity holders of the Group. The adjustment has been applied consistently to all of the Group's adjusted profit measures, including removing proportionate non-controlling share of operating profit and depreciation and amortisation from the Group's adjusted EBITDA metric; removing the non-controlling share of operating profit from the Group's adjusted operating profit metric; removing the non-controlling share of net finance costs from the Group's adjusted net finance costs metric; and removing the non-controlling interest share of current tax from the Group's adjusted current tax metric. There is no impact to disclosures for 31 March 2022.

Debt measure

Group APM	Purpose	Closest equivalent IFRS measure	Adjustments to reconcile to primary financial statements
Adjusted Net Debt and Hybrid Capital	Debt measure	Unadjusted net debt	<ul style="list-style-type: none"> – Hybrid equity – Cash held and posted as collateral – Lease obligations – Non-controlling share of borrowings and cash

Rationale for adjustments to debt measure

11 Hybrid equity

The characteristics of certain hybrid capital securities mean that they qualify for recognition as equity rather than debt under IFRS. Consequently, their coupon payments are presented within equity rather than within finance costs. As a result, the coupon payments are not included in SSE's adjusted profit before tax measure. In order to present total funding provided from sources other than ordinary shareholders, SSE presents its adjusted net debt measure inclusive of hybrid capital to better reflect the Group's funding position.

12 Cash held and posted as collateral

Cash held and posted as collateral refers to cash balances received from and deposited with counterparties including trading exchanges. Collateral balances mostly represent initial and variation margin, required as part of the management of the Group's exposures on commodity contracts, that will be received on maturity of the related trades. Loans with a maturity of less than three months are also included in this adjustment. The Group includes this adjustment in order to better reflect the immediate cash resources to which it has access, which in turn better reflects the Group's funding position.

13 Lease obligations

SSE's reported loans and borrowings include lease liabilities on contracts within the scope of IFRS 16, which are not directly related to external financing of the Group. The Group excludes these liabilities from its adjusted net debt and hybrid capital measure to better reflect the Group's underlying funding position with its primary sources of capital.

14 Debt and cash attributable to non-controlling interests

The Group's structure includes non-wholly owned but controlled subsidiaries which are consolidated within the financial statements of the Group under IFRS. The most significant of those is SSEN Transmission, a 25% stake in which was divested on 30 November 2022 (see note 12.2 in the financial statements for more details of that transaction). Following completion of the transaction, the Group has removed the share of external debt and cash in these subsidiaries proportionately attributable to the non-controlling interest holders from its adjusted net debt and hybrid capital metric. While legal entitlement to these items has not changed, the Group makes this adjustment to present net debt attributable to ordinary equity holders of the Group.

	March 2024 £m	March 2023 £m	March 2022 £m
Unadjusted net debt	(8,097.8)	(8,168.1)	(8,015.4)
Cash (held)/posted as collateral	(353.2)	316.3	74.7
Lease obligations	407.5	405.9	393.5
External net debt attributable to non-controlling interests	490.2	434.2	–
Adjusted Net Debt	(7,553.3)	(7,011.7)	(7,547.2)
Hybrid equity	(1,882.4)	(1,882.4)	(1,051.0)
Adjusted Net Debt and Hybrid Capital	(9,435.7)	(8,894.1)	(8,598.2)

Capital measures

Group APM	Purpose	Closest equivalent IFRS measure	Adjustments to reconcile to primary financial statements
Adjusted Investment and Capital Expenditure	Capital measure	Capital additions to intangible assets and property, plant and equipment	<ul style="list-style-type: none"> – Customer funded additions – Allowances and certificates – Additions acquired through business combinations – Joint ventures and associates' additions funding – Non-controlling share of capital expenditure – Lease asset additions
Adjusted Investment, Capital and Acquisition Expenditure	Capital measure	Capital additions to intangible assets and property, plant and equipment	<ul style="list-style-type: none"> – Customer funded additions – Allowances and certificates – Additions acquired through business combinations – Joint ventures and associates' additions funding – Non-controlling share of capital expenditure – Lease asset additions – Acquisition cash consideration

Rationale for adjustments to capital measures

15 Customer funded additions

Customer funded additions represents additions to electricity and other networks funded by customer contributions. Given these are directly funded by customers, these additions have been excluded to better reflect the Group's underlying investment position.

16 Allowances and certificates

Allowances and certificates consist of purchased carbon emissions allowances and generated or purchased renewable obligations certificates (ROCs) and additions in the year are not included in the Group's 'capital expenditure and investment' APM to better reflect the Group's investment in enduring operational assets.

17 Additions acquired through business combinations

Where the Group acquires an early-stage development company, which is classified as the acquisition of an asset, or group of assets and not the acquisition of a business, the acquisition is treated as an addition to intangible assets or property, plant and equipment and is included within 'adjusted investment and capital expenditure'. Where the Group acquires an established business or interest in an equity-accounted joint venture requiring a fair value assessment in line with the principles of IFRS 3 'Business Combinations', the fair value of acquired consolidated tangible or intangible assets are excluded from the Group's 'adjusted investment and capital expenditure', as they are not direct capital expenditure by the Group. However, the fair valuation of consideration paid for the business or investment is included in the Group's 'adjusted investment, capital and acquisition expenditure' metric, see 23 below. Please refer to note 12 for detail of the Group's acquisitions in the year.

18 Additions subsequently disposed or impaired

For consistency of presentation, any capital additions in the year that are subsequently written-down or disposed are removed from the APM.

19 Joint ventures and associates' additions funding

Joint ventures and associates' additions included in the Group's capital measures represent the direct loan or equity funding provided by the Group to joint venture and associate arrangements in relation to capital expenditure projects. This has been included to better reflect the Group's use of directly funded equity accounted vehicles to grow the Group's asset base. Asset additions funded by project finance raised within the Group's joint ventures and associates are not included in this adjustment.

ALTERNATIVE PERFORMANCE MEASURES – CONTINUED

Rationale for adjustments to profit measure continued

20 Non-controlling share of capital expenditure

The Group's structure includes non-wholly owned but controlled subsidiaries which are consolidated within the financial statements of the Group under IFRS. The most significant of those is SSEN Transmission, a 25% stake in which was divested on 30 November 2022 (see note 12.2 in the financial statements for more details of that transaction). In the current year, the Group has removed the share of capital additions attributable proportionately to these equity holders from the point when the ownership structure changed (i.e. for SSEN Transmission, with effect from 1 December 2022) from its "adjusted investment and capital expenditure" and "adjusted investment, capital and acquisition expenditure" metrics. This is consistent with the adjustments noted elsewhere related to these non-controlling interests. This has no impact on the metrics for March 2022.

21 Refinancing proceeds/refunds

The Group's model for developing large scale capital projects within joint ventures and associates involves project finance being raised within those entities. Where the Group funds early-stage capex which is then subsequently reimbursed to SSE following the receipt of project finance within the vehicle, the refinancing proceeds are included in the Group's net adjusted investment and capital expenditure metric. This is consistent with the inclusion of the initial investment in the metric as explained at 17 above. There were no refinancing proceeds in the year ended 31 March 2024 (2023: Enil). In the year ended 31 March 2022, Doggerbank windfarm reimbursed SSE for previous funding of £136.7m. These receipts have been deducted from the Group's adjusted investment and capital expenditure metric.

22 Lease additions

Additions of right of use assets under the Group's IFRS 16 compliant policies for lease contracts are excluded from the Group's adjusted capital measures as they do not represent directly funded capital investment. This is consistent with the treatment of lease obligations explained at 13, above.

23 Acquisition cash consideration in relation to business combinations

The Group has outlined a significant investment programme which will partly be achieved through the acquisition of businesses with development opportunities for the Group. The cash consideration paid for these entities is included within the Group's adjusted investment, capital and acquisition expenditure metric as it provides stakeholders an accurate basis of cash investment into the Group's total development pipeline and is consistent with the reporting of the Group's Net Zero Acceleration Programme Plus.

	March 2024 £m	March 2023 £m	March 2022 £m
Capital additions to intangible assets	1,314.2	1,688.6	921.0
Capital additions to property, plant and equipment	1,971.4	1,500.1	1,392.9
Capital additions to intangible assets and property, plant and equipment	3,285.6	3,188.7	2,313.9
Customer funded additions	(152.0)	(80.9)	(91.3)
Allowances and certificates	(774.5)	(805.2)	(544.5)
Additions through business combinations	–	(515.2)	(197.8)
Additions subsequently disposed/impaired	–	–	(13.9)
Joint ventures and associates' additions	390.0	498.4	682.5
Non-controlled interests share of capital expenditure	(199.4)	(46.7)	–
Refinancing (proceeds)/refunds	–	–	(136.7)
Lease asset additions	(73.0)	(78.5)	(85.7)
Adjusted Investment and Capital Expenditure	2,476.7	2,160.6	1,926.5
Acquisition cash consideration	–	642.7	141.3
Adjusted Investment, Capital and Acquisition Expenditure	2,476.7	2,803.3	2,067.8

Impact of discontinued operations on the Group's APMs

The following metrics have been adjusted in all years presented to exclude the contribution of the Group's investment in Scotia Gas Networks Limited ('SGN') which was disposed on 22 March 2022 and the Group's Gas Production operations which were disposed on 14 October 2021:

- Adjusted EBITDA;
- Adjusted operating profit;
- Adjusted net finance costs;
- Adjusted profit before tax;
- Adjusted current tax charge; and
- Adjusted earnings per share.

'Adjusted net debt and hybrid capital', 'adjusted investment and capital expenditure', and 'adjusted investment, capital and acquisition expenditure' have not been adjusted as the Group continues to fund the discontinued operations until the date of disposal. The following table summarises the impact of excluding discontinued operations from the APMs of the continuing activities of the Group in the year ended 31 March 2022:

	March 2024 £m	March 2023 £m	March 2022 £m
Adjusted EBITDA of SSE Group (including discontinued operations)	3,295.6	3,382.1	2,384.8
Less: Gas Production profit	-	-	(101.4)
Less: SGN profit	-	-	(32.1)
Adjusted EBITDA of continuing operations APM	3,295.6	3,382.1	2,251.3
Adjusted operating profit of SSE Group (including discontinued operations)	2,426.4	2,529.2	1,653.3
Less: Gas Production profit	-	-	(101.4)
Less: SGN profit	-	-	(21.0)
Adjusted operating profit of continuing operations APM	2,426.4	2,529.2	1,530.9
Adjusted net finance costs of SSE Group (including discontinued operations)	251.7	345.6	377.6
Less: Gas Production	-	-	(0.1)
Less: SGN	-	-	(4.7)
Adjusted net finance costs of continuing operations APM	251.7	345.6	372.8

Cash and cash equivalents at the end of year	21	1,035.9	891.8

The accompanying notes are an integral part of these financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2024

1. General Information and basis of preparation

1.1. General information

SSE plc (the Company) is a company domiciled in Scotland. The address of the registered office is given on the back cover. The Group's operations and its principal activities are set out in the Strategic Report. The consolidated financial statements for the year ended 31 March 2024 comprise those of the Company and its subsidiaries (together referred to as the Group). The Company financial statements present information about the Company as a separate entity and not about the Group, these can be seen on [pages 310 to 323](#).

1.2. Basis of preparation

Statement of compliance

The financial statements were authorised for issue by the directors on 21 May 2024. The financial statements have been prepared in accordance with UK adopted International Accounting Standards ('IAS').

Going concern

The Directors consider that the Group has adequate resources to continue in operational existence for the period to 31 December 2025. The financial statements are therefore prepared on a going concern basis.

In addition, further details of the Group's liquidity position and going concern review are provided at note 21 and in [A6](#) Accompanying Information to the Financial Statements on [page 296](#).

Basis of measurement

The financial statements of the Group are prepared on the historical cost basis except for certain gas inventory, derivative financial instruments, financial instruments designated at fair value through profit or loss or other comprehensive income on initial recognition, assets of the Group pension schemes, all of which are measured at their fair value, and liabilities of the Group pension schemes which are measured using the projected unit credit method. The directors believe the financial statements present a true and fair view. The financial statements of the Group are presented in pounds sterling. The basis for including operations and transactions conducted in currencies other than pounds sterling is provided in [A1](#) Accompanying Information to the Financial Statements on [page 271](#).

Use of estimates and judgements

The preparation of financial statements conforming with adopted IFRS requires the use of certain accounting estimates. It also requires management to exercise judgement in the process of applying the accounting policies. The areas involving a higher level of judgement or estimation are summarised at [pages 209 to 211](#).

Changes to presentation and prior year adjustments

The prior year comparatives at 31 March 2023 have been restated following the adoption of IFRS 17 'Insurance Contracts' ('IFRS 17') and the amendment to IAS 12 'Deferred Tax relating to Assets and Liabilities arising from a Single Transaction' ('IAS 12'), as disclosed in the section below 2.1.

Segments

In accordance with the requirements of IFRS 8 'Operating Segments' the Group has aligned its segmental disclosures with its revised internal reporting following changes to the Group's structure and operations. These segments are used internally by the Group Executive Committee in order to assess operating performance and to make decisions on how to allocate capital. Consequently, the segmental results reported in the Group's operating segments have been restated with effect from 1 April 2022. During the year to 31 March 2024, SSE Renewables assumed responsibility for the development, delivery and operation of battery storage and solar assets in Great Britain from SSE Enterprise (formerly Distributed Energy), aligning that activity with its international operations. In addition, the Building Energy Management Systems ('BEMS') activity has been assumed by SSE Business Energy. Accordingly, the result from the Group's battery and solar business and BEMS will now be reported within SSE Renewables and Energy Customers Solutions respectively. Comparative segmental information in note 5 has been re-presented to reflect the change to these segments. The impacts of the restatements are a decrease to the adjusted operating profit of SSE Renewables (2023: £18.2m), a decrease to the adjusted operating profit of SSE Business Energy (2023: £2.2m) and a decrease to the adjusted operating loss of SSE Enterprise (2023: £20.4m). Additionally, adjusted capital expenditure has been re-presented with an increase to SSE Renewables (2023: £74.0m), an increase to SSE Business Energy (2023: £0.4m) and a decrease to SSE Enterprise (2023: £74.4m). Revenue has been re-presented with an increase to SSE Business Energy (2023: £46.0m) and a decrease to SSE Enterprise (2023: £46.0m). Finally, note that there were two changes to the names of segments in the year: 1) Distributed Energy was renamed SSE Enterprise and 2) EPMI was renamed SSE Energy Markets.

Derivative financial liabilities prior year adjustment

A prior year adjustment has been made to reflect the restatement of derivative financial liabilities as a result of an incorrect classification split in the prior year. The adjustment has been to present non-current derivative financial liabilities as £243.3m (previously £1,021.0m) and current derivative financial liabilities as £1,021.0m (previously £243.3m). This adjustment has no impact on retained earnings, net assets or adjusted performance measures of the Group, at any reporting date.

Investments presentation change

In the current year the classification of an investment of £24.1m has been reassessed and reclassified from 'Other investments' to 'Equity investments in joint ventures and associates'. The investment has been recognised as an associate reflecting the Group's level of ownership and influence over the investee; comparative amounts have not been re-presented.

Changes to estimates

On 31 March 2024, the Group's Thermal business unit reviewed the useful economic life of the Peterhead, Keadby and Medway CCGT assets and extended their useful lives to 2030 following the award of capacity mechanism contracts. The change in useful economic life had no impact on the depreciation charge for the year ended 31 March 2024, but will reduce the depreciation charge for the year ending 31 March 2025 by £16.4m.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

FOR THE YEAR ENDED 31 MARCH 2024

2. New accounting policies and reporting changes

The principal accounting policies applied in the preparation of these financial statements are set out below and in the [A1](#) Accompanying Information to the Financial Statements on [pages 271 to 281](#).

2.1. New standards, amendments and interpretations effective or adopted by the Group

On 1 April 2023, the Group adopted IFRS 17 and the amendments to IAS 12 on a modified retrospective basis from the earliest period presented in these financial statements.

The Group provides guarantees in respect of certain activities of former subsidiaries and to certain current joint venture investments. Prior to adoption of IFRS 17, these contracts were designated as insurance contracts under IFRS 4 'Insurance Contracts' ('IFRS 4'). Under IFRS 4, existing accounting practices were grandfathered and the contracts were treated as contingent liabilities until such time as it became probable the Group would be required to make payment to settle the obligation. The adoption of IFRS 17 from 1 April 2022 resulted in a reassessment of these contracts and the Group elected to apply the valuation principles of IFRS 9 to these contracts. Adoption resulted in the recognition of financial guarantee liabilities of £54.9m; a £22.7m increase in equity investments in joint ventures and associates; and a £32.2m adjustment to retained earnings. On 1 September 2022, the Group acquired a 50% joint venture investment in Triton Power Holdings Limited ('Triton') and provided parent company guarantees to Saltend Cogeneration Company Limited, a subsidiary of Triton. In the comparative year to 31 March 2023, the Group has therefore recognised a further £16.0m increase to the Group's financial guarantee liabilities to reflect this guarantee and a £16.0m increase to the Group's equity investment in Triton.

During the current year to 31 March 2024, the Group recognised a net decrease in financial guarantee liabilities of £31.4m, a reduction in the value of its joint venture investments of £6.9m and a settlement of £12.0m resulting in a net income statement credit of £12.5m, of which £5.1m has been treated as exceptional. During the six month period to 30 September 2023, the Group recognised an exceptional expense of £50.5m in relation to guarantees provided to its former subsidiary Enerveo Limited. During the second half of the financial year the Group completed the reacquisition of Enerveo and reversed the entries arising from the adoption of IFRS 17 that eliminate on consolidation (see note 7 for further details).

The Group has identified that IFRS 17 impacts the results of its captive insurance subsidiary as it issues insurance contracts, however only the subsidiary's reinsurance contracts do not eliminate on consolidation. The accounting for these contracts under IFRS 17 is immaterial to the Group's consolidated financial statements.

The adoption of the amendments to IAS 12 resulted in an increase of £50.1m (2023: £45.5m) to the Group's gross deferred tax assets and gross deferred tax liabilities recognised in relation to the Group's decommissioning obligations and a reclassification of £79.5m of gross deferred tax assets. Adoption had no impact on retained earnings or profits recognised in presented periods.

In the year, the Group also adopted the amendments to:

- IAS 1 'Presentation of Financial Statements' and IFRS Practice Statement 2 'Making Materiality Judgements' in relation to disclosure of accounting policies;
- IAS 8 'Accounting Policies, Changes in Accounting Estimates and Errors' in relation to the definition of accounting estimates; and
- Pillar Two Model Rules (Amendments to IAS 12) as issued on 23 May 2023, was substantively enacted in the UK from 20 June 2023. The amendments to IAS 12 introduce a temporary mandatory relief from accounting for deferred tax that arises from legislation implementing OECD Pillar Two. SSE has applied the exception to recognising and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes.

Adoption of these other amendments had no material impact on these Financial Statements. There were no other standards, amendments to standards or interpretations relevant to the Group's operations which were adopted during the year.

2.2. New standards, amendments and interpretations issued, but not yet adopted by the Group

On 9 April 2024, subsequent to the balance sheet date, the IASB issued IFRS 18 'Presentation and Disclosure in Financial Statements'. The Group will assess the expected impact of the adoption of the standard during the forthcoming year. A number of other standards, amendments and interpretations have been issued but not yet adopted by the Group within these financial statements, because application is not yet mandatory or because UK adoption remains outstanding at the date the financial statements were authorised for issue. These amendments are not anticipated to have a material impact on the Group's consolidated financial statements.

3. Adjusted accounting measures

The Group applies the use of adjusted accounting measures or alternative performance measures ('APMs') throughout the Annual Report and Financial Statements. These measures enable the Directors to present the underlying performance of the Group and its segments to the users of the statements in a consistent and meaningful manner. The adjustments applied and certain terms such as 'adjusted operating profit', 'adjusted earnings per share', 'adjusted EBITDA', 'adjusted investment and capital expenditure', 'adjusted investment, capital and acquisition expenditure' and 'adjusted net debt and hybrid capital' that are not defined under IFRS and are explained in more detail below. In addition, the section 'Alternative Performance Measures' at [page 190](#) provides further context and explanation of these terms.

3.1. Adjusted measures

The Directors assess the performance of the Group and its reportable segments based on 'adjusted measures'. These measures are used for internal performance management and are believed to be appropriate for explaining underlying performance to users of the accounts. These measures are also deemed to be the most useful for ordinary shareholders of the Company and for other stakeholders.

The performance of the reportable segments is reported based on adjusted profit before interest and tax ('adjusted operating profit'). This is reconciled to reported profit before interest and tax by adding back exceptional items and certain re-measurements (see note 3.2 below), depreciation and amortisation expense on fair value uplifts, the share of operating profit attributable to non-controlling interests, adjustments to the retained Gas Production decommissioning provision and after the removal of interest and taxation on profits from equity-accounted joint ventures and associates.

The performance of the Group is reported based on adjusted profit before tax which excludes exceptional items and certain re-measurements (see note 3.2 below), depreciation and amortisation expense on fair value uplifts, the share of profit before tax attributable to non-controlling interests, the net interest costs associated with defined benefit schemes, adjustments to the retained Gas Production decommissioning provision and taxation on profits from equity-accounted joint ventures and associates. The interest charges or credits on defined benefit schemes removed are non-cash and are subject to variation based on actuarial valuations of scheme liabilities.

The Group also uses adjusted earnings before interest, taxation, depreciation and amortisation ('adjusted EBITDA') as an alternative operating performance measure which acts as a management proxy for cash generated from operating activities. This does not take into account the rights and obligations that SSE has in relation to its equity-accounted joint ventures and associates. This measure excludes exceptional items and certain re-measurements (see note 3.2 below), the depreciation charged on fair value uplifts, the share of EBITDA attributable to non-controlling interests, adjustments to the retained Gas Production decommissioning provision, the net interest costs associated with defined benefit schemes, depreciation and amortisation from equity-accounted joint ventures and associates and interest and taxation on profits from equity-accounted joint ventures and associates. For the purpose of calculating the 'Net Debt to EBITDA' metric referred at [page 63](#), 'adjusted EBITDA' is further adjusted to remove the proportion of adjusted EBITDA from equity-accounted joint ventures relating to off-balance sheet debt (see note 5.1 (v)).

The Group's key performance measure is adjusted earnings per share (EPS), which is based on basic earnings per share before exceptional items and certain re-measurements (see note 3.2 below), depreciation and amortisation on fair value uplifts, adjustments to the retained Gas Production decommissioning provision, the net interest costs/income associated with defined benefit schemes and after the removal of deferred taxation and other taxation items. Deferred taxation is excluded from the Group's adjusted EPS because of the Group's significant ongoing capital investment programme, which means that the deferred tax is unlikely to reverse. Adjusted profit after tax is presented on a basis consistent with adjusted EPS except for the non-inclusion of payments to holders of hybrid equity.

The financial statements also include an 'adjusted net debt and hybrid capital' measure. This presents financing information on the basis used for internal liquidity risk management. This measure excludes obligations due under lease arrangements and the share of net debt attributable to non-controlling interests, and includes cash held and posted as collateral on commodity trading exchanges, and other short term loans. The measure represents the capital owed to investors, lenders and equity holders other than the ordinary shareholders. As with 'adjusted earnings per share', this measure is considered to be of relevance to the ordinary shareholders of the Group as well as other stakeholders and interested parties.

Finally, the financial statements include an 'adjusted investment and capital expenditure' and an 'adjusted investment, capital and acquisition expenditure' measure. These metrics represent the capital invested by the Group in projects that are anticipated to provide a return on investment over future years or which otherwise support Group operations and are consistent with internally applied metrics. They therefore include capital additions to property, plant and equipment and intangible assets and also the Group's direct funding of joint venture and associates capital projects. The Group has considered it appropriate to report these values both internally and externally in this manner due to its use of equity-accounted investment vehicles to grow the Group's asset base and to highlight where the Group is providing funding to the vehicle through either loans or equity. The Group does not include project funded capital additions in these metrics, nor does it include other capital invested in joint ventures and associates. Where initial capital funding of an equity accounted joint venture is refunded, these refunds are deducted from the metrics in the year the refund is received. In addition, the Group excludes from this metric additions to its property, plant and equipment funded by Customer Contributions and additions to intangible assets associated with Allowances and Certificates. The Group also excludes the share of investment and capital expenditure attributable to non-controlling interests in controlled but not wholly owned subsidiaries, disposed or impaired additions and refinancing proceeds and refunds. The 'adjusted investment, capital and acquisition expenditure' measure also includes cash consideration paid by the Group in business combinations which contribute to growth of the Group's capital asset base and is considered to be relevant metric in context of the Group's Net Zero Acceleration Programme Plus. As with 'adjusted earnings per share', these measures are considered to be of relevance to management and to the ordinary shareholders of the Group as well as to other stakeholders and interested parties.

Reconciliations from reported measures to adjusted measures along with further description of the rationale for those adjustments are included in the "Adjusted Performance Measures" section at [pages 190 to 197](#).

APM Where the Group have referred to an adjusted performance measure in the financial statements the following sign is presented to denote this.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

3. Adjusted accounting measures continued

3.2. Exceptional items and certain re-measurements

Exceptional items are those charges or credits that are considered unusual by nature and/or scale and of such significance that separate disclosure is required for the financial statements to be properly understood. The trigger points for recognition of items as exceptional items will tend to be non-recurring, although exceptional charges (or credits) may impact the same asset class or segment over time.

Examples of items that may be considered exceptional include material asset, investment or business impairment charges; reversals of historic exceptional impairments; certain business restructuring and reorganisation costs; significant realised gains or losses on disposal; unrealised fair value adjustments on acquisition or disposals; and provisions in relation to significant disputes and claims.

The Group operates a policy framework for establishing whether items should be considered to be exceptional. This framework, which is reviewed annually, is based on the materiality of the item, by reference to the Group's key performance measure of adjusted earnings per share. This framework estimates that any qualifying item greater than £40.0m (2023: £40.0m) will be considered exceptional, with a potentially lower threshold applied to strategic restructuring of activities or discontinued operations, which will respectively be considered on a case by case basis or will always be treated as exceptional. The only exception to this threshold is for gains or losses on disposal, or divestment of early-stage SSE Renewables international or offshore wind farm development projects within SSE Renewables, which are considered non-exceptional in line with the Group's strategy to generate recurring gains from developer divestments. Where a gain arises on a non-cash transaction, the gain is treated as exceptional.

Certain re-measurements are re-measurements arising on certain commodity, interest rate and currency contracts which are accounted for as held for trading or as fair value hedges in accordance with the Group's policy for such financial instruments; remeasurements on stocks of commodities held at the balance sheet date; or movements in fair valuation of contracts for difference not designated as government grants. The amount recorded in the adjusted results for these contracts is the amount settled in the year as disclosed in note 24.1.

This excludes commodity contracts not treated as financial instruments under IFRS 9 where the contracts are held for the Group's own use requirements; the fair value of these contracts is not recorded and the value associated with the contract is not recognised until the underlying commodity is delivered.

The impact of changes in Corporation Tax rates on deferred tax balances are also included within certain remeasurements.

3.3. Other additional disclosures

As permitted by IAS 1 'Presentation of financial statements', the Group's income statement discloses additional information in respect of joint ventures and associates, exceptional items and certain re-measurements to aid understanding of the Group's financial performance and to present results clearly and consistently.

4. Accounting judgements and estimation uncertainty

In the process of applying the Group's accounting policies, management is necessarily required to make judgements and estimates that will have a significant effect on the amounts recognised in the financial statements. Changes in the assumptions underlying the estimates could result in a significant impact to the financial statements. The Group's key accounting judgement and estimation areas are noted below, with the most significant financial judgement areas as specifically considered by the Audit Committee highlighted separately.

The Group has made no changes to its significant financial judgement areas during the year. In the year ended 31 March 2024 the Group completed the implementation and migration of customers to a new billing system within the Group's SSE Business Energy segment. The migration of customers late in the financial year has resulted in the level of judgement applied in the SSE Business Energy revenue accrual increasing year on year (see 4.1 (iii) below).

4.1. Significant financial judgements and estimation uncertainties

The preparation of these financial statements has specifically considered the following significant financial judgements, some of which are also areas of estimation uncertainty as noted below.

i. Impairment testing and valuation of certain non-current assets – financial judgement and estimation uncertainty

The Group reviews the carrying amounts of its goodwill, other intangible assets, specific property, plant and equipment and investment assets to determine whether any impairments or reversal of impairments to the carrying value of those assets requires to be recorded. Where an indicator of impairment or impairment reversal exists, the recoverable amount of those assets is determined by reference to value in use calculations or fair value less cost to sell assessments, if more appropriate. As well as its goodwill balances, the specific assets under review in the year ended 31 March 2024 are intangible development assets and specific property, plant and equipment assets related to gas storage and thermal power generation. In addition, the Group performed an impairment review over the carrying value of its equity investments in Neos Networks Limited and Triton Power Holdings Limited.

In conducting its reviews, the Group makes judgements and estimates in considering both the level of cash generating unit (CGU) at which common assets such as goodwill are assessed against, as well as the estimates and assumptions behind the calculation of recoverable amount of the respective assets or CGUs.

Changes to the estimates and assumptions on factors such as regulation and legislation changes (including the Electricity Generator Levy and climate change related regulation), power, gas, carbon and other commodity prices, volatility of gas prices, plant running regimes and load factors, discount rates and other inputs could impact the assessed recoverable value of assets and CGUs and consequently impact the Group's income statement and balance sheet.

Further detail of the calculation basis and key assumptions used in the impairment review, the resulting impairment and the sensitivity of this assessment to key assumptions is disclosed at note 15. Detail on the accounting policies applied is included in the Accompanying Information section [A1](#).

ii. Retirement benefit obligations – estimation uncertainty

The assumptions in relation to the cost of providing post-retirement benefits during the year are based on the Group's best estimates and are set after consultation with qualified actuaries. While these assumptions are believed to be appropriate, a change in these assumptions would impact the level of the retirement benefit obligation recorded and the cost to the Group of administering the schemes.

Further detail of the calculation basis and key assumptions used, the resulting movements in obligations and the sensitivity of key assumptions to the obligation is disclosed at note 23.

iii. Revenue recognition – Customers unbilled supply of energy – estimation uncertainty

Revenue from energy supply activities undertaken by the SSE Business Energy and SSE Airtricity businesses includes an estimate of the value of electricity or gas supplied to customers between the date of the last meter reading and the year end. This estimation comprises both billed revenue and unbilled revenue and is calculated based on applying the tariffs and contract rates applicable to customers against aggregated estimated customer consumption, taking account of various factors including tariffs, consumption patterns, customer mix, metering data, operational issues relating to the billings process and externally notified aggregated volumes supplied to customers from national settlements bodies. During the year, the Group's SSE Business Energy segment completed the implementation of a new billing system which included the migration of customer accounts and balances. Due to the timing of the data migration, which occurred in the second half of the financial year for the majority of customers, the level of unbilled sales and hence the level of judgement applied in determining the sales accrual for these customers is higher than in previous years. The Group has recognised a provision against this accrual to reflect that customer billing delays may result in poorer collection performance.

In recent years the impact of government-backed customer support schemes has been material to the judgement applied. However, in the current year the level of judgement required is significantly less material. The accounting policy for customer support schemes and the balances claimed from government is explained at [A1.2](#).

This unbilled estimation is subject to an internal corroboration process which compares calculated unbilled volumes to a theoretical 'perfect billing' benchmark measure of unbilled volumes (in GWh and millions of therms) derived from historical consumption patterns and aggregated metering data used in industry reconciliation processes. Furthermore, unbilled revenue is compared to billings in the period between the balance sheet date and the finalisation of the financial statements which has provided evidence of a catch-up of post implementation billings and hence support to the accrual recognised.

Given the requirement of management to apply judgement particularly in the current year in relation to the impact of the data and process migration referred to above, unbilled revenue is considered a significant estimate made by management in preparing the financial statements. A change in the assumptions underpinning the unbilled calculation would have an impact on the amount of revenue recognised in any given period. The sensitivity associated with this judgement factor is disclosed at note 18.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

FOR THE YEAR ENDED 31 MARCH 2024

4. Accounting judgements and estimation uncertainty continued

4.1. Significant financial judgements and estimation uncertainties continued

iv. Valuation of other receivables – financial judgement and estimation uncertainty

The Group holds a £100m loan note due from Ovo Energy Limited following the disposal of SSE Energy Services on 15 January 2020. The loan is repayable in full by 31 December 2029, carries interest at 13.25% and is presented cumulative of accrued interest payments, discounted at 13.25%. At 31 March 2024, the carrying value (net of expected credit loss provision of £1.6m (2023: £1.5m)) is £170.1m (2023: £149.5m).

The Group has assessed recoverability of the loan note receivable and has recognised a provision for expected credit loss in accordance with the requirements of IFRS 9. The Group's assessment of the recoverability of the loan note is considered a significant financial judgement. The Group has taken appropriate steps to assess all available information in respect of the recoverability of the loan note. Procedures included reviewing recent financial information of Ovo Energy Limited, including the 31 December 2022 statutory financial statements; and discussions with Ovo management. While the carrying value is considered to be appropriate, changes in economic conditions could lead to a change in the expected credit loss incurred by the Group in future periods.

v. Impact of climate change and the transition to net zero – financial judgement and estimation uncertainty

Climate change and the transition to net zero have been considered in the preparation of these financial statements. Where relevant assumptions have been applied that are consistent to a Paris-aligned 1.5°C 2050 net zero pathway. The Group has a clearly articulated Net Zero Acceleration Programme Plus ('NZAP Plus') to lead in the UK's transition to net zero and aligns its investment plans and business activities to that strategy. These plans are supported by the Group's Green Bond framework under which the Group's sixth and seventh green bonds were issued during the year (see note 21). The proceeds of these green bonds were allocated to fund Renewable wind farm and Transmission network projects.

The impact of future climate change regulation could have a material impact on the currently reported amounts of the Group's assets and liabilities. In preparing these financial statements, the following climate change related risks have been considered:

Valuation of property, plant and equipment, and impairment assessment of goodwill

In the medium term, the transition to net zero may result in regulation restricting electricity generation from unabated gas fired power stations. The Group's view is that flexible generation capacity, such as the Group's fleet of CCGT power stations, will be an essential part of the net zero transition in order to provide security of supply to a market increasingly dependent upon renewable sources, which are inherently intermittent. The majority of the Group's GB CCGT fleet is nearing the end of its economic life and it is not currently expected that regulation to require abatement would be introduced before the planned closure of most of those power stations. Of the net book value held at 31 March 2024, only four assets are forecast to continue to operate beyond 2030 being: Great Island; Keadby 2; Marchwood (which is operated by SSE under a lease); and Saltend Power Station within the Triton joint venture. The Group has assessed that the useful economic lives of Peterhead, Keadby and Medway power stations now extend to March 2030, and these changes in end of life assumptions have been reflected in the annual impairment process. The Group's view is that Great Island will continue to be essential to providing security of supply in the Irish electricity market. Keadby 2 commenced commercial operation on 15 March 2023 and has an efficiency of around 63% making it the most efficient plant of its type in the UK and Europe. Work is also underway to explore how to decarbonise Keadby 2 further with the potential to blend hydrogen into the plant. Marchwood is a 50% equity accounted joint venture and is considered one of the most efficient CCGTs in the UK. Saltend was acquired as part of Triton Power 50% equity accounted joint venture and supports the long-term decarbonisation of the UK's power system, and also contributes to security of supply and grid stability. Initial steps are underway at Saltend, targeting abatement by 2027 through blending up to 30% of low-carbon hydrogen. Therefore, the Group considers that other assets operating in the market would be more likely to close before Keadby 2, Marchwood and Saltend and the plants will continue to be required to balance the UK electricity market beyond 2030. As a result, the useful economic lives of these assets have not been shortened when preparing the 31 March 2024 financial statements. The Group assesses the useful economic life of its property, plant and equipment assets annually.

A significant increase in renewable generation capacity in the Group's core markets in the UK and Ireland could potentially result in an oversupply of renewable electricity at a point in the future, which would lead to a consequential decrease in the power price achievable for the Group's wind generation assets. The Group has not assessed that this constitutes an indicator of impairment at 31 March 2024 as the Group's baseline investment case models assume a centrally approved volume of new build in these markets over the life of the existing assets. The Group's policy is to test the goodwill balances associated with its wind generation portfolio for impairment on an annual basis in line with the requirements of IAS 36 'Impairment of Assets'. Through this impairment assessment (see note 15.1), a sensitivity to power price, which may arise in a market with significant new build, was modelled. This scenario indicated that, despite a modelled 10% reduction in power price, there remained significant headroom on the carrying value in the Group's wind generating assets.

Changes to weather patterns resulting from global warming have also been considered as a potential risk to future returns from the Group's wind and hydro assets. Changes to weather patterns could result in calmer, drier weather patterns, which would reduce volumes achievable for the Group's wind and hydro generation assets (although noting that this would likely lead to capacity constraints and hence higher prices). This has not been assessed as an indicator of impairment for operating assets in the UK and Ireland at 31 March 2024, as there is no currently observable evidence to support that scenario directly. The Group has performed a sensitivity to its impairment modelling and has assessed that a 15% reduction in achievable volume would result in significant headroom on the carrying value of the UK and Ireland assets at 31 March 2024 (see note 15.1). The TCFD physical risk scenarios modelled a 4% to 8% change in average mean wind speeds in the longer term across the wind portfolio, consistent with the impairment sensitivity performed.

Valuations of decommissioning provisions

The Group holds decommissioning provisions for its Renewable and Thermal generation assets and has retained a 60% share for the decommissioning of its disposed Gas Production business. As noted above, the Group's view at 31 March 2024 is that climate change regulation will not bring forward the closure dates of its CCGT fleet, many of which are expected to close before 2030. Similarly, it is expected that fundamental changes to weather patterns, or the impact of new wind generation capacity will not bring forward the decommissioning of the Group's wind farm portfolio.

The discounted share of the Gas Production provision is £219.7m (2023: £201.4m). At 31 March 2024, the impact of discounting of this retained provision is £68.3m (2023: £64.5m), which is expected to be incurred across the period to 31 March 2040. If the decommissioning activity was accelerated due to changes in legislation, the costs of unwinding the discounting of the provision would be recognised earlier.

Defined Benefit scheme assets

The Group holds defined benefit pension scheme assets at 31 March 2024 which could be impacted by climate-related risks. The Trustees of the schemes have a long term investment strategy that seeks to reduce investment risk as and when appropriate and takes into consideration the impact of climate-related risk.

Going concern and viability statement

The implications of near term climate-related risks have been considered in the Group's going concern assessment and viability statement assessment.

4.2. Accounting judgements and estimation uncertainties – changes from prior year

On 31 March 2024, the Group's Thermal business unit reviewed the useful economic life of the Peterhead, Keadby and Medway CCGT assets and extended their useful lives to 2030 following the award of capacity mechanism contracts. The change in useful economic life has been applied prospectively and had no impact on the results for the year ended 31 March 2024. The depreciation charge for the year ending 31 March 2025 will be reduced by £16.4m. There were no other changes to accounting judgements and estimation uncertainties during the year.

4.3. Other areas of estimation uncertainty

i. Tax provisioning

In the financial statements to 31 March 2024, the Group has no provision for uncertain tax positions included in current tax liabilities (2023: £nil).

The Group applies IFRIC 23 'Uncertainty over Income Tax Treatments' in respect of uncertain tax positions. Where management makes a judgement that an outflow of funds is probable, and a reliable estimate of the dispute can be made, provision is made for the best estimate of the most likely liability.

In estimating any such liability, the Group applies a risk-based approach, taking into account the specific circumstances of each dispute based on management's interpretation of tax law and supported, where appropriate, by discussion and analysis by external tax advisors. These estimates are inherently judgemental and could change substantially over time as disputes progress and new facts emerge. Provisions are reviewed on an ongoing basis, however, the resolution of tax issues can take a considerable period of time to conclude and it is possible that amounts ultimately paid will be different from the amounts provided.

ii. Decommissioning costs

The calculation of the Group's decommissioning provisions involves the estimation of quantum and timing of cash flows to settle the obligation. The Group engages independent valuation experts to estimate the cost of decommissioning its Renewable, Thermal and Gas Storage assets every three years based on current technology and prices. The last independent assessment for the majority of the Group's Renewable and Thermal generation assets was performed in the year to 31 March 2022. The last formal assessment for Gas Storage assets was performed in the year to 31 March 2023. Retained decommissioning costs in relation to the disposed Gas Production business are periodically agreed with the field operators and reflect the latest expected economic production lives of the fields.

The dates for settlement of future decommissioning costs are uncertain, particularly for the disposed Gas Production business where reassessment of gas and liquids reserves and fluctuations in commodity prices can lengthen or shorten the field life.

Further detail on the assumptions applied, including expected decommissioning dates, and movement in decommissioning costs during the year are disclosed at note 20.

iii. Valuation of SSE Business Energy trade receivables

During the financial year, the Group's SSE Business Energy segment completed the implementation of a new billing system which included the migration of customer accounts and balances. The migration has resulted in delays to billings (as noted in note 4.1(iii) above) and delays to collection activities, meaning that aged debt balances and provisions recognised against these balances are higher than would normally be expected. The Group's processes for recognising bad debt provisions are based on historic collection performance adjusted for expected future improvement or decline against this performance. In the current year, an estimate of expected deterioration in debt collection due to billing and collection delays has been included within the recognised provision. Further details on the Group's credit risk provisions are provided within note A6.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

5. Segmental information

The changes to the Group's segments in the year are explained in note 1.2 and includes the realignment of the activities of the Distributed Energy (now SSE Enterprise) business. Comparative information has been re-presented to reflect the change to these segments. The Group's "Corporate unallocated" segment contains the Group's residual corporate central costs which are not allocated to individual segments, and includes the contribution from the Group's joint venture investment in Neos Networks Limited. Any impact of the acquisition of Enerveo Limited on 22 March 2024 has been recognised within "Corporate unallocated".

The types of products and services from which each reportable segment derives its revenues are:

Business Area	Reported Segments	Description
Continuing operations		
Transmission	SSEN	The economically regulated high voltage transmission of electricity from generating plant to the distribution network in the North of Scotland. Revenue earned from constructing, maintaining and renovating our transmission network is determined in accordance with the regulatory licence, based on an Ofgem approved revenue model and is recognised as charged to National Grid. The revenue earned from other transmission services such as generator plant connections is recognised in line with delivery of that service over the expected contractual period and at the contracted rate. On 25 November 2022 the Group sold a 25.0% non-controlling interest in this business to the Ontario Teachers' Pension Plan.
	Transmission	
Distribution	SSEN	The economically regulated lower voltage distribution of electricity to customer premises in the North of Scotland and the South of England. Revenue earned from delivery of electricity supply to customers is recognised based on the volume of electricity distributed to those customers and the set customer tariff. The revenue earned from other distribution services such as domestic customer connections is recognised in line with delivery of that service over the expected contractual period and at the contracted rate.
	Distribution	
Renewables	SSE	The generation of electricity from renewable sources, such as onshore and offshore windfarms and run of river and pumped storage hydro assets in the UK and Ireland and the development of similar wind assets in Japan and Southern Europe and the development of wind, solar and battery opportunities. Revenue from physical generation of electricity in Great Britain is sold to SSE Energy Markets and in Ireland is sold to SSE Airtricity and is recognised as generated, based on the contracted or spot price at the time of delivery. Revenue from national support schemes (such as Renewable Obligation Certificates or the Capacity Market in Great Britain or REFIT in Ireland) may either be recognised in line with electricity being physically generated or over the contractual period, depending on the underlying performance obligation.
	Renewables	
Thermal	SSE	The generation of electricity from thermal plants including CCGTs and the Group's interests in multifuel assets in the UK and Ireland. Revenue from physical generation of electricity in Great Britain and Ireland is sold to SSE Energy Markets and is recognised as generated, based on the contract or spot price at the time of delivery. Revenue from national support schemes (such as the Capacity Market) and ancillary generation services may either be recognised in line with electricity being physically generated or over the contractual period, depending on the underlying performance obligation.
	Thermal	
Energy Customer Solutions	SSE Business Energy	The supply of electricity and gas to business customers in Great Britain and smart buildings (BEMS) activity. Revenue earned from the supply of energy is recognised in line with the volume delivered to the customer, based on actual and estimated volumes, and reflecting the applicable customer tariff after deductions or discounts.
	SSE Airtricity	The supply of electricity, gas and energy related services to residential and business customers in the Republic of Ireland and Northern Ireland. Revenue earned from the supply of energy is recognised in line with the volume delivered to the customer, based on actual and estimated volumes, and reflecting the applicable customer tariff after deductions or discounts. Revenue earned from energy related services may either be recognised over the expected contractual period or following performance of the service, depending on the underlying performance obligation.
SSE Enterprise	SSE Enterprise	The provision of low carbon energy solutions to customers; behind-the-meter solar and battery solutions, EV charging activities, private electric networks and heat and cooling networks. As noted above, during the year, the front of the meter battery storage and solar asset activity in Great Britain was transferred to SSE Renewables and smart buildings (BEMS) activity was transferred to SSE Business Energy.
SSE Energy Markets	SSE Energy Markets	The provision of a route to market for the Group's Renewable and Thermal generation businesses and commodity procurement for the Group's energy supply businesses in line with the Group's stated hedging policies. Revenue from physical sales of electricity, gas and other commodities produced by SSE is recognised as supplied to either the national settlements body or the customer, based on either the spot price at the time of delivery or trade price where that trade is eligible for "own use" designation. The sale of commodity optimisation trades is presented net in cost of sales alongside purchase commodity optimisation trades.

As referred to in note 3, the internal measure of profit used by the Board is 'adjusted profit before interest and tax' or 'adjusted operating profit' which is arrived at before exceptional items, the impact of financial instruments measured under IFRS 9, share of profits attributable to non-controlling interests, the net interest costs/income associated with defined benefit pension schemes, adjustments to the retained Gas Production decommissioning, the impact of depreciation on fair value uplifts and after the removal of taxation and interest on profits from joint ventures and associates.

Analysis of revenue, operating profit, capital expenditure and earnings before interest, taxation, depreciation and amortisation ('EBITDA') by segment is provided on the following pages. All revenue and profit before taxation arise from operations within the UK and Ireland.

Total SSE Group	10,457.2	12,764.7	23,221.9	12,490.7	21,274.8	33,765.5

(i) Significant inter-segment revenue is derived from the sale of power and stored gas from SSE Renewables, SSE Thermal, Gas Storage and SSE Enterprise to SSE Energy Markets; use of system income received by SSEN Distribution from SSE Business Energy; SSE Business Energy provides internal heat and light power supplies to other Group companies; SSE Energy Markets provides power, gas and other commodities to SSE Business Energy and SSE Airtricity; and Corporate unallocated (SSE Services and related parties) provides corporate and infrastructure services to all segments as well as third parties. All are provided at arm's length.

* The comparative segment revenue has been restated. See note 1.2.

* The comparative disaggregated segment revenue has been restated. See note 1.2.

Included within trade and other receivables (note 18) is £663.7m (2023: £666.1m) of unbilled energy income. Included within trade and other payables (note 19) is £253.6m (2023: £215.4m) of contract related liabilities. Contract related assets reflect the Group's right to consideration in exchange for goods or services that have transferred to the customer, and contract related liabilities reflect the Group's obligation to transfer future goods or services for which the Group has already received consideration. Contract related assets and liabilities principally arose in the SSE Enterprise reporting segment with changes during the periods reflecting ongoing contract progress, offset by cash receipts or customer invoicing.

The Group has not disclosed information related to the transaction price allocated to remaining performance obligations on the basis that the Group's contracts either have an original expected duration of less than one year, or permit the Group to recognise revenue as invoiced.

Revenue by geographical location on continuing operations is as follows:

	2024 £m	2023 £m
UK	8,797.6	10,899.8
Ireland	1,659.6	1,590.9
	10,457.2	12,490.7

Lease asset additions	–	(73.0)	–	(78.5)
Less non-cash items:				
Allowances and certificates	(346.6)	–	(208.4)	–
Assets acquired through acquisitions	–	–	(515.2)	–
Net cash outflow	970.1	1,970.3	933.2	1,479.7

* The comparatives have been restated. See note 1.2.

Capital additions do not include assets acquired in acquisitions, assets acquired under leases or assets constructed that the Group were reimbursed by way of a government grant. During the year construction commenced on a temporary generation plant at the Group's Tarbert site for which the Group received reimbursements totalling £93.4m from government bodies (presented separately on the cash flow statement). Capital additions to intangible assets includes the cash purchase of emissions allowances and certificates (2024: £427.9m; 2023: £596.8m). These purchases are presented in the cash flow statement within operating activities since they relate to the obligation to surrender the allowances and certificates in line with operating volumes of emissions. Other non-cash additions comprise self-generated renewable obligation certificates.

No segmental analysis of assets requires to be disclosed as this information is not presented to the Board.

Note that the Group's 'Net Debt to EBITDA' metric is derived after removing the proportionate EBITDA from the following debt-financed Beatrice and Seagreen joint ventures. This adjustment is £179.6m (2023: £146.9m) resulting in EBITDA on continuing operations for inclusion in the Debt to EBITDA metric of £3,116.0m (2023: £3,235.2m).

For 31 March 2024 the £724.9m (2023: £704.2m) combined depreciation, impairment and amortisation charges included non-exceptional impairments net of reversals totalling £33.0m (2023: £43.9m).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

6. Other operating income and cost

Group operating profit on continuing operations is stated after charging/(crediting) the following items:

	2024 £m	2023 £m
Depreciation of property, plant and equipment on continuing operations ⁽ⁱ⁾ (note 14)	628.6	605.7
Net exceptional gains on acquisitions and disposals (note 7)	(4.6)	(89.1)
Exceptional charges (continuing operations) (note 7)	270.9	230.4
Research costs	12.7	10.8
Lease charges ⁽ⁱⁱ⁾	11.2	11.7
Release of deferred income in relation to capital grants and historic customer contributions	(13.0)	(13.9)
Government grant income ⁽ⁱⁱⁱ⁾	(107.7)	(1,012.6)
Amortisation of other intangible assets	–	0.3

(i) Does not include exceptional impairment charges.

(ii) Represents the expense of leases with a duration of 12 months or less and leases for assets which are deemed "low value" under the principles of IFRS 16. In addition, variable lease payments, which are not included within the measurement of lease liabilities as they do not depend on an index or rate, of £6.2m (2023: £10.4m) were charged in the current year.

(iii) During the year the Group received £107.7m (2023: £1,012.6m) of income from government funded customer support schemes. All amounts received were passed to the Group's energy customers in the UK and Republic of Ireland. Amounts received have been classed as other operating income in line with the Group's accounting policies for government grants.

Auditor's remuneration

	2024 £m	2023 £m
Audit of these financial statements	0.4	0.4
Amounts receivable by the Company's auditor and its associates in respect of:		
Audit of financial statements of subsidiaries of the Company	5.1	3.2
Audit related assurance services	0.3	0.3
Other services fees	0.2	0.1
	5.6	3.6
Total remuneration paid to auditor	6.0	4.0

Audit fees incurred in the current year include scope changes for non-recurring items and overruns of £0.9m (2023: £0.4m) related to the prior year audit. Assurance and Tax service fees incurred in the year were £0.5m (2023: £0.5m). Audit related assurance services include fees incurred in relation to regulatory accounts and returns required by Ofgem and comfort letters in connection with funding and debt issuance. A description of the work of the Audit Committee is set out on [pages 144 to 151](#) and includes an explanation of how auditor objectivity and independence is safeguarded when non-audit services are provided by the auditors.

Profit before tax on discontinued operations	–	35.0

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

7. Exceptional items and certain re-measurements continued

7.1. Exceptional items

Exceptional items in the year ended 31 March 2024

In the year to 31 March 2024, the Group recognised a net exceptional charge of £266.0m arising from its continuing operations. The net exceptional charge is primarily due to an exceptional impairment charge relating to the Group's gas storage assets of £134.1m, an exceptional impairment of £63.2m against the carrying value of the Group's investment in Triton Power Holdings Limited and an exceptional impairment charge of £73.6m against the Group's investment in Neos Networks.

The net exceptional charges/(credits) recognised can be summarised as follows:

	Property, plant and equipment (note 14) £m	Provisions and other charges £m	Investment in joint ventures £m	Other assets £m	Total charges/ (credits) £m
Triton Power 50% joint venture – investment impairment charge (i)	–	–	63.2	–	63.2
Gas Storage – impairment charge (ii)	134.1	–	–	–	134.1
Neos Networks 50% joint venture – impairment charge (iii)	–	–	73.6	–	73.6
Enerveo acquisition (iv)	–	(18.3)	–	13.7	(4.6)
Other credits (v)	–	–	–	(0.3)	(0.3)
Total exceptional items continuing operations	134.1	(18.3)	136.8	13.4	266.0

(i) Triton Power 50% joint venture – investment impairment charge

The Group has recognised an impairment charge of £63.2m, against the carrying value of the Group's investment in Triton Power Holdings Limited, reflecting future market price assumptions. The impairment was recognised in the first half of the year and, due to indicators of impairment existing at 31 March 2024, a formal impairment review was also performed as at that date (see note 15.2). As a result of this assessment, the Group has not recognised any further charges or reversals to the investment carrying value of the Group's investment in Triton Power Holdings Limited.

(ii) Gas Storage – impairment charge

The Group performed a formal impairment review at 31 March 2024 to reassess the carrying value of its Gas Storage operations at Aldbrough and Atwick (see note 15.2). As a result of the assessment, the Group recognised an exceptional impairment charge of £85.7m to the carrying value of the assets at Aldbrough and £48.4m to the carrying value of the assets at Atwick.

(iii) Neos Networks 50% joint venture – impairment charge

At 31 March 2024, the Group has performed a formal impairment assessment on the carrying value of its 50% joint venture investment, including shareholder loan balances, in Neos Networks Limited. The assessment indicated that the recoverable amount of the investment and shareholder loan receivable balances are impaired by £73.6m. See note 15.2 for further details of this impairment.

(iv) Enerveo acquisition

On 22 March 2024, the Group purchased the entire share capital of Enerveo Limited from Aurelius Antelope Limited for cash consideration of £1.0m. Enerveo Limited is a former subsidiary of SSE plc and the reacquisition reduces the Group's potential exposure to risk arising from performance guarantees provided by the Group. At 30 September 2023, the Group had recorded an exceptional charge of £50.5m in relation to its projected exposure in relation to these guarantees as part of its adoption of IFRS 17. On reacquisition this risk has been reduced and the exceptional charge recognised in the 6 months to 30 September 2023 has been reversed. Due to provisions that the Group had previously recognised for amounts due from Enerveo and Aurelius, the completion of the transaction has resulted in an exceptional credit of £4.6m being recognised on acquisition. Further detail on the transaction is included in note 12.1.

(v) Other credits

At 31 March 2024, the Group recognised further exceptional credits of £0.3m relating to the unwind of discounting on deferred consideration recognised on the part disposal of SSE Slough Multifuel Limited in the year ending 31 March 2021.

Taxation

The Group has separately recognised the tax effect of the exceptional items summarised above.

Exceptional items in the year ended 31 March 2023

In the year to 31 March 2023, the Group recognised a net exceptional charge of £0.4m arising from its continuing operations. The net exceptional charge was primarily due to a net impairment of £150.9m in relation to the Group's 50% investment in Triton Power Holdings Limited (see note 7.1.iv below for further analysis of amounts recognised in relation to Triton), offset by an exceptional gain of £89.1m from the sale of land at Fiddler's Ferry, an impairment reversal of £45.7m related to the Group's Gas Storage operations at Aldbrough and an impairment reversal of £17.8m in relation to the Group's Great Island combined cycle gas turbine ('CCGT') plant in Ireland.

In discontinued operations, the Group recognised an exceptional gain of £35.0m relating to a provision release associated with the disposal of its Gas Production assets, which completed on 14 October 2021.

The net exceptional charges/(credits) recognised can be summarised as follows:

	Property, plant and equipment (note 14) £m	Provisions and other charges £m	Investment in joint ventures £m	Cash and cash equivalents £m	Other receivables £m	Total charges/ (credits) £m
Thermal Electricity Generation (i)	(17.8)	–	–	–	–	(17.8)
Gas storage (ii)	(45.7)	–	–	–	–	(45.7)
Fiddler's Ferry (iii)	24.1	(53.2)	–	(60.0)	–	(89.1)
Triton Power 50% joint venture – investment acquisition and impairment (iv)	–	–	150.9	–	–	150.9
Neos Networks 50% joint venture – investment impairment charge (v)	–	–	5.9	–	–	5.9
Other credits (vi)	–	(1.5)	–	(2.1)	(0.2)	(3.8)
Total exceptional items continuing operations	(39.4)	(54.7)	156.8	(62.1)	(0.2)	0.4
Gas Production (vii)	–	(35.0)	–	–	–	(35.0)
Total exceptional items discontinued operations	–	(35.0)	–	–	–	(35.0)
Total exceptional items	(39.4)	(89.7)	156.8	(62.1)	(0.2)	(34.6)

(i) Thermal Electricity Generation – impairment reversal

At 31 March 2023, the Group carried out a formal impairment review to reassess the carrying value of its GB CCGT power stations and the Group's Great Island CCGT plant in Ireland. As a result of the review, the Group recognised an exceptional impairment reversal of £17.8m to the carrying value of the Group's Great Island CCGT plant.

(ii) Gas Storage – impairment reversal

At 30 September 2022, the Group recognised an impairment reversal of £201.1m on its Aldbrough Gas Storage facility due to future market price assumptions observable at that time. The Group also performed a formal impairment review at 31 March 2023 to reassess the carrying value of its Gas Storage operations at Atwick and Aldbrough. As a result of the assessment, the Group recognised an exceptional impairment of £155.4m to the carrying value of the assets at Aldbrough, resulting in a net impairment reversal for the year of £45.7m. The impairment previously recognised in relation to Atwick was fully reversed in the year ended 31 March 2022, and no impairment was required for the financial year ended 31 March 2023.

(iii) Fiddler's Ferry – land sale

On 30 June 2022, the Fiddler's Ferry site was sold to Peel NRE Developments Limited for cash consideration of £60.0m. The Group carried a decommissioning provision for the site of £53.2m and a residual asset of £24.1m, both of which were disposed of as part of the sale. As a result, the Group recognised an exceptional gain of £89.1m on disposal.

(iv) Triton Power 50% joint venture – acquisition and impairment

On 1 September 2022, the Group acquired 50% of the share capital of Triton Power Holdings Limited from Energy Capital Partners for headline consideration of £341.0m, shared equally with co-venturers Equinor (see note 12). The purchase price was agreed based on prices prevalent in the market during the summer, prior to completion of the transaction on 1 September 2022. The Group assessed that, due to movements in near term observable power prices between the transaction agreement date and the completion date, the fair value of the acquisition was £140.7m greater than the acquisition price. This bargain purchase was recognised as an exceptional gain in the Group's half year results to 30 September 2022. During the second half of the year ended 31 March 2023, the Group realised a significant proportion of the acquired fair value of the business through trading operations of the joint venture. As a result, the future recoverable value of the investment was lower at 31 March 2023 than at 1 September 2022 and the Group therefore recognised an impairment charge at 31 March 2023 of £291.6m (see note 15.2). A summary of exceptional items recognised in relation to Triton in the financial year to 31 March 2023 is set out below:

	Financial statement line item charge/(credit) is included within	Exceptional items and certain re-measurements £m
Recognition of bargain purchase	Joint venture and associates share of profit	(140.7)
Impairment of investment	Operating costs	291.6
Total exceptional items		150.9
Mark-to-market movement on operating derivatives	Joint venture and associates share of movement on derivatives	(213.9)
Share of tax on mark-to-market movement on operating derivatives	Joint venture and associates share of tax	41.9
Total certain re-measurements		(172.0)
Total exceptional items and certain re-measurements		(21.1)

(v) Neos Networks 50% joint venture – investment impairment and adjustments to consideration

At 31 March 2023, the Group assessed that the recoverable amount of its investment in Neos Networks was impaired by £37.7m, of which £5.9m was treated as exceptional. £5.9m of the impairment related to the fair value gain previously recognised on acquisition of the joint venture investment in March 2019, which was treated as an exceptional item. This reversal was recognised separately within exceptional items for consistent presentation. The balance of the impairment charge, being £31.8m, was recognised as part of adjusted operating profit.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

7. Exceptional items and certain re-measurements continued

7.1. Exceptional items continued

vi. Other credits

At 31 March 2023, the Group recognised further exceptional credits of £3.8m relating to reversal of previously recognised exceptional charges or judgements. These included i) reassessment of separation cost provisions associated primarily with the disposals of SSE Energy Services and SGN (credit of £9.7m) ii) credit of £0.2m in relation to the unwind of discounting on deferred consideration recognised on the part disposal of SSE Slough Multifuel Limited in the year ending 31 March 2021, iii) reassessment of impairments associated with Heat Networks assets credit of £0.4m, partially offset by iv) £6.5m charge recognised in relation to provisions in connection with the sale of the Contracting and Rail business in June 2021.

Exceptional items within discontinued operations in the year ended 31 March 2023

vii. Gas Production – gain on disposal

On 4 November 2022, RockRose Energy Limited received HMRC clearance in respect of tax treatment in relation to the Group's disposal of its Gas Production business to Viaro Energy (through its subsidiary RockRose Energy Limited), which completed on 14 October 2021. The Group had indemnified RockRose Energy Limited in relation to certain tax liabilities that it might suffer as a result of the transaction, and this formed part of the provision which was recognised on the disposal of the Gas Production business. The HMRC clearance indicated that no such tax liabilities arise for RockRose Energy Limited and as a result the Group released the £35.0m provision relating to the indemnity as an adjustment to the loss on disposal recognised. The adjustment was recognised in discontinued operations in the year ended 31 March 2023.

Exceptional items in the year ended 31 March 2022

In the year to 31 March 2022, the Group recognised a net exceptional credit of £305.0m arising from its continuing operations. The net exceptional credit was primarily due to impairment reversals of £331.6m in relation to the Group's GB CCGT power stations and the Group's Great Island CCGT plant in Ireland and impairment reversals of £97.3m related to the Group's Gas Storage operations at Atwick and Aldbrough. These credits were offset by an impairment loss of £106.9m recognised in relation to the Group's investment in Neos Networks, a further £18.9m loss was recognised on completion of the disposal of SSE Contracting on 30 June 2021 and £6.2m consideration adjustment associated with the disposal of the Group's 50% stake in Neos Networks, which completed in the year ended 31 March 2019.

In discontinued operations, the Group recognised an exceptional gain on the disposal of the Group's 33.3% investment in SGN of £576.5m, offset by an exceptional charge of £120.8m associated with the disposal of its Gas Production assets, which completed on 14 October 2021.

The net exceptional charges/(credits) recognised can be summarised as follows:

	Property, plant and equipment (note 14) £m	Held for sale £m	Provisions and other charges £m	Investment in joint ventures £m	Other receivables £m	Total charges/ (credits) £m
Thermal Electricity Generation	(331.6)	–	–	–	–	(331.6)
Gas storage	(97.3)	–	–	–	–	(97.3)
SSE Contracting	–	–	18.9	–	–	18.9
Neos Networks	–	–	6.2	106.9	–	113.1
Other credits	(0.6)	–	–	–	(7.5)	(8.1)
Total exceptional items continuing operations	(429.5)	–	25.1	106.9	(7.5)	(305.0)
SGN disposal gain	–	–	–	–	(576.5)	(576.5)
Gas Production	–	120.8	–	–	–	120.8
Total exceptional items discontinued operations	–	120.8	–	–	(576.5)	(455.7)
Total exceptional items	(429.5)	120.8	25.1	106.9	(584.0)	(760.7)

7.2. Certain re-measurements

The Group, through its SSE Energy Markets business, enters into forward commodity purchase (and sales) contracts to meet the future demand requirements of its SSE Business Energy and SSE Airtricity supply businesses, to optimise the value of its SSE Renewables and SSE Thermal power generation assets or to conduct other trading subject to the value at risk limits set out by the Energy Markets Risk Committee. Certain of these contracts (predominantly electricity, gas and other commodity purchase contracts) are determined to be derivative financial instruments under IFRS 9 "Financial Instruments" and as such are required to be recorded at their fair value. Conversely, commodity contracts that are not financial instruments under IFRS 9 (predominantly electricity sales contracts) are accounted for as 'own use' contracts and are not recorded at their fair value. Inventory purchased to utilise excess capacity ahead of an optimised sale in the market by the Gas Storage business is held as trading inventory at fair value with changes in value recognised within 'certain re-measurements'. In addition, the mark-to-market valuation movements on the Group's contracts for difference contracts entered into by SSE Renewables that are not designated as government grants, and which are measured as Level 3 fair value financial instruments are also included within 'certain re-measurements'.

Changes in the fair value of those commodity contracts designated as financial instruments and trading inventory are therefore reflected in the income statement. The Group shows the change in the fair value of these forward contracts and trading inventory separately as 'certain re-measurements', as the Group does not believe this mark-to-market movement is relevant to the underlying performance of its businesses.

At 31 March 2024, changes in global commodity markets and in SSE's contractual positions have resulted in a positive net mark-to-market remeasurement on commodity contracts designated as financial instruments, contracts for difference contracts and trading inventory of £461.3m (gain) (2023: £2,717.2m (loss)). It should be noted that the net IFRS 9 position on operating derivatives at 31 March 2024 is an asset of £51.4m (2023: £386.9m liability).

The mark-to-market gain in the year has resulted in a deferred tax charge of £115.0m (2023: £499.6m credit), which has been reported separately as part of certain re-measurements. In addition, the Group has recognised gains of £6.1m (2023: £201.9m gain) on the remeasurement of certain interest rate and foreign exchange contracts through the income statement, gains on the remeasurement of cash flow hedge accounted contracts of £6.5m (2023: £43.3m gain) in other comprehensive income and a loss on the equity share of the remeasurement of cash flow hedge accounted contracts in joint ventures of £40.9m (2023: £342.4m gain).

The re-measurements arising from IFRS 9 and the associated deferred tax are disclosed separately to aid understanding of the underlying performance of the Group.

8. Directors and employees

8.1. Staff costs

	2024 £m	2023 £m
Staff costs:		
Wages and salaries	722.5	587.6
Social security costs	84.8	69.6

8. Directors and employees continued

8.3. Remuneration of key management personnel

The remuneration of the key management personnel of the Group (excluding amounts equivalent to pension value increases as set out in the Remuneration Report), is set out below in aggregate.

	2024			2023		
	Executive committee members £m	Executive directors £m	Total £m	Executive committee members £m	Executive directors £m	Total £m
Salaries and short term employee benefits	4.7	4.7	9.4	4.0	5.2	9.2
Social security costs	1.0	0.9	1.9	0.9	1.0	1.9
Post-employment benefits	1.0	0.2	1.2	0.7	0.7	1.4
Share based benefits	1.8	5.9	7.7	1.7	4.4	6.1
	8.5	11.7	20.2	7.3	11.3	18.6

Key management personnel are responsible for planning, directing and controlling the operations of the Group and are designated Persons Discharging Management Responsibilities ('PDMRs') in line with the market abuse regulation definition. The Group has three (2023: three) Executive directors. Executive committee members included in the table above at 31 March 2024 are the Managing Director of SSEN Distribution; the Managing Director of SSEN Transmission; the Managing Director of SSE Renewables; the Managing Director of Thermal; the Director of Corporate Affairs and Strategy; the Director of Human Resources and the Group's General Counsel.

Further information about the remuneration of individual directors is provided in the audited part of the Remuneration Report.

Information regarding transactions with post-retirement benefit plans is included in note 23.

Non-executive directors were paid fees of £1.3m during the current year (2023: £1.3m).

9. Finance income and costs

	2024			2023		
	Before exceptional items and certain re-measurements £m	Exceptional items and certain re-measurements £m	Total £m	Before exceptional items and certain re-measurements £m	Exceptional items and certain re-measurements £m	Total £m
Recognised in income statement

The Group has separately recognised the tax effect of the exceptional items and certain re-measurements summarised above.

SSE continues to be accredited with the Fair Tax Mark. As a consequence, these financial statements include a number of areas of enhanced disclosure which have been provided in order to develop stakeholder understanding of the tax the Group pays and the reported total taxation charge along with additional commentary on the main reconciling items.

These can be seen at section [A2](#).

The majority of the Group's profits are earned in the UK, with the standard rate of UK corporation tax being 25% for the year to 31 March 2024 (2023: 19%). Profits earned by the Group in the Republic of Ireland are taxable at either 12.5% or 25%, depending upon the nature of the income. While the Group has activities in other jurisdictions outside of the UK and Republic of Ireland, tax paid on those development activities is currently immaterial.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

10. Taxation continued

10.1. Analysis of charge recognised in the income statement continued

Change in UK corporation tax rates

There are no announced or enacted changes in corporation tax rates in the year ended 31 March 2024.

Finance Bill 2023 introduced legislation, initially as a temporary measure but then being made permanent in the Autumn Statement, to allow 'Full Expensing' of 100% General Pool plant and machinery, alongside 50% for Special Rate Pool plant and machinery. These changes significantly increase the deductions for Capital Allowances on capital expenditure incurred from 1 April 2023.

Finance Act (No.2) 2023 also introduced legislation in respect of Multinational Top-up Tax in line with OECD BEPS pillar 2 principles. The Group has applied the exemption from recognising and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes as required by the amendments to IAS 12 – International Tax Reform—Pillar Two Model Rules, which issued in May 2023. The legislation will come into force for the year ended 31 March 2025. Similar draft legislation has been introduced in the Republic of Ireland and other EU jurisdictions. The Group had undertaken modelling and does not expect a material impact to arise as tax rates in the countries in which the Group operates are expected to exceed 15%.

The 'adjusted current tax charge' and the 'adjusted effective rate of tax', which are presented in order to best represent underlying performance by making similar adjustments to the 'adjusted profit before tax' measure, are arrived at after the following adjustments:

	2024 £m	2024 %	2023 £m	2023 %
Continuing operations				
Group tax charge/(credit) and effective rate	610.7	25.6	(110.0)	12.7
Add: reported deferred tax (charge)/credit and effective rate	(274.9)	(11.5)	364.7	(42.0)
Reported current tax charge and effective rate	335.8	14.1	254.7	(29.3)
Effect of adjusting items		1.3		41.0
Reported current tax charge and effective rate on adjusted basis add:	335.8	15.4	254.7	11.7
Share of current tax from joint ventures and associates less:	38.5	1.8	89.6	4.1
Current tax credit on exceptional items	4.7	0.2	15.6	0.7
Share of current tax attributable to non-controlling interests	(8.0)	(0.3)	(1.1)	(0.1)
Adjusted current tax charge and effective rate <small>APM</small>	371.0	17.1	358.8	16.4

Tax (credit)/charge recognised in other comprehensive income/(loss):

	2024 £m	2023 £m
Relating to:		
Pension scheme actuarial movements	(38.8)	(19.8)
Cash flow and net investment hedge movements	0.3	8.1
	(38.5)	(11.7)

All tax recognised through other comprehensive income is deferred tax.

See further Taxation disclosures at [A2](#) 

10.2. Current tax assets and liabilities

	2024 £m	2023 £m
Corporation tax assets	(25.8)	(10.8)

Uncertain tax positions

The Group invests heavily in infrastructure, on which significant amounts of capital allowances are potentially available, including through the 'full expensing' regime. The extent to which capital allowances are available on any single asset is, however, very much dependent upon the fact pattern for the asset involved, and there will often be an element of uncertainty as to how capital allowances legislation applies in those circumstances. Therefore, reaching agreement with tax authorities as to the amount of capital allowances available can take a number of years and sometimes can only be resolved through a formal legal process.

The calculation of the Group's total tax charge therefore necessarily involves a degree of estimation and judgement in relation to certain items for which the tax treatment cannot be finally determined until resolution has been reached with the tax authorities or, if required, through a formal legal process. At 31 March 2024, the Group has not recognised provisions in respect of uncertain tax positions (2023: £nil).

On 23 March 2023, the Group's case concerning the availability of capital allowances on Glendoe Hydro Electric Station was heard at the Supreme Court. On 17 May 2023, the Supreme Court released its decision, which rejected HMRC's appeal in full. The matter is now concluded and is not subject to further appeal. Accordingly, the Group's provision was released as an adjusting post balance sheet event in the year ended 31 March 2023.

10.3. Deferred taxation

The following are the deferred tax liabilities and assets recognised by the Group and movements thereon during the current and prior reporting periods:

	Accelerated capital allowances £m	Fair value gains/(losses) on derivatives £m	Retirement benefit obligations £m	Decommissioning liabilities £m	Other £m	Total £m
At 31 March 2022	1,141.6	378.5	146.2	–	(22.2)	1,644.1
Charge/(credit) to income statement	112.0	(476.7)	8.9	–	(8.9)	(364.7)
Charge/(credit) to other comprehensive income/(loss)	–	8.1	(19.8)	–	–	(11.7)
Charge to equity	–	–	–	–	2.0	2.0
Recognised on acquisition (note 12)	(0.1)	–	–	–	27.1	27.0
Exchange adjustment	1.6	–	–	–	0.8	2.4
At 31 March 2023	1,255.1	(90.1)	135.3	–	(1.2)	1,299.1
Charge/(credit) to income statement	145.2	123.3	8.9	–	(2.5)	274.9
Decommissioning asset and liability presentation under IAS 12	79.5	–	–	(79.5)	–	–
Charge/(credit) to other comprehensive (loss)/income	–	0.3	(38.8)	–	–	(38.5)
Charge to equity	–	–	–	–	1.8	1.8
Exchange adjustment	(0.5)	–	–	–	–	(0.5)
At 31 March 2024	1,479.3	33.5	105.4	(79.5)	(1.9)	1,536.8

The Group has adopted the amendment to IAS 12 in respect of deferred tax relating to assets and liabilities arising from a single transaction. In line with the amendment the Group now recognises deferred tax assets and liabilities in respect of decommissioning responsibilities separately. This has resulted in an increase to both deferred tax assets and deferred tax liabilities of £50.1m (2023: £45.5m) and a reclassification of £79.5m of gross deferred tax assets. As a result of the change deferred tax liabilities relating to decommissioning assets are now presented in "Accelerated capital allowances" with deferred tax assets relating to decommissioning liabilities being presented in "Decommissioning liabilities".

Certain deferred tax assets and liabilities have been offset, including the asset balances analysed in the tables above. The following is an analysis of the deferred tax balances (after offset) for financial reporting purposes:

	2024 £m	2023 £m (restated*)
Deferred tax liabilities	1,692.3	1,530.6
Deferred tax assets	(155.5)	(231.5)
Net deferred tax liabilities	1,536.8	1,299.1

In total there are £9.3m (2023: £6.1m) of unrecognised deferred tax assets. The Group has not recognised a deferred tax asset of £5.6m (2023: £5.6m) on trading losses of £44.5m (2023: £44.8m) in the Republic of Ireland. The Group has not recognised deferred tax assets of £3.5m (2023: £0.5m) in respect of losses of £14.4m (2023: £2.3m) in Spain, France, Italy and Greece. These assets have not been recognised as the Group is uncertain that there will be sufficient future profits against which to utilise the assets. There is no time limit for expiry of the losses or allowances to which they relate.

No deferred tax is recognised on the unremitted earnings of overseas subsidiaries, associates and joint ventures. As the earnings are continually reinvested by the Group, no tax is expected to be payable on them in the foreseeable future. Total unremitted earnings at 31 March 2024 were £827.8m (2023: £468.8m).

* The comparative has been restated. See note 2.1.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

11. Dividends and earnings per share

11.1. Ordinary dividends

	2024 Total £m	Settled via scrip £m	Pence per ordinary share	2023 Total £m	Settled via scrip £m	Pence per ordinary share
Interim – year ended 31 March 2024	218.3	8.8	20.0	–	–	–
Final – year ended 31 March 2023	738.1	29.8	67.7	–	–	–
Interim – year ended 31 March 2023	–	–	–	313.2	159.0	29.0
Final – year ended 31 March 2022	–	–	–	642.6	322.5	60.2
	956.4	38.6		955.8	481.5	

The final dividend of 67.7p per ordinary share declared in respect of the financial year ended 31 March 2023 (2022: 60.2p) was approved at the Annual General Meeting on 20 July 2023 and was paid to shareholders on 21 September 2023. Shareholders were able to elect to receive ordinary shares credited as fully paid instead of the cash dividend under the terms of the Company's scrip dividend scheme.

For dividends paid in relation to the financial year ended 31 March 2022 and in relation to the subsequent years to 31 March 2026, the Group's approved policy is to repurchase shares to reduce the scrip's dilutive effects, if the scrip take-up exceeds 25% of the full year dividend in any given year. The overall scrip dividend take-up for the financial year ended 31 March 2023 was 18.0%, and SSE has therefore not initiated a share buy-back in the current year. For the financial year ended 31 March 2022 the overall scrip take-up was 38.3% and therefore under the share buyback programme 6.9m of shares were repurchased and cancelled during the year ended 31 March 2023 for total consideration of £107.6m (including stamp duty and commission).

An interim dividend of 20.0p per ordinary share (2023: 29.0p) was declared and paid on 8 March 2024 to those shareholders on the SSE plc share register on 12 January 2024. Shareholders were able to elect to receive ordinary shares credited as fully paid instead of the interim cash dividend under the terms of the Company's scrip dividend scheme.

The proposed final dividend of 40.0p per ordinary share based on the number of issued ordinary shares at 31 March 2024 is subject to approval by shareholders at the Annual General Meeting and has not been included as a liability in these financial statements. Based on shares in issue at 31 March 2024, this would equate to a final dividend of £438.5m.

11.2. Basic and adjusted earnings/(losses) per share

The calculation of basic earnings/(losses) per ordinary share at 31 March 2024 is based on the net profit/(loss) attributable to ordinary shareholders and a weighted average number of ordinary shares outstanding during the year ended 31 March 2024.

Adjusted earnings/(losses) per share has been calculated by excluding the charge for deferred tax, interest on net pension liabilities under IAS 19, retained Gas Production decommissioning costs, the depreciation charged on fair value uplifts, the share or profit attributable to non-controlling interests and the impact of exceptional items and certain re-measurements (note 7).

	2024	2024	2023	2023
	Earnings £m	Earnings per share pence	(Losses)/ earnings £m	(Losses)/ earnings per share pence
Continuing operations				
Earnings/(losses) attributable to ordinary shareholders	1,710.5	156.7	(123.0)	(11.4)
Less: earnings attributable to discontinued operations	–	–	(35.0)	(3.3)
Basic earnings/(losses) on continuing operations used to calculate adjusted EPS	1,710.5	156.7	(158.0)	(14.7)
Exceptional items and certain re-measurements (note 7)	(155.8)	(14.3)	1,886.4	175.4
Basic excluding exceptional items and certain re-measurements	1,554.7	142.4	1,728.4	160.7
Adjusted for:				
Decommissioning Gas Production	9.9	0.9	(50.5)	(4.7)
Depreciation charge on fair value uplifts	19.0	1.7	28.8	2.7
Interest on net pension scheme assets/(liabilities) (note 9)	(26.2)	(2.4)	(16.2)	(1.5)
Deferred tax	178.5	16.3	85.2	7.9
Deferred tax from share of joint ventures and associates	20.3	1.9	14.4	1.3
Deferred tax on non-controlling interest	(25.6)	(2.3)	(4.1)	(0.4)
Adjusted ^{APM}	1,730.6	158.5	1,786.0	166.0
Basic	1,710.5	156.7	(158.0)	(14.7)
Dilutive effect of outstanding share options	–	(0.2)	–	–
Diluted	1,710.5	156.5	(158.0)	(14.7)

Reported earnings/(losses) per share

	2024	2024	2023	2023
	Earnings £m	Earnings per share pence	(Losses)/ earnings £m	(Losses)/ earnings per share pence
Basic				
Earnings/(losses) per share on continuing operations	1,710.5	156.7	(158.0)	(14.7)
Earnings per share on discontinued operations	–	–	35.0	3.3
Earnings/(losses) per share attributable to ordinary shareholders	1,710.5	156.7	(123.0)	(11.4)
Diluted earnings/(losses) per share on continuing operations	1,710.5	156.5	(158.0)	(14.7)
Diluted earnings per share on discontinued operations	–	–	35.0	3.3
Diluted earnings/(losses) per share attributable to ordinary shareholders	1,710.5	156.5	(123.0)	(11.4)

The weighted average number of shares used in each calculation is as follows:

	31 March 2024 Number of shares (millions)	31 March 2023 Number of shares (millions)
For basic and adjusted earnings per share	1,091.8	1,075.6
Effect of exercise of share options	1.5	1.7
For diluted earnings per share	1,093.3	1,077.3

11.3. Dividend cover

The Group's adjusted dividend cover metric is calculated by comparing adjusted earnings per share on continuing operations to the projected dividend per share payable to ordinary shareholders.

	2024	2024	2024	2023	2023	2023
	Earnings per share (pence)	Dividend per share (pence)	Dividend cover (times)	(Losses)/ earnings per share (pence)	Dividend per share (pence)	Dividend cover (times)
Reported earnings/(losses) per share (continuing operations)	156.7	60.0	2.61	(14.7)	96.7	(0.15)
Adjusted earnings per share (continuing operations) ^{APM}	158.5	60.0	2.64	166.0	96.7	1.72

12. Acquisitions and disposals**12.1. Acquisitions****Current year acquisitions****Enerveo acquisition**

On 22 March 2024, the Group completed the acquisition of Enerveo Limited ('Enerveo') from Aurelius Antelope Limited ('Aurelius') for cash consideration of £1.0m. Enerveo (formerly named SSE Contracting Limited) is a former subsidiary of the Group that was disposed to Aurelius on 30 June 2021. Under the terms of the sale agreement in 2021, SSE retained performance guarantees over certain contracts delivered by Enerveo. In the six months ended 30 September 2023, the Group recognised an exceptional charge of £50.5m in relation to its estimated settlement costs in relation to these guarantees in accordance with IFRS 9, which included cash advances to Enerveo of £12.3m. In the previous financial year the Group had also recognised provisions for amounts due from Enerveo and Aurelius totalling £12.2m.

On completion of the transaction on 22 March 2024, the Group reversed the exceptional charge of £50.5m recognised in the first half of the financial year. Due to the consolidation of liabilities retained by Enerveo which SSE had made provision against, the reacquisition of Enerveo resulted in a gain of £4.6m, which has been recognised as an exceptional item in the year. Following completion, SSE has restructured and settled external liabilities totalling £15.2m and settled certain balances of £30.9m due to SSE companies which are included in the acquired balances below. At 31 March 2024, the goodwill balance of £5.6m implied by the transaction was written off. This write-off has been included within the total gain of £4.6m referred above. SSE is currently conducting a review to develop and then implement a longer-term strategy for each part of the business. The following table summarises the assets and liabilities acquired in the transaction.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

12. Acquisitions and disposals continued

12.1. Acquisitions continued

	Fair value at 22 March 2024 £m
Assets acquired and liabilities assumed	
Property, plant and equipment	11.7
Intangible assets	2.5
Inventories	3.9
Trade and other receivables	40.1
Prepayments and accrued income	55.1
Cash	13.2
Trade and other payables	(91.0)
Deferred income	(20.0)
Lease liabilities	(12.8)
Provisions	(7.3)
Total net liabilities acquired	(4.6)
Goodwill	5.6
Cash consideration	1.0

Prior year acquisitions

European onshore renewables development platform

On 1 September 2022 the Group completed the 100% acquisition of a European onshore renewable energy development platform from Siemens Gamesa Renewable Energy ("SGRE") for cash consideration of £519.5m. The SGRE portfolio is mainly located in Spain with the remainder across France, Italy and Greece.

The intangible development assets acquired were late-stage windfarm development costs. The goodwill recognised represents early-stage intangible development costs that do not qualify for separate recognition as set out in the table below.

	Fair value at 1 September 2022 £m
Assets acquired and liabilities assumed	
Intangible development assets	104.4
Inventories	3.0
Trade and other receivables	20.3
Cash	11.5
Trade and other payables	(3.5)
Deferred tax liability (note 10)	(27.0)
Total net assets acquired	108.7
Goodwill	410.8
Cash consideration	519.5

Triton Power – 50% joint venture acquisition

On 1 September 2022, the Group announced that SSE Thermal and Equinor had completed the acquisition of Triton Power Holdings Limited from Energy Capital Partners for headline consideration of £341.0m shared equally. The headline consideration included £96.0m of loans which were settled on completion of the transaction and replaced with shareholder loans of £48.0m each from SSE and Equinor. The Group's share of the cash consideration paid for the equity investment was therefore £123.2m after completion adjustments. Triton Power operates the 1.2GW Saltend Power Station in the Humber along with two smaller plants, Indian Queens Power Station, a 140MW OCGT in Cornwall, and Deeside Power Station, a decommissioned CCGT in north Wales. See note 7 for details of the exceptional gain recognised in the prior year.

Other asset acquisitions

During the year ended 31 March 2023, the Group made other smaller asset acquisitions (of special purpose vehicles as opposed to businesses) for cash consideration of £19.8m and deferred consideration of £34.9m. The total cash consideration for business combinations of £642.7m is included in the Group's Adjusted investment, capital and acquisition metric.

12.2. Disposals

i. Significant disposals

Current year disposals

There have been no significant disposals in the current year.

Prior year disposals

During the year ended 31 March 2023 the Group recognised a gain of £868.3m within equity from the sale of a 25% non-controlling equity stake in its SSEN Transmission business (being the company Scottish Hydro Electric Transmission plc) and an exceptional income statement gain of £89.1m from the disposal of the Fiddler's Ferry site.

25% non-controlling equity stake in Scottish Hydro Electric Transmission plc: On 30 November 2022, the Group completed the disposal of a 25% non-controlling equity stake in Scottish Hydro Electric Transmission plc ('SHET') to Ontario Teachers' Pension Plan ('OTPP') for cash consideration of £1,465.0m, less transactions costs of £16.9m, at which time the consolidated carrying value of SHET's net assets was £2,319.3m. As the transaction did not result in a loss of control, the Group recognised a gain of £868.3m within equity attributable to owners of the parent company. The Group considered the rights and obligations and operating protocols arising from the disposal and has determined that the non-controlling interest in SHET has the characteristics of equity and has classified the non-controlling interest as such.

	30 November 2022 £m
Carrying value of non-controlling interests disposed	(579.8)
Cash consideration paid by non-controlling interest holder	1,465.0
Transaction costs	(16.9)
Excess of consideration received recognised in equity	868.3

Fiddler's Ferry land sale: On 30 June 2022, the Fiddler's Ferry site was sold to Peel NRE Developments Limited for cash proceeds of £60m. The Group released a decommissioning provision related to the site, which resulted in an exceptional gain on disposal of £89.1m.

ii. Prior year disposal reconciliation

The following table summarises disposals of subsidiaries, businesses and assets during the prior financial year, including other assets and investments disposed of as part of the normal course of business but before recognition of impairment charges, which are noted in the relevant respective notes to the financial statements.

	2023 £m
Net assets disposed:	
Property, plant and equipment	24.1
Provisions	(88.2)
Net assets	(64.1)
Proceeds of disposal:	
Consideration	60.0
Net proceeds	60.0
Gain on disposal	124.1
Presentation:	
Continuing operations	
Income statement exceptional gain	89.1
	89.1
Discontinuing operations	
Income statement exceptional credit	35.0
SSE Group	124.1
	2023 £m
Net proceeds of disposal	60.0
Net cash proceeds	60.0
Plus net cash proceeds from sale of non-controlling interest in SHET	1,448.1
Net cash proceeds	1,508.1

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

At 31 March 2024	(192.9)	(227.5)	(171.4)	(115.9)	(687.5)	(1,394.2)

Carrying amount:

At 31 March 2024	937.7	754.7	819.2	3.5	564.2	3,079.3
At 31 March 2023	957.6	454.9	524.1	1.0	477.6	2,415.2
At 1 April 2022	512.0	459.3	201.1	1.3	413.4	1,587.1

(i) The non-exceptional impairments in both years relate to assets where future development became uncertain or untenable in the year. The impairment of these items does not meet the Group's definition of an exceptional item, therefore they are included in the adjusted and reported results of the Group.

Intangible assets have been analysed as current and non-current as follows:

	2024 £m	2023 £m
Current	754.7	454.9
Non-current	2,324.6	1,960.3
	3,079.3	2,415.2

i. Goodwill

At inception, goodwill arising from business combinations is allocated to cash-generating units (CGUs) or groups of CGUs for impairment testing purposes. Certain goodwill valuations have changed in the current year following retranslation. Commentary on the impairment testing of the related CGUs, with the exception of two historic balances totalling £8.2m, is included in note 15.

A summary of the goodwill allocated to CGUs and the Group's operating segments is presented below:

CGU group	Operating Segment	2024 £m	2023 £m
Great Britain and Ireland windfarms	SSE Renewables	288.8	292.3
SSE Pacifico ¹	SSE Renewables	191.5	196.0
SSE Southern Europe ²	SSE Renewables	416.8	428.7
Energy Solutions ³	SSE Business Energy & SSE Enterprise	32.4	32.4
Ireland Supply ⁴	SSE Airtricity	8.2	8.2
		937.7	957.6

1 Relates to the acquisition on 29 October 2021 of an 80% equity interest in an offshore wind development platform from Pacifico Energy.

2 SSE Southern Europe relates to the acquisition on 1 September 2022 of the SGRE renewable platform in Spain, France, Greece and Italy (see note 12.1). The Group has assessed that the four CGUs support the carrying value of the goodwill.

3 Energy Solutions includes goodwill balances arising from the historic acquisitions of The Energy Solutions Group Limited (TESGL) of £31.7m (2023: £31.7m) and a further £0.7m (2023: £0.7m) in relation to the acquisition of SSE Airtricity Energy Services (NI) Limited (formerly Fusion Heating Limited). The amount of goodwill associated with the historic businesses is not significant in context of the aggregate carrying value of the business units or the aggregate value of goodwill held by the Group.

4 The value associated with the Ireland supply goodwill represents the difference between the fair value attributed to the Northern Ireland based Phoenix Energy business acquired in 2012 and the book value of those assets. No impairment has been recognised during the year on this balance.

ii. Allowances and certificates

Allowances and Certificates consist of purchased carbon emissions allowances and generated or purchased renewable obligations certificates (ROCs). These allowances and certificates will be utilised in settlement of environmental obligations incurred by the Group's SSE Thermal and SSE Business Energy supply business and are therefore distinct from allowances and certificates held in excess of the Group's environmental obligations which are recorded within inventories.

iii. Development assets

Development costs primarily relate to the design, construction and testing of Thermal, Renewable and Solar and Battery assets, which the Group believes will generate probable future economic benefits. Costs capitalised as development intangibles include options over land rights, planning application costs, environmental impact studies and other costs incurred in bringing windfarms and other development projects to the consented stage. These may be costs incurred directly or at a cost as part of the fair value attribution on acquisition.

At the point the development reaches the consent stage and is approved for construction, the carrying value is transferred to property, plant and equipment (note 14). At the point a project is no longer expected to reach the consented stage, the carrying amount of the project is impaired.

iv. Other intangible assets

Included within other intangible assets are brands, customer lists and contracts.

No exceptional or non-exceptional impairment charges have been recognised in the year (2023: £nil).

v. Software assets

Software assets include application software license fees, software development work, software upgrades and purchased PC software packages. The Group also has a number of contracts for Software as a Service (SaaS) and Platform as a Service (PaaS) Cloud Computing Arrangements which permit access to vendor-hosted software and platform services over the term of the arrangement. Where the Group does not control the underlying assets in these arrangements, costs are expensed as incurred. The Group also incurs implementation costs in respect of these contracts. Implementation costs are capitalised as intangible assets where costs meet the definition and recognition criteria of an intangible asset under IAS 38 by being separable and controlled by the Group. During the current and prior year the Group has capitalised costs in relation to its new Business Energy billing system.

- (i) Thermal and Renewable generation assets include generation plant and machinery and related land and buildings. The net book value of power generation assets renewables and thermal includes decommissioning costs with a net book value of £119.0m and £68.1m (2023: £89.6m and £88.6m) respectively. Additionally, Other assets includes £55.3m in relation to decommissioning costs for Gas Storage assets (2023: £55.5m).
- (ii) Represents the carrying value of development assets transferred from intangible assets (note 13) which have reached the consent stage and have been approved for construction and also includes reclassification of software assets to intangible assets.
- (iii) Impairment (charges)/reversals relate to exceptional impairment charges of £134.1m relating to the Group's gas storage operations at Aldbrough and Atwick (see note 7) (2023: exceptional impairment reversals of £63.5m (relating to Great Island CCGT and Aldbrough)) and non-exceptional impairment reversals of £0.7m (2023: £25.1m charges).

Included within property, plant and equipment are the following right of use assets for leased assets:

15. Impairment testing

Goodwill and intangible assets that are not amortised are reviewed at least annually for impairment. Property, plant and equipment, investments and other intangibles are assessed annually for impairment (or impairment reversal) triggers.

The Group's accounting policies and methodologies for impairment testing are described at Accompanying Information sections [A1.2](#).

The key operating and valuation assumptions, specific considerations and outcome of tests for all impairment reviews are noted in the following sections. The discount rates used are pre-tax real, except where noted, and reflect specific risks attributable to the relevant assets subject to impairment review. The recoverable amounts derived from the VIU or FVLCS calculations are compared to the carrying amount of each asset or CGU to determine whether an impairment charge requires to be recognised. The reviews carried out for the 2024 financial statements were carried out in the fourth quarter of the year, which is consistent with previous reviews. Note that the actual outcomes may differ from the assumptions included in the assessments at the balance sheet date.

15.1. Goodwill impairment reviews – CGUs testing

The Group has determined that it has three goodwill balances within its SSE Renewables business (GB and Ireland, SSE Southern Europe and SSE Pacifico) that are subject to annual goodwill impairment reviews. In addition, the Group has a legacy goodwill balance within the Energy Customer Solutions business. The recoverable amounts of the CGUs supporting the goodwill balances are determined by reference to value-in-use ('VIU') calculations. The VIU calculations use, as a starting point, pre-tax cash flow projections based on the Group's ten year Corporate Model as approved by the Board. The Group's Corporate Model is based both on past experience and reflects the Group's forward view of markets, prices, risks and its strategic objectives. Commodity prices used are based on observable market data and, where this is not available, on internal estimates.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED
FOR THE YEAR ENDED 31 MARCH 2024

15. Impairment testing continued

15.1. Goodwill impairment reviews – CGUs testing continued

Assets/CGUs	Cash flow period assumption	Operating and other valuation assumptions	Commentary and impairment conclusions
Great Britain (GB) and Ireland windfarm CGUs	Period to end of life of portfolio assets	<p>Modelling methodology and assumptions</p> <p>The VIU assessment is used to test the carrying value of £288.8m (2023: £292.3m) of goodwill related to the Group's GB and Ireland windfarm CGUs. The assessment is based on the discounted pre-tax cash flows expected to be generated by the specific wind farm assets included in the CGU across the remaining useful lives of those assets.</p> <p>The GB and Ireland CGU includes cashflows for operational assets only, being over 50 individual windfarms across Great Britain and Ireland, given the risk and uncertainty associated with projects in the development stage. Significant developments at Viking, Aberarder, Yellow River, Strathy South and Dogger Bank A and B are currently under construction and continue to be excluded from the analysis.</p> <p>Cash inflows for the CGUs are based on the expected average annual generation output based on technical assessment and past experience and are valued based on forward power prices. These factors are subject to management review on an annual basis. The prices applied to projected outputs are based either on observable market information during that period, which is deemed to be 3 years, or on internal estimations beyond the observable market period (a Level 3 basis as defined by IFRS 13 Fair Value Measurement). The projections are also dependent on the UK and Irish governments' continuing support for existing qualifying wind assets through CFD subsidies and ROCs or REFIT. Cash outflows are based on planned and expected maintenance profiles and other capital or replacement costs.</p> <p>The cash flow projections are based on UK and Irish power prices between £63 – £117 per MWh (2023: £55 – £169 per MWh) and have been discounted applying a pre-tax real discount rate between 7.2% for GB and 5.2% for Ireland (2023: between 6.9% for GB and 5.8% for Ireland) based on technology and market risks.</p>	<p>Impairment conclusion</p> <p>The recoverable amount of the GB and Ireland CGUs at 31 March 2024 is significantly in excess of the carrying value of the goodwill and tangible and intangible assets attributed to the CGUs. Therefore no impairment has been recognised.</p> <p>Sensitivity analysis</p> <p>The principal assumptions impacting the valuation model of the GB and Ireland CGU are discount rate, generation volume and electricity price.</p> <p>While cash flow projections are subject to inherent uncertainty, a 10% power price decrease and a 15% decrease in projected generation volumes were modelled, both of which indicated significant headroom on the carrying value of the assets.</p> <p>A 0.5% increase in the pre-tax real discount rate to 7.7% for GB and 5.7% for Ireland, also indicated significant headroom on the carrying value of the assets.</p> <p>TCFD related sensitivity analysis</p> <p>A significant increase in renewable generation capacity in the Group's core markets could result in an oversupply of renewable electricity at a point in the future, which would lead to a consequential decrease in the power price achievable for the Group's GB and Ireland wind generation assets. A downside power price sensitivity, which may arise in a market with significant new build wind was modelled. This scenario indicated that, despite a modelled 15% reduction in forecast wind power price, there remained significant headroom on the carrying value in the Group's GB and Ireland wind generation assets.</p> <p>Changes to weather patterns resulting from global warming could result in calmer weather, which may reduce volumes achievable for the Group's GB and Ireland wind generation assets (although noting that a reduction in volume would likely lead to capacity constraints and hence higher prices). A 4–8% reduction in projected volume continued to show significant headroom on the carrying value in the Group's GB and Ireland wind generation assets. This is in line with the TCFD "variable wind generation risk" scenario which indicated a reduction to average wind speed changes of 4% to 8% over the longer term.</p>

Assets/CGUs	Cash flow period assumption	Operating and other valuation assumptions	Commentary and impairment conclusions
SSE Southern Europe	Period to end of life of portfolio assets	<p>Modelling methodology and assumptions</p> <p>The VIU assessment is used to test the carrying value of £416.8m of goodwill (2023: £428.7m) and £120.5m of intangible development assets (2023: £116.1m) related to the Group's Southern Europe windfarms for impairment. As the Southern Europe platform is in early-stage development, the assessment was based on the discounted pre-tax cash flows based on a comparable methodology to the acquisition model but updated to reflect changes to specific project circumstances and wider market developments since acquisition.</p> <p>The Southern Europe CGU model includes cashflows for early-stage development assets, being c65 individual windfarm and co-located solar projects across Spain, France, Italy and Greece. Due to the early stage nature of the portfolio, each project has been attributed a probability of development success.</p> <p>Cashflows for the CGUs are based on the expected average annual generation output based on technical assessment valued using forward power price projections. These factors are subject to management review on an annual basis. The prices applied to projected outputs are based on observable market information during the period. Assumptions have also been made on the Spanish, French, Italian and Greek government's support for the development of wind projects and expected governmental support under CFD subsidies. Cash outflows are based on planned and expected maintenance profiles and other capital or replacement costs.</p> <p>The cash flow projections are based on European power prices between €38 – €141 per MWh (2023: €33 – €209 per MWh) and have been discounted applying a pre-tax real discount rate between 6.2% and 6.7% (2023: 6.4% and 7.3%) based on technology and market risks.</p>	<p>Impairment conclusion</p> <p>The recoverable amount of the Southern Europe windfarm CGUs has been calculated at £572.8m (2023: £591.7m) and exceeds the carrying value of the goodwill and intangible development assets. Therefore, no impairment has been recognised at 31 March 2024.</p> <p>During the year the Group recorded a non-exceptional impairment of €18.0m (£15.4m) in respect of two early-stage development projects where the probability of success had decreased</p> <p>Sensitivity analysis</p> <p>The principal assumptions impacting the valuation model of the Southern Europe windfarm CGU are discount rate, generation volume, electricity price and development probability of success.</p> <p>While cash flow projections are subject to inherent uncertainty, a 10% reduction in greenfield generation volume was modelled which indicated continued headroom.</p> <p>A 5% reduction in the probability of success attributed to the development projects would result in a marginal impairment of £2.6m on the carrying value.</p> <p>An increase of 0.1% in the respective pre-tax real discount rates (Spain: 6.2% France: 6.3%, Italy: 6.7% and Greece: 6.5%) results in nil headroom and a 0.5% increase in the respective pre-tax real discount rates indicates an impairment of £100.0m.</p> <p>Within the base case model the Group has assessed that many of the projects in Spain, Italy and France will obtain a revenue support contract. If this assumption were changed and the projects were developed on a merchant basis, the price assumptions applied in the model would increase, although would likely be offset by a compensatory increase in the discount rate. An impairment would be recognised as a result of a 1.4% decrease in the merchant price if the projects were developed on a merchant basis.</p>

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED
FOR THE YEAR ENDED 31 MARCH 2024

15. Impairment testing continued

15.1. Goodwill impairment reviews – CGUs testing continued

Assets/CGUs	Cash flow period assumption	Operating and other valuation assumptions	Commentary and impairment conclusions
SSE Pacifico	Period to end of life of portfolio assets	<p>Modelling methodology and assumptions</p> <p>The VIU assessment is used to test the carrying value of £191.5m of goodwill (2023: £196.0m) and £26.9m of intangible development assets (2023: £30.8m) relating to SSE Pacifico. SSE Pacifico is an early-stage Japanese offshore wind portfolio acquired on 29 October 2021. The projects in SSE Pacifico remain at an early stage. Therefore, the assessment was based on the discounted pre-tax cash flows prepared on comparable basis to the acquisition model, updated to reflect changes to specific project circumstances and wider market developments since acquisition.</p> <p>Cash inflows for the CGU model are based on the Group's latest projections for expected average annual generation output based on technical assessment and are valued based on the Group's internal projections of forward power prices under revenue support contracts available in Japan. The projections are dependent on the Japanese government's continued support for the development of offshore wind projects.</p> <p>Cash outflows are based on forecast asset costs, planned and expected maintenance profiles and other capital or replacement costs.</p> <p>For the purposes of the impairment test, the VIU model includes cashflows for three early-stage offshore wind projects (2023: four) out of a total of 11 acquired by the Group.</p> <p>The cash flow projections are based on Japanese power prices, per foundation type, between ¥12 – ¥30 per kWh (2023: ¥15 – ¥28 per kWh) and have been discounted applying a pre-tax real discount rate of 9.7% (2023: 8.5%) based on technology and market risks. The discount rate is based on assumptions of the capital cost of the project and the proportion of external project funding available in the local market.</p>	<p>Impairment conclusion</p> <p>While the assessed VIU of £290.0m (2023: £316.9m) exceeds the carrying value at 31 March 2024, the early stage of the development investment means that the model is sensitive to changes in key assumptions. The Group's base case model, reflecting the Group's best estimate of observable inputs to the model, indicates headroom on the carrying value of the asset. Therefore, no impairment has been recognised at 31 March 2024.</p> <p>Sensitivity analysis</p> <p>As noted above, the value in use model is sensitive to changes in key input assumptions. The principal assumptions impacting the valuation model of the SSE Pacifico CGU are: revenue support contract price; generation volumes; the proportion of external funding achievable; discount rate; and project probability of success.</p> <p>A 10% decrease in forecast power price to between ¥10 – ¥27 per kWh under revenue support scheme results in a full impairment of carrying value.</p> <p>A 1 percentage point reduction to the generation capacity factor results in an impairment of £25.4m.</p> <p>A 0.25% increase to the Group's assumption on external funding proportion decreases the headroom to £30.1m.</p> <p>A 0.5% increase to the discount rate assumption decreases the headroom to £41.2m.</p> <p>A decrease of project probability from three to two early stage projects results in a range of outcomes from headroom of £6.3m to an impairment of £68.1m.</p>
Energy Customer Solutions	5 years	<p>Modelling methodology and assumptions</p> <p>The Group has capitalised goodwill of £31.7m (2023: £31.7m) in relation to the acquisition of the Energy Solutions Group in 2016. The business designs, installs and optimises building management technologies which deliver efficient operating environments for its customers.</p> <p>The VIU of the business CGU has been based on an 8.0% (2023: 5.6%) pre-tax real discount rate.</p>	<p>Conclusion</p> <p>At 31 March 2024, the impairment review indicates headroom of £16.8m on the carrying value of £31.7m. A decrease in forecast cashflows of 20% would result in headroom of £7.1m. An increase in the discount rate of 2.5% would result in an impairment of £0.3m.</p>

15.2. Property, plant and equipment, other intangibles and investment impairment reviews – asset testing

Where an indicator of impairment exists, the recoverable amounts of the Group's property, plant and equipment, other intangible assets and interests in joint ventures and associates are determined by reference to VIU or, where appropriate, fair value less costs to sell calculations. The calculations use, as their starting point, pre-tax cash flow projections based on the Group's ten year Corporate Model as approved by the Board. The Group's Corporate Model is based on past experience and reflects the Group's forward view of markets, prices, risks and its strategic objectives. Commodity prices used are based on observable market data and, where this is not available, on internal estimates. Fair value less costs to sell valuations are derived from market analysis for similar transactions, adjusted to specific circumstances of the Group's investment to reflect the amount the Group believes will be recoverable in a sale transaction. Note that the Group will expense any individual asset, investment or development asset, should it clearly be damaged, obsolete or economically impaired, as part of its normal course of business.

Changes from prior year

The specific assets and investments identified for impairment reviews in the prior year (being the GB CCGTs; Great Island CCGTs; Gas Storage facilities at Aldbrough and Atwick; 50% joint venture investment in Triton Power; and 50% joint venture investment in Neos Networks) continued to display indicators of impairment and all remained subject to impairment testing at 31 March 2024. No new assets were identified as displaying indicators of impairment or impairment reversal.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED
FOR THE YEAR ENDED 31 MARCH 2024

15. Impairment testing continued

15.2. Property, plant and equipment, other intangibles and investment impairment reviews – asset testing
continued

Assets	Cash flow period assumption	Operating and other valuation assumptions	Commentary and impairment conclusions
GB CCGTs (Keadby, Medway, Peterhead and Marchwood (PPA Right of use lease asset) power stations)	Period to end of life	<p>Modelling methodology and assumptions</p> <p>The VIU of the Group's GB combined cycle gas turbine ('CCGT') power stations were based on pre-tax discounted cash flows expected to be generated by each plant, based on management's view of operating prospects and operational flexibility within the GB wholesale market, including capacity market clearing prices. Cash flows are subject to a pre-tax real discount rate between 10.0% and 15.3% (2023: between 10.0% and 19.4%).</p> <p>Changes from prior year</p> <p>Certain assets within the Group's GB CCGT fleet are nearing the end of their operational life and are therefore more sensitive to fluctuations in market assumptions. During the year, a technical assessment has been performed which resulted in an extension change to end of life assumptions for Keadby, Medway and Peterhead, from March 2028 to March 2030.</p> <p>At 31 March 2024, decreases in short-term gas and carbon prices have resulted in a decrease in UK power prices. As a result, the observable spark margins assumed for the GB CCGT assets has decreased, which was considered an indicator of impairment at 31 March 2024.</p>	<p>Conclusion</p> <p>At 31 March 2024 the fair valuation exercise indicated reduced, but still significant, headroom above the carrying value, therefore no impairment was recognised.</p> <p>Sensitivity analysis</p> <p>A 20% decrease in gross margin would continue to result in significant headroom for each asset.</p> <p>Due to many of the assets nearing the end of their useful lives, the impairment models are not sensitive to the discount rate, therefore no sensitivity analysis on the discount rate was performed.</p> <p>The assets which have had their useful lives extended in the period have done so due to being awarded capacity mechanism contracts in the T-4 auction. These assets would be more sensitive to fluctuations in non-contracted capacity mechanism prices, however a sensitivity has not been performed as the assets subject to impairment testing are contracted into future periods.</p> <p>TCFD related sensitivity analysis – GB CCGTs</p> <p>The future introduction of legislation restricting power generation from unabated gas fired power stations beyond 2030 has been identified as a potential risk the Group could be exposed to as the UK transitions to a net zero economy. This has not been treated as an indicator of impairment at 31 March 2024 as legislation has not been introduced or enacted by the balance sheet date and therefore has not been factored into the impairment analysis above.</p> <p>Despite the extension of the useful lives for Keadby, Peterhead and Medway, most of the Group's GB CCGTs are nearing the end of their economic life and are projected to cease operations by 2030. Of the Group's GB CCGTs, only Keadby 2, Marchwood and Saltend (Triton) are projected to operate beyond this date. If legislation was introduced requiring the closure of these assets by 2030, it would result in an impairment of £155.3m to Keadby and an impairment of £54m to the equity investment in Marchwood at 31 March 2024. The sensitivity for Saltend (Triton) is included later in this note.</p> <p>Under the TCFD Accelerated Gas Closure risk 2030 1.5°C scenario, the indicative potential present value of the future economic benefit lost from early closure of Keadby 2 and Marchwood by 2030 was in the range of £0.3bn – £0.4bn.</p>

Assets	Cash flow period assumption	Operating and other valuation assumptions	Commentary and impairment conclusions
Great Island CCGT	Period to end of life	<p>Modelling methodology and assumptions</p> <p>The VIU of the Group's Great Island CCGT power station was based on pre-tax discounted cash flows expected to be generated by the plant based on management's view of the plant's operating prospects. Cash flows are subject to a pre-tax real discount rate of 11.2% (2023: 12.4%) reflecting the specific risks in the Irish market.</p>	<p>Conclusion</p> <p>The VIU assessment performed on the asset at 31 March 2024 indicated no impairment. The carrying value of the Great Island asset at 31 March 2024 is £251.6m (2023: £269.9m) against an assessed recoverable value of £320.2m (2023: £280.4m).</p> <p>Sensitivity analysis</p> <p>A 0.5% increase in the discount rate would continue to result in significant headroom.</p> <p>A 20% decrease in gross margin would result in an impairment of £14.5m.</p> <p>A €10/KW decrease in projected non-contracted capacity market prices would continue to result in significant headroom.</p> <p>TCFD related sensitivity analysis – Great Island CCGTs</p> <p>The future introduction of legislation restricting power generation from unabated gas fired power stations beyond 2030 has been identified as a potential risk the Group could be exposed to as Ireland transitions to a net zero economy.</p> <p>This has not been treated as an indicator of impairment at 31 March 2024, as legislation has not been introduced or enacted by the balance sheet date and therefore has not been factored into the impairment analysis above.</p> <p>Great Island is projected to operate beyond 2030, and so while legislation has not been introduced requiring the shortening of the economic life to this date, the Group has performed a sensitivity analysis to the impairment test noted above. If legislation was introduced requiring the closure of Great Island by 2030, it would result in an impairment of £60.8m at 31 March 2024.</p> <p>Under the TCFD Accelerated Gas Closure risk 2030 1.5°C scenario, the indicative potential present value of future economic benefit lost from early closure of Great Island by 2030 was less than £0.1bn.</p>

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED
FOR THE YEAR ENDED 31 MARCH 2024

15. Impairment testing continued

15.2. Property, plant and equipment, other intangibles and investment impairment reviews – asset testing
continued

Assets	Cash flow period assumption	Operating and other valuation assumptions	Commentary and impairment conclusions
Gas Storage assets (Atwick and Aldbrough)	Period to end of life	<p>Modelling methodology and assumptions</p> <p>The VIU of the Group's Gas Storage assets at Aldbrough and Atwick were based on pre-tax discounted cash flows expected to be generated by the storage facilities based on management's view of the assets' operating prospects. Cash flows are subject to a pre-tax real discount rate of 11.7% (2023: 18.8%) for Atwick and 10.4% (2023: 13.8%) for Aldbrough reflecting risks specific to the assets.</p> <p>The key assumptions applied in the valuation of the assets are gas price volatility and the mean reversion rate ('MRR'). The gas price volatility assumption reflects management's view of price fluctuations between periods where the Group can purchase gas at a low price, store it and sell during periods of peak prices. The assumption is based on market observed volatility in the last five years adjusted to remove periods of extreme volatility and management's view on projected volatility in future periods. MRR represents the time taken for the market to return to average after a period of increase or decline. The MRR combined with absolute gas price and volatility rate derives management's estimate of recoverable value of the assets. Management assessed that the decrease in gas prices observed during the year was a trigger for a formal impairment review.</p> <p>The Group recorded exceptional impairments of £85.7m at 31 March 2024 (2023: £45.7m impairment reversal) on its Aldbrough asset and £48.4m (2023: nil) on its Atwick asset, based largely on decreases to short term observable gas prices and lower volatility assumptions.</p>	<p>Conclusion</p> <p>The VIU assessment performed on the assets indicated an impairment of £85.7m (2023: £45.7m reversal) to Aldbrough and an impairment of £48.4m to Atwick (2023: Enil).</p> <p>Following the impairment assessment at 31 March 2024, the carrying value of Aldbrough is £3.0m (2023: £92.6m) and the carrying value of Atwick is £6.3m (2023: £62.3m). Both carrying values represent the net book value of the storage assets and exclude the carrying value of cushion gas volumes.</p> <p>Sensitivity analysis – Atwick</p> <p>A sensitivity performed with a high gas price assumption (represents an increase in the price by 10%) would reduce the impairment recognised at the Atwick facility at 31 March 2024 from £48.4m to £38.1m. A low gas price assumption (represents a decrease in the price by 10%) would increase the impairment recognised at 31 March 2024 from £48.4m to £54.7m and would represent a full impairment.</p> <p>A sensitivity performed with a high volatility assumption would reduce the impairment recognised at the Atwick facility at 31 March 2024 from £48.4m to £28.6m.</p> <p>A low volatility assumption would increase the impairment recognised at 31 March 2024 from £48.4m to £54.7m and would represent a full impairment.</p> <p>A high sensitivity of the MRR assumption (represents an increase in the rate by 1.0) would reduce the impairment recognised at 31 March 2024 from £48.4m to £26.0m.</p> <p>Sensitivity analysis – Aldbrough</p> <p>A sensitivity performed with a high gas price assumption (represents an increase in the price by 10%) would reduce the impairment recognised at 31 March 2024 from £85.7m to £67.5m. A low gas price assumption (represents a decrease in the price by 10%) would increase the impairment recognised at 31 March 2024 from £85.7m to £88.7m and would represent a full impairment.</p> <p>A sensitivity performed with a high volatility assumption would reduce the impairment recognised at 31 March 2024 from £85.7m to £49.7m.</p> <p>A low volatility assumption would increase the impairment recognised at 31 March 2024 from £85.7m to £88.7m and would represent a full impairment.</p> <p>A high sensitivity of the MRR assumption (represents an increase in the rate by 1.0) would reduce the impairment recognised at 31 March 2024 from £85.7m to £43.7m.</p>

Assets	Cash flow period assumption	Operating and other valuation assumptions	Commentary and impairment conclusions
Investment in Triton Power Holdings Limited	Period to end of life	<p>Modelling methodology and assumptions</p> <p>The Group has valued its 50% joint venture investment Triton Power Holdings Limited ('Triton') based on projected cashflows that will be derived from the investment on a VIU basis.</p> <p>The VIU assessment of the Triton power stations (Saltend, Indian Queens and Deeside) were based on pre-tax discounted cash flows expected to be generated by each plant, based on management's view of operating prospects and operational flexibility within the GB wholesale market, including capacity market clearing prices. Cash flows are subject to a pre-tax real discount rate of 13.2% (blended) (2023: 15.6% (blended)).</p> <p>The decreases in short-term gas and carbon prices and the resultant decrease in UK power prices described in the GB CCGT impairment note above also acted as an indicator of impairment for Triton.</p>	<p>Conclusion</p> <p>The Group has recorded an exceptional impairment of £63.2m (2023: £291.6m) on its investment in Triton during the year. The impairment was recognised in the Group's results for the six months ended 30 September 2023. At 31 March 2024, the Group performed a further impairment assessment which indicated no further impairment or impairment reversal existed at 31 March 2024.</p> <p>The Group acquired its investment in Triton on 1 September 2022 during a period of significant volatility in the UK power market. On acquisition the Group recorded an exceptional gain on acquisition due to movements in short term gas and power prices between the purchase agreement and completion dates. The Group's investment in Triton has been carried at fair value since acquisition and is therefore susceptible to movements in market observable assumptions.</p> <p>The Group's carrying value of equity investment at 31 March 2024 is £152.5m (2023: £253.9m).</p> <p>Sensitivity analysis</p> <p>A 0.5% increase in the discount rate would increase the impairment recognised at 31 March 2024 from £63.2m to £66.1m. A 0.5% decrease in the discount rate would reduce the impairment recognised from £63.2m to £57.4m.</p> <p>A 20% increase in gross margin would result in a reduction in the impairment charge to £39.6m, and a 20% decrease in gross margin would increase the impairment to £84.1m.</p> <p>A £10/KW increase in non-contracted capacity market price would decrease the impairment charge to £43.6m and a £10/KW decrease would increase the impairment charge to £80.2m.</p> <p>TCFD related sensitivity analysis – Triton</p> <p>The future introduction of legislation restricting power generation from unabated gas fired power stations beyond 2030 has been identified as a potential risk the Group could be exposed to as the UK transitions to a net zero economy. This has not been treated as an indicator of impairment at 31 March 2024, as legislation has not been introduced or enacted by the balance sheet date and therefore has not been factored into the impairment analysis above.</p> <p>Triton is projected to operate beyond this date, and so while legislation has not been introduced requiring the shortening of the economic life to this date, the Group has performed a sensitivity analysis to the impairment test noted above. If legislation was introduced requiring the closure of Triton by 2030, it would result in a further impairment to the investment in Triton of £78.2m at 31 March 2024.</p> <p>Under the TCFD Accelerated Gas Closure risk 2030 1.5°C scenario, the indicative potential present value of the future economic benefit lost from early closure of Triton by 2030 was less than £0.1bn.</p>

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

FOR THE YEAR ENDED 31 MARCH 2024

15. Impairment testing continued

15.2. Property, plant and equipment, other intangibles and investment impairment reviews – asset testing continued

Assets	Cash flow period assumption	Operating and other valuation assumptions	Commentary and impairment conclusions
Investment in Neos Networks Limited	n/a	<p>Modelling methodology and assumptions</p> <p>The Group has valued its 50% joint venture investment in Neos Networks Limited ('NNL') based on projected valuations that could be achieved in a market transaction, using earnings multiples observable from recent similar transactions. Due to the nature of the valuation technique, which was performed to approximate an achievable fair value less costs to sell, a wide range of valuations were derived from this exercise. The Group has used a point estimate valuation within the range of possible valuations based on earnings targets and multiples that the Group believes are achievable. The Group has assessed that this is a Level 3 valuation in the fair value hierarchy, with the key inputs being EBITDA and the transaction multiple.</p>	<p>Conclusion</p> <p>The valuation exercise resulted in a wide range of reasonably probable valuations for the business from an impairment of £49.5m to an impairment of £113.4m.</p> <p>The Group has assessed that within this range of valuations, a point valuation resulting in an impairment of £73.6m (2023: £37.7m) best represents the recoverable value of the investment.</p> <p>Following the impairment, the Group's carrying value of equity investment, shareholder loans and receivables due from NNL is £92.2m (2023: £174.8m).</p> <p>Sensitivity analysis</p> <p>Sensitivity analysis was performed in relation to the EBITDA and the multiple applied in deriving the valuation. A 10% increase in the EBITDA assumption would reduce the impairment to £62.8m, whereas a 33% decrease in the EBITDA assumption would result in an impairment of £105.8m.</p> <p>A 10% decrease to the multiple assumption would result in an impairment of £85.1m, whereas a 10% increase to the multiple assumption would decrease the impairment to £61.6m.</p>

(i) Of the £115.9m (2023: £663.6m) share of profits from continuing operations, only £114.1m (2023: £662.3m) is recognised through the income statement. The £1.8m (2023: £1.3m) difference relates to profits earned from SSE Group companies where the costs have been capitalised. This profit has been eliminated on consolidation.

(ii) Impairments of £136.8m (2023: £329.3m) include charges of £63.2m (2023: £291.6m) in relation to the Group's Triton joint venture, and £73.6m (2023: £37.7m) in relation to the Group's investment in Neos Networks, of which £73.6m (2023: £5.9m) has been treated as exceptional and Enil (2023: £31.8m) has been treated as non-exceptional, see note 7.

(iii) The investment (decrease)/increase in respect of financial guarantees relates to £22.2m (2023: Enil) of unwind and expiry of guarantee contracts, less £3.3m (2023: £16.0m) for the fair value of fees receivable on guarantees granted to joint venture investments during the year.

16.2. Additions and disposals of equity in the current year

Additions in the year

On 21 March 2024 the Group completed the purchase of 50% of the equity in eight onshore wind development projects in Ireland from Bord na Mona Powergen Limited for cash consideration of £41.9m.

During the year ended 31 March 2024 the Group provided equity and loans to its existing joint venture investments of £237.9m and £235.9m respectively, primarily in relation to Seagreen Wind Energy Limited and Dogger Bank A Offshore Wind Farm.

Disposals in the year

There were no significant disposals in the current year, the Group has received £14.9m of cash and recognised a gain in the income statement of £9.0m in relation to investments in associates.

16.3. Acquisitions and disposals of equity in the previous year

Additions in the previous year

On 1 September 2022, the Group announced that SSE Thermal and Equinor had completed the acquisition of Triton Power Holdings Limited from Energy Capital Partners for total consideration of £341.0m shared equally. Further detail on the Group's acquisitions in the year ended 31 March 2023 is provided in note 12.1.

Additionally, during the year ended 31 March 2023 the Group provided equity and loans to its existing joint venture investments of £141.4m and £441.7m respectively, primarily in relation to Seagreen Wind Energy Limited and Doggerbank A Offshore Wind Farm.

Disposals of equity in the previous year

There were no significant disposals of equity in the prior year.

16.4. Principal joint ventures and associates

Under IFRS 12 Disclosure of Interests in Other Entities, the Group has evaluated the key joint ventures and associates it holds with the purpose of disclosing any which are materially significant in order to identify the impact on the Group's financial position, performance and cash flows, whilst identifying the nature of the risks associated with these interests. A full listing of the Group's incorporated joint ventures, joint operations, associates and investments are included in the Accompanying Information (A3 [🔗](#)).

Interest in joint venture and associate	2,661.7	525.2	129.2	3,316.1	3,091.1

(i) Other comprises the investments the Group holds in Neos Networks Limited and Marron Activ8 Energies Limited.

* The comparatives have been restated. See note 2.1.

Information on Group's investments in joint ventures and associates is provided at [A3](#), [A4](#) and [A5](#) [🔗](#).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

16. Investments continued

16.5. Joint operations

Listed are the incorporated joint operations that have a material impact on the financial position and financial results of the Group.

	Principal activity	Country of incorporation	Class of shares held	Proportion of shares held (%)	Group Interest (%)	Year end
Greater Gabbard Offshore Winds Limited	Offshore Windfarm	UK	Ordinary	50.0	50.0	31 March
Eastern Green Link 2 Limited	Power Transmission	UK	Ordinary	50.0	37.5	31 March

The Group's interest in Greater Gabbard Offshore Winds Limited is that of a joint operation designed to provide output to the parties sharing control. The liabilities of the arrangement are principally met by the parties through the contracts for the output of the windfarm.

Eastern Green Link 2 Limited is a joint operation between SHET and National Grid Electricity Transmission plc to install a 2GW subsea high-voltage connection.

The Group also has an unincorporated arrangement with Equinor under which it accounts for its 66.7% share of the Aldbrough gas storage facility owned by SSE Hornsea Limited.

16.6. Other investments held at fair value through other comprehensive income

	Total £m
At 31 March 2022	8.7
Additions in year	19.1
Fair value adjustment through other comprehensive income	(0.4)
At 31 March 2023	27.4
Disposals in year	(0.4)
Transfers to investments in joint ventures and associates	(24.1)
Fair value adjustment through other comprehensive income	0.3
At 31 March 2024	3.2

In the current year the classification of an investment of £24.1m (2023: £nil) has been reassessed and reclassified from 'Other investments' to 'Equity investments in joint ventures and associates'. The investment has been recognised as an associate reflecting the Group's level of ownership and influence over the investee; comparative amounts have not been re-presented.

17. Inventories

	2024 £m	2023 £m
Fuel and consumables	155.3	179.3
Certificates and allowances	205.1	125.4
Gas held in storage	23.1	142.2
Less: provisions held	(40.5)	(52.0)
	343.0	394.9

Where Renewables Obligation Certificates ('ROCs') and Renewable Energy Guarantees of Origin ('REGOs') certificates are self-generated or purchased to fulfil the Group's environmental obligations, they are recorded within intangible assets. The value of ROCs and REGOs held in excess of the Group's environmental obligations are recorded within inventories.

The Group has expensed inventories of £562.8m within cost of sales in the year (2023: £601.5m).

18. Trade and other receivables

	2024 £m	2023 £m
Non-current assets		
Loan note receivable	170.1	149.5
Current assets		
Trade receivables	1,305.5	1,404.0
Unbilled energy income	663.7	666.1
Other receivables	82.6	226.0
Cash posted as collateral	9.3	316.3
Other prepayments and accrued income	593.0	632.7
	2,654.1	3,245.1
Total trade and other receivables	2,824.2	3,394.6

The non-current loan note receivable relates to £170.1m (2023: £149.5m) payable by Ovo Energy by 2029. The Ovo loan note carries interest of 13.25% and is presented cumulative of accrued interest repayments, discounted at 13.25%.

Unbilled energy income represents an estimate of the value of electricity or gas supplied to customers between the date of the last meter reading and the year end. Detail of the calculation applied to estimate this balance is included at note 4.1(iii). A 5% sensitivity on the unbilled energy accrual would equate to an increase or decrease in the receivable balance of £20.7m (2023: £19.4m).

Included in other prepayments and accrued income is £11.9m (2023: £347.3m) in relation to government funded customer support schemes.

Cash posted as collateral relates to amounts deposited on commodity trading exchanges of £9.3m (2023: £316.3m).

Trade receivables and other financial assets are part of the Group's financial exposure to credit risk as explained in accompanying information note A6 [A6](#).

19. Trade and other payables

	2024 £m	2023 £m
Current liabilities		
Trade payables	656.7	694.6
Contract related liabilities ⁽ⁱ⁾	95.2	54.1
Cash held as collateral	362.5	–
Other creditors	473.0	560.8
Other accruals ⁽ⁱⁱ⁾	1,735.1	1,349.1
	3,322.5	2,658.6
Non-current liabilities		
Contract related liabilities ⁽ⁱ⁾	158.4	161.3
Deferred income and other accruals ⁽ⁱⁱ⁾	934.4	798.6
	1,092.8	959.9
Total trade and other payables	4,415.3	3,618.5

(i) Current contract related liabilities includes customer contributions of £15.7m (2023: £14.5m) and non-current contract related liabilities includes customer contributions of £158.4m (2023: £161.3m).

(ii) Non-current other accruals includes government grants of £6.0m (2023: £7.9m).

Cash held as collateral relates to amounts received from commodity trading exchanges of £362.5m (2023: Enil).

	712.1	20.3	20.9	18.8	772.1

Decommissioning provisions

Provision has been made for the estimated net present value of decommissioning the Group's Thermal and Renewable power generation assets, Gas Storage facilities and the retained 60% share of decommissioning costs of the disposed Gas Production business. Cost estimates are based on the forecast remediation or clean-up costs based on current technology and prices for Renewable, Thermal and Gas Storage assets and are reviewed by independent valuation experts every three years. In the intervening years, management update cost estimates based on factors arising since the last formal valuation date. Retained decommissioning costs in relation to the disposed Gas Production business are periodically agreed with the field operators. The cost estimates include a risk adjustment and are inflated to the projected decommissioning date using a market observable inflation rate. This projection is discounted using a risk-free discount rate based on UK gilt rates with maturity date similar to the expected decommissioning date.

There is a wide range of assumed decommissioning dates across the obligation due to the number of assets and their varying ages, which is summarised in the table below. Decommissioning dates are based on the useful economic lives of the individual assets based on technology and price forecasts at the balance sheet date. It is possible that the forecast decommissioning dates will change due to technology advances or decisions to repower wind farms when the current turbines reach the end of their respective lives. The date of decommissioning of the Gas Production business can vary based on hydrocarbon reserve estimates and market commodity prices, which can shorten or lengthen the economic life of the field.

Business Unit	Value of Provision 31 March 2024 £m	Number of decommissioning sites	Forecast decommissioning dates
Renewables	230.7	52	2025 – 2065
Thermal	161.7	16	2024 – 2050
Gas Storage	115.4	18 ¹	2024 – 2049
Gas Production	219.7	4 ²	2024 – 2040
SSE Enterprise	8.2	1	2027
Total	735.7		

Decommissioning provisions continued

Business Unit	Value of Provision 31 March 2023 £m	Number of decommissioning sites	Forecast decommissioning dates
Renewables	218.5	55	2025 – 2049
Thermal	165.0	14	2023 – 2051
Gas Storage	119.4	18 ¹	2023 – 2050
Gas Production	201.4	4 ²	2023 – 2038
SSE Enterprise	7.8	1	2027
Total	712.1		

- 1 The Group has two Gas Storage assets at Aldbrough and Atwick. In total there are 18 caverns with varying economic lives, therefore the number of sites has been disclosed to more accurately reflect the scale and expected timing of decommissioning activities.
- 2 The Group has retained a 60% share of the decommissioning obligation for four Gas Production fields, though each field has multiple wells and shared infrastructure that the Group retains an obligation to remediate.

The Group's decommissioning provision has increased during the year from £712.1m to £735.7m, primarily due to the increase in base cost estimates and inclusion of the decommissioning provisions for Solar and Battery assets for the first time. While the long term inflation rate remains stable at 3.2% (2023: 3.2%), the increase in the risk free discount rates applied of between 3.9%-4.4% (2023: 3.5%-3.8%) has partially negated the increase in the closing provision due to base cost estimate increases. The £2.2m increase in decommissioning provision primarily relates to a revaluation of £6.2m recognised as an opposing reduction to decommissioning assets and £9.9m income statement charge in relation to the Group's share of gas production decommissioning liabilities. During the year, the Group incurred £5.3m of decommissioning spend, primarily related to the Aldbrough site included within Gas storage and the Fiddler's Ferry and Ferrybridge sites, included within Thermal above. Based on work completed to date, provisions accrued for the decommissioning of these power stations are expected to be sufficient for the final cost of the works.

Impact of climate change on the Group's decommissioning provisions

The Group has assessed that the most likely impact of climate change on its decommissioning provisions would be the enactment of legislation that would result in the earlier closure of its unabated gas fired power stations. The decommissioning provision included in the table above for these assets is based on forecast closure dates under legislation enacted at the balance sheet date and therefore forecast closure dates have not been accelerated. In the sensitivity analysis below, a scenario has been included assuming legislation is enacted that would result in closure of these assets from 2030.

Sensitivity analysis

Sensitivity analysis reflecting reasonably probable fluctuations to the main assumptions used in the calculation of the decommissioning provisions is set out below:

Estimated decommissioning provision including:	2024 £m	2023 £m
Increasing the projected cost estimate by 10%	804.8	781.4
Increasing the inflation rate by 1.0%	808.7	793.2
Decreasing the discount rate by 0.5%	764.4	747.1
Closure of unabated gas CCGTs from 2030	732.6	714.5

Legal and restructuring provisions

Provisions have been made for ongoing legal and regulatory disputes. Where outcomes are unknown, a range of possible scenarios is calculated, with the most likely being reflected in the provision. The timing of settlement for legal provisions is more uncertain as it is dependent upon legal resolution being achieved.

Employee related provisions

Employee related provisions include the Group's employer financed retirement benefit provision for certain directors and former directors and employees, which is valued in accordance with IAS 19 using assumptions consistent with the Scottish Hydro Electric Pension Scheme (see note 23 for assumptions applied). In addition, the Group has legal obligations arising from severance payments due to employees, which are measured based on length of service. At 31 March 2024, the reduction in the provisions relates to payments from the pension scheme and payments for severance.

Other provisions

Other provisions include onerous contract provisions, mutualisation obligations and other contractual obligations and are calculated based on a best estimate basis. The timing of settlement of these provisions varies by obligation between 2024 and 2028.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

21. Sources of finance

21.1. Capital management

The Board's policy is to maintain a strong balance sheet and credit rating to support investor, counterparty and market confidence in the Group and to underpin future development of the business. The Group's credit ratings are also important in maintaining an efficient cost of capital and in determining collateral requirements throughout the Group. As at 31 March 2024, the Group's long-term credit rating was BBB+ positive outlook for Standard & Poor's and Baa1 stable outlook for Moody's.

The maintenance of a medium-term corporate model is a key control in monitoring the development of the Group's capital structure and allows for detailed scenarios and sensitivity testing. Key ratios drawn from this analysis underpin regular updates to the Board and include the ratios used by the rating agencies in assessing the Group's credit ratings.

The Group's debt requirements are principally met through issuing bonds denominated in Sterling and Euros as well as private placements and medium-term bank loans including those with the European Investment Bank.

During the year SSE plc issued an 8 year €750m Green Bond at a coupon of 4.0%. The bond has been left in Euros as a net investment hedge for the Group's Euro denominated subsidiaries. In the year, SSE plc also redeemed US Private Placement debt of combined £155.0m and a €700m Eurobond with coupon at 1.75%. In January 2024 Scottish Hydro Electric Transmission plc issued a 20 year £500m Green Bond at a coupon of 5.5%.

SSE's adjusted net debt and hybrid capital was £9.4bn at 31 March 2024, compared with £8.9bn at 31 March 2023.

Adjusted net debt and hybrid capital is stated after removing lease obligations, external net debt attributable to non-controlling interests and cash held and posted as collateral in line with the Group's presentation basis which is explained at note 3(i). The adjustment relating to the non-controlling interest share of Scottish Hydro Electric Transmission plc external net debt is £490.2m at 31 March 2024 (2023: £434.2m) and relates to 25% of external loans of £2,088.0m (2023: £1,744.8m) net of cash and cash equivalents of £127.4m (2023: £7.8m). Cash held and posted as collateral refers to amounts received and deposited on commodity trading exchanges which are reported within 'Trade and other payables' and 'Trade and other receivables' respectively on the face of the balance sheet.

At 31 March 2024 the collateral balance was a net liability of £353.2m, consisting of a liability of £362.5m and an asset of £9.3m (2023: £316.3m asset). This reflects the lower levels of initial margin required for commodity contracts traded on exchanges following a reduction in risk factors and the Group replacing cash collateral with £100m of letters of credit. Additionally, variation margin positions for March 2024 are 'in the money' due to lower commodity prices, compared to the 'out the money' positions experienced in the prior year.

The Group has an established €1.5bn Euro commercial paper programme (paper can be issued in a range of currencies and swapped into Sterling) and as at 31 March 2024 there was £840m commercial paper outstanding (2023: £919m). During the year ended 31 March 2024, the Group issued new debt instruments totalling £1,982m and redeemed £1,744m of maturing debt in the year. The Group also continues to have access to £3.5bn of revolving credit facilities (2023: £3.5bn), (see note 21.3), which includes £750m relating to Scottish Hydro Electric Transmission plc (2023: £750m). As at 31 March 2024 there were no (2023: £100m) drawings against these committed facilities (2023: 3% utilisation).

The Group capital comprises:

	2024 £m	2023 £m (restated*)
Total borrowings (excluding lease obligations)	8,726.2	8,654.0
Less: Cash and cash equivalents	(1,035.9)	(891.8)
Net debt (excluding hybrid equity)	7,690.3	7,762.2
Hybrid equity	1,882.4	1,882.4
External net debt attributable to non-controlling interests	(490.2)	(434.2)
Cash held/(posted) as collateral and other short term loans	353.2	(316.3)
Adjusted net debt and hybrid capital APM	9,435.7	8,894.1
Equity attributable to shareholders of the parent	9,170.8	8,551.7
Total capital excluding lease obligations	18,606.5	17,445.8

* The comparative has been restated. See note 2.1.

Under the terms of its major borrowing facilities, the Group is required to comply with the following financial covenant:

- **Interest Cover Ratio:** The Group shall procure that the ratio of Operating Profit to Net Interest Payable for any relevant period is not less than 2.5 to 1.

The following definitions apply in the calculation of these financial covenants:

- **"Operating Profit"** means, in relation to a relevant period, the profit on ordinary activities before taxation (after adding back Net Interest Payable) of the Group for that relevant period but after adjusting this amount to exclude any exceptional profits (or losses) and, for the avoidance of doubt, before taking account of any exceptional profits (or losses) and excluding the effect of IFRS 9 remeasurements.
- **"Net Interest Payable"** means, in respect of any relevant period, interest payable during that relevant period less interest receivable during that relevant period.

In summary, the Group's intent is to balance returns to shareholders between current returns through dividends and long-term capital investment for growth. In doing so, the Group will maintain its capital discipline and will continue to operate within the current economic environment prudently. There were no changes to the Group's capital management approach during the year.

Under the SSE plc's articles of association, the borrowings of the Company are limited so as to ensure that the aggregate amount of all borrowings by the Group outstanding at any time is not more than three times the capital and reserves of the Group.

21.2. Loans and other borrowings

	2024 £m	2023 £m
Current		
Short-term loans	1,044.5	1,738.5
Lease obligations	83.5	82.1
	1,128.0	1,820.6
Non-current		
Loans	7,681.7	6,915.5
Lease obligations	324.0	323.8
	8,005.7	7,239.3
Total loans and borrowings	9,133.7	9,059.9
Cash and cash equivalents	(1,035.9)	(891.8)
Unadjusted net debt	8,097.8	8,168.1
Add/(less):		
Hybrid equity	1,882.4	1,882.4
External net debt attributable to non-controlling interests	(490.2)	(434.2)
Lease obligations	(407.5)	(405.9)
Cash held/(posted) as collateral and other short term loans	353.2	(316.3)
Adjusted net debt and hybrid capital APM	9,435.7	8,894.1

Cash and cash equivalents (which are presented as a single class of asset on the face of the balance sheet) comprise cash at bank and short term highly liquid investments with a maturity of three months or less.

21.3. Borrowing facilities

The Group has an established €1.5bn Euro commercial paper programme (paper can be issued in a range of currencies and swapped into Sterling) and as at 31 March 2024 there was £840m commercial paper outstanding (2023: £919m).

The Group also continues to have access to £3.5bn of revolving credit facilities (2023: £3.5bn). As at 31 March 2024 there were no drawings against these committed facilities (2023: £100m). The details of the five committed facilities as at 31 March 2024 are:

- a £1.3bn revolving credit facility for SSE plc maturing March 2026 (2023: £1.3bn);
- a £0.2bn bilateral facility for SSE plc maturing October 2026 (2023: £0.2bn);
- a £0.75bn facility for Scottish Hydro Electric Transmission plc maturing November 2026 (2023: £0.75bn);
- a £0.25bn facility for Scottish Hydro Electric Distribution plc and Southern Electric Power Distribution plc maturing November 2026 (2023: £0.25bn); and
- a £1.0bn committed facility for SSE plc maturing February 2025 (2023: £1.0bn).

The £1.3bn revolving credit facility and £0.2bn bilateral facility are both in place to provide back-up to the commercial paper programme and support the Group's capital expenditure plans. The Transmission and Distribution related facilities, both of which have 1 year extension options at the borrower's discretion, were entered into to help cover the capital expenditure and working capital of those businesses. Both facilities were extended to November 2026 in the year and have a further year option. The £1bn committed facility for SSE plc was entered into to provide cover for potential cash collateral requirements, if periods of extreme volatility return to the commodity markets. The facility had a 1 year extension option at the lender's discretion that was extended for a year to February 2025. There were no drawings on the SSE plc and Distribution facilities at 31 March 2024 and 31 March 2023 and no drawings on the £750m Transmission facility at 31 March 2024 compared to £100m at 31 March 2023.

During the year SSE plc issued an 8 year €750m Green Bond at a coupon of 4.0%. The bond has been left in Euros as a net investment hedge for the Group's Euro denominated subsidiaries. Additionally Scottish Hydro Electric Transmission plc issued a 20 year £500m bond at a coupon of 5.5%. In the year, SSE plc also redeemed US Private Placement debt of combined £155m and a €700m Eurobond with coupon at 1.75%, and Scottish Hydro Electric Transmission plc repaid £100m of facility advances.

Total non-current borrowings		7,704.9	7,440.6	7,681.7		6,778.9	6,458.4	6,915.5
Total borrowings		8,761.4	8,554.2	8,726.2		8,527.9	8,206.2	8,654.0

Note: The Sterling-equivalent fair value reflects the fair value of non-Sterling denominated borrowings, post the impact of the hedges noted below.

(i) Balances include term loans and EIB debt and is a mixture of fixed and floating rate debt.

(ii) Balances include Commercial Paper and facility advances (£840m of Commercial Paper and £nil of facility advances outstanding at 31 March 2024).

(iii) The fair value adjustment relates to the change in the carrying amount of the borrowings as a result of fair value hedges that are in place. The movement in the fair value adjustment is recognised in the income statement with a corresponding movement on the hedging instrument also being recognised in the income statement.

(iv) The weighted average interest rates (including the effect of interest rate swaps) for the year ended 31 March 2024 was 3.40% (2022: 3.35%).

(v) The 1.375% €650m Eurobond maturing 4 September 2027 has been swapped to Sterling giving an effective interest rate of 2.56%.

(vi) The 1.250% €600m Eurobond maturing 16 April 2025 has been swapped to Sterling giving an effective interest rate of 2.43%.

(vii) The 1.750% €500m Eurobond maturing 16 April 2030 has been swapped to Sterling giving an effective interest rate of 2.89%.

(viii) The 4.0% €750m Eurobond maturing 5 September 2031 has been left in Euros as a net investment hedge for the Group's Euro denominated subsidiaries.

(ix) Bonds have been issued under the Group's Green Bond Framework.

Lease liabilities

Amounts charged under lease arrangements are detailed within note 6, and right of use assets recognised under lease arrangements are detailed within note 14.

	£m
At 31 March 2022	393.5
Additions during the year	79.9
Disposals during the year	(1.4)
Unwind of discount	28.3
Repayment in the year	(94.4)
At 31 March 2023	405.9
Additions during the year⁽ⁱ⁾	75.6
Disposals during the year	(1.9)
Unwind of discount	25.8
Repayment in the year	(97.9)
At 31 March 2024	407.5

(i) Additions include lease liabilities recognised following acquisitions during the year.

The weighted average incremental borrowing rate applied to lease liabilities during the year was 4.98% (2023: 5.02%). Incremental borrowing rates applied to individual lease additions in the year ranged between 3.70% to 5.25% (2023: 4.03% to 5.06%).

The Group has additional committed payments under short term and low value leases at 31 March 2024 of £11.2m (2023: £11.7m).

The maturity of future lease liabilities are as follows:

	2024 £m	2023 £m
Within one year	91.8	94.5
Between one and five years	196.3	202.4
After five years	328.4	316.1
	616.5	613.0
Less: future finance charge	(209.0)	(207.1)
Present value of lease obligations	407.5	405.9

21.4. Reconciliation of net increase in cash and cash equivalents to movement in adjusted net debt and hybrid capital

	2024 £m	2023 £m
Increase/(decrease) in cash and cash equivalents	144.1	(157.5)
(Less)/add:		
New borrowing proceeds	(1,982.2)	(1,914.7)
New hybrid equity proceeds	–	(831.4)
Repayment of borrowings	1,744.0	2,148.1
Non-cash movement on borrowings	166.0	(216.2)
Increase in external net debt attributable to non-controlling interests	56.0	434.2
(Decrease)/increase in cash held/posted as collateral and other short term loans	(669.5)	241.6
Increase in adjusted net debt and hybrid capital APM	(541.6)	(295.9)

Cash held and posted as collateral refers to amounts received and deposited on commodity trading exchanges which are reported within 'Trade and other payables' and 'Trade and other receivables' respectively on the face of the balance sheet, as well as loans provided with less than three months' maturity.

22. Equity

22.1. Share capital

	Number (millions)	£m
Allotted, called up and fully paid:		
At 31 March 2022	1,073.1	536.5
Issue of shares (i)	27.7	13.9
Shares repurchased (ii)	(6.9)	(3.4)
At 31 March 2023	1,093.9	547.0
Issue of shares (i)	2.3	1.1
At 31 March 2024	1,096.2	548.1

The Company has one class of ordinary share which carries no right to fixed income. The holders of ordinary shares are entitled to receive dividends as declared and are entitled to one vote per share at meetings of the Company.

- Shareholders were able to elect to receive ordinary shares in place of the final dividend of 67.7p per ordinary share (in relation to year ended 31 March 2023) and the interim dividend of 20.0p (in relation to the current year) under the terms of the Company's scrip dividend scheme. This resulted in the issue of 1,779,529 and 493,654 new fully paid ordinary shares respectively (2023: 18,241,941 and 9,413,103). In addition, the Company issued 0.8m (2023: 1.9m) shares during the year under the savings-related share option schemes (all of which were settled by shares held in Treasury) for a consideration of £9.2m (2023: £18.0m).
- Under the share buyback programme in the year to 31 March 2023, 6.9m of shares were repurchased and cancelled for a total consideration of £107.6m (including stamp duty and commission). The nominal value of share capital repurchased and cancelled is transferred out of share capital and into the capital redemption reserve. The scrip dividend take-up for the financial year ended 31 March 2023 was 18.0%, which is below the 25.0% required by the share buyback programme, therefore there have been no share buybacks in the current financial year ended 31 March 2024.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

22. Equity continued

22.1. Share capital continued

Of the 1,096.2m shares in issue, 2.8m are held as treasury shares. These shares will be held by the Group and used to award shares to employees under the Sharesave scheme in the UK.

During the year, on behalf of the Company, the employee share trust purchased 1.3m shares for a total consideration of £21.8m (2023: 1.4m shares, consideration of £23.4m) to be held in trust for the benefit of employee share schemes. At 31 March 2024, the trust held 6.9m shares (2023: 6.5m) which had a market value of £113.9m (2023: £118.0m).

22.2. Capital redemption reserve

The capital redemption reserve comprises the value of shares redeemed or purchased by the Company from distributable profits.

22.3. Hedge reserve

The hedge reserve comprises the effective portion of the cumulative net change in the fair value of cash flow hedge derivative instruments related to hedged transactions that have not yet occurred.

22.4. Translation reserve

Comprises exchange translation differences on foreign currency net investments offset by exchange translation differences on borrowings and derivatives classified as net investment hedges under IAS 39.

22.5. Hybrid Equity

	2024 £m	2023 £m
GBP 600m 3.74% perpetual subordinated capital securities (i)	598.0	598.0
EUR 500m 3.125% perpetual subordinated capital securities (i)	453.0	453.0
EUR 1,000m 4.00% perpetual subordinated capital securities (ii)	831.4	831.4
	1,882.4	1,882.4

i. 2 July 2020 £600m and €500m Hybrid Capital Bonds

The hybrid capital bonds issued in July 2020 have no fixed redemption date, but the Company may, at its sole discretion, redeem all but not part of the capital securities at their principal amount. The date for the first potential discretionary redemption of the £600m hybrid bond is 14 April 2026 and then every 5 years thereafter. The date for the first potential discretionary redemption of the €500m hybrid capital bond is 14 July 2027 and then every 5 years thereafter. For the £600m hybrid the discretionary coupon payments are made annually on 14 April and for the €500m Hybrid the coupon payments are made annually on 14 July.

ii. 12 April 2022 €1,000m Hybrid Capital Bonds

The hybrid capital bond issued in April 2022 has no fixed redemption date, but the Company may, at its sole discretion, redeem all but not part of the capital securities at their principal amount. The date for the first potential discretionary redemption is 21 April 2028 and then every 5 years thereafter. The discretionary hybrid coupon payments are made annually on 21 April.

iii. Coupon Payments

In relation to the £600m hybrid equity bond a discretionary coupon payment of £22.4m (2023: £22.4m) was made on 14 April 2023 and for the €500m hybrid equity bond a discretionary coupon payment of £16.5m (2023: £16.4m) was made on 14 July 2023. The first discretionary coupon payment on the €1bn hybrid equity bond of £34.2m was paid on 21 April 2023.

The coupon payments in the year to 31 March 2024 consequently totalled £73.1m (2023: £38.8m).

The Company has the option to defer coupon payments on the bonds on any relevant payment date, as long as a dividend on the ordinary shares has not been declared. Deferred coupons shall be satisfied only on redemption; or on a dividend payment on ordinary shares, both of which occur at the sole option of the Company. Interest will accrue on any deferred coupon.

22.6. Equity attributable to non-controlling interests

This relates to equity attributable to non-wholly owned but controlled subsidiaries which are consolidated within the financial statements of the Group. At 31 March 2024 the amount attributable to non-controlling interests is £749.9m (2023: £649.1m), which relates to SHET of £709.1m (2023: £606.5m) and SSE Pacifico £40.8m (2023: £42.6m). The profit and loss attributable to non-controlling interests for the year ended 31 March 2024 is £100.8m gain (2023: £23.6m gain), which relates to SHET £101.5m gain (2023: £25.5m gain) and SSE Pacifico £0.7m loss (2023: £1.9m loss).

Details regarding SHET's principal activity and country of incorporation are included in [A3](#).

SHET's summary financial information is as follows:

	31 March 2024 £m	31 March 2023 £m	25 November 2022 £m
Non-current assets	5,579.2	4,907.1	4,717.0
Current assets	337.0	16.5	2.0
Current liabilities	(509.0)	(370.3)	(384.3)
Non-current liabilities	(3,370.4)	(2,909.4)	(2,795.4)
	2,036.8	1,643.9	1,539.3

	31 March 2024 £m	1 April 2022 to 25 November 2022 £m	26 November 2022 to 31 March 2023 £m	Total 2023 £m
Revenue	885.2	435.4	220.4	655.8
Operating profit	565.0	274.5	131.0	405.5
Net finance costs	(35.0)	(31.7)	(14.9)	(46.6)
Profit before taxation	530.0	242.8	116.1	358.9
Taxation	(132.5)	(59.1)	(19.6)	(78.7)
Profit after taxation	397.5	183.7	96.5	280.2

The summary financial information provided above is presented without Group eliminations, including £780.0m (2023: £780.0m) of internal loans with related interest of £16.2m (2023: £6.5m), other consolidation adjustments of £5.9m and related taxation, which have been eliminated to calculate the non-controlling interest for adjusted profit.

	31 March 2024 £m	26 November 2022 to 31 March 2023 £m
Net profit	397.5	96.5
add/(less):		
Interest elimination	16.2	6.5
Current taxation on consolidation adjustments	(7.1)	(1.1)
Deferred taxation	102.0	16.5
Adjusted net profit attributable to 25% non-controlling interests	127.1	29.6

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

23. Retirement benefit obligations

Defined benefit schemes

The Group has two funded final salary pension schemes which provide defined benefits based on final pensionable pay. The schemes are subject to independent valuations at least every three years. The future benefit obligations are valued by actuarial methods on the basis of an appropriate assessment of the relevant parameters.

The Group provides pension benefits to most UK colleagues through SSE Pensions+, a defined contribution master trust agreement with Aviva. The Group generally matches employee contributions up to 6%, and provides additional contributions of 3% after two years and a further 3% after ten years continuous Group service. The Group also operates other pension arrangements, including a defined contribution master trust agreement with Zurich in the Republic of Ireland and an Unfunded Unapproved Retirement Benefit Scheme.

The Group presents its pension scheme valuations under two different measurement bases, an actuarial valuation and an IAS 19 valuation as required by accounting standards. The IAS 19 valuation is used to determine the assets and obligations recognised in the Group's consolidated balance sheet and is calculated annually by scheme actuaries, whereas the formal actuarial valuation is used to determine the contributions the Group makes to each scheme. The actuarial valuation is recalculated for each scheme every three years.

Actuarial valuations

The individual pension scheme details based on the latest formal actuarial valuations are as follows:

	Scottish Hydro Electric	SSE Southern
Latest formal actuarial valuation	31 March 2021	31 March 2022
Valuation carried out by	Hymans Robertson	Aon Hewitt
Value of assets based on valuation	£2,050.5m	£2,395.6m
Value of liabilities based on valuation	£1,782.2m	£2,475.2m
Valuation method adopted	Projected Unit	Projected Unit
Average salary increase	RPI+0.50%	RPI+0.25%
Average pension increase	RPI	RPI
Value of fund assets/accrued benefits	115.1%	96.8%

Future contributions

Scottish Hydro Electric Pension Scheme

The last triennial actuarial valuation of the scheme was carried out at 31 March 2021 and showed a surplus of £268.3m on a projected unit basis. Following this valuation, the Group agreed to a new schedule of contributions which does not require contributions to be paid to the scheme, unless there is a deficit on the valuation basis for two successive quarterly valuations. Consequently, the Group has not made contributions to the scheme in the year ending 31 March 2024. The next triennial funding valuation will be carried out as at 31 March 2024. This process began during the year and is expected to be finalised by the end of 2024. As part of that process the Trustee and Group will agree any required future contributions to the scheme based on the valuation.

SSE Southern Group of the Electricity Supply Pension Scheme

The last triennial actuarial valuation of the scheme was carried out as at 31 March 2022 and showed a deficit of £79.6m on a projected unit basis. Following this valuation, the Group agreed to a new schedule of contributions which, along with investment returns from return-seeking assets, are expected to make good this shortfall by 31 March 2027. The next funding valuation will be carried out as at 31 March 2025. The Group also pays contributions in respect of current accrual. Total contributions of approximately £28.2m are expected to be paid by the Group during the year ending on 31 March 2025, including deficit repair contributions of £15.6m. The deficit repair contribution will be made until March 2027, increasing in line with inflation each year.

During the year ending 31 March 2024 the Group paid deficit contributions of £16.3m.

Pension summary as measured under IAS 19:

	Scheme type	Net actuarial (loss)/gain recognised in respect of the pension asset in the statement of comprehensive income		Net pension asset	
		2024 £m	2023 £m	2024 £m	2023 £m
Scottish Hydro Electric	Defined benefit	(37.1)	(152.0)	339.3	366.6
SSE Southern	Defined benefit	(118.1)	72.8	82.3	174.5
		(155.2)	(79.2)	421.6	541.1

IFRIC 14 surplus restrictions

The value of Scottish Hydro Electric Pension Scheme assets recognised was previously impacted by the asset ceiling test which restricts the surplus that can be recognised to assets that can be recovered through future refunds or reductions in future contributions to the scheme, and may increase the value of scheme liabilities where there are minimum funding liabilities in relation to agreed contributions. IFRIC 14 'IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction' clarifies that future refunds may be recognised if the sponsoring entity has an unconditional right to a refund in certain circumstances.

In 2016/17 the Group agreed with the trustees to the Scottish Hydro Electric Pension Scheme an amendment to the scheme rules to clarify that the Company has a clear right to any surplus upon final winding up of the scheme. This amendment removes the previous restriction on recognition of any surplus and as such the previously applied restriction is no longer recognised. The net pension asset of the Scottish Hydro Electric Scheme at 31 March 2024 was equal to £339.3m (2023: £366.6m).

At 31 March 2024, the SSE Southern Pension Scheme has a net surplus of £82.3m (2023: £174.5m), and unrecognised future contributions of £46.8m (2023: £50.9m), subject to increases in line with inflation. The Group has assessed that it has the right to recognise the current and any future surpluses on the scheme, therefore has not recognised a liability for future unrecoverable contributions.

Other matters

On 16 June 2023 the High Court issued a ruling in respect of Virgin Media v NTL Pension Trustees II Limited (and others) calling into question the validity of rule amendments made to defined benefit pension schemes contracted-out on a Reference Scheme Test basis between 6 April 1997 and 5 April 2016. Amendments to these pension schemes over this time required confirmation from the Scheme Actuary that the Reference Scheme Test would continue to be met. In the absence of such a confirmation, the Rule amendment would be void. This ruling could have wide ranging implications for many UK pension schemes and will be subject to an Appeal in 2024.

The Trustees of the Scottish Hydro Electric Pension Scheme and the SSE Southern Pension Scheme have not performed a detailed assessment over the impact of this ruling. The Trustees believe it is appropriate to await the outcome of the appeal process in 2024 before taking any further action, and the Group supports their position. Due to the uncertainty, it is not possible to assess the potential impact of the Virgin Media High Court ruling on the Scottish Hydro Electric Pension Scheme or the SSE Southern Pension Scheme.

23.1. Pension scheme assumptions

Both schemes have been updated to 31 March 2024 by qualified independent actuaries. The valuations have been prepared for the purposes of meeting the requirements of IAS 19. The major assumptions used by the actuaries in both schemes were:

	At 31 March 2024	At 31 March 2023
Rate of increase in pensionable salaries	3.4%	3.5%
Rate of increase in pension payments	3.1%	3.2%
Discount rate	4.8%	4.8%
Inflation rate	3.1%	3.2%

The assumptions relating to longevity underlying the pension liabilities at 31 March 2024 are based on standard actuarial mortality tables, and include an allowance for future improvements in longevity. The assumptions, equivalent to future longevity for members in normal health at age 65, are as follows:

Scottish Hydro Electric

	At 31 March 2024		At 31 March 2023	
	Male	Female	Male	Female
Currently aged 65	22	24	22	24
Currently aged 45	24	26	24	26

SSE Southern

	At 31 March 2024		At 31 March 2023	
	Male	Female	Male	Female
Currently aged 65	22	25	22	24
Currently aged 45	24	26	24	26

23.2. Sensitivity analysis

The impact on the schemes' liabilities of changing certain of the major assumptions is as follows:

Scottish Hydro Electric

	At 31 March 2024		At 31 March 2023	
	Increase/decrease in assumption	Effect on scheme's liabilities	Increase/decrease in assumption	Effect on scheme's liabilities
Rate of increase in pensionable salaries	0.1%	+/- 0.1%	0.1%	+/- 0.1%
Rate of increase in pension payments	0.1%	+/- 0.7%	0.1%	+/- 0.7%
Discount rate	0.1%	+/- 0.7%	0.1%	+/- 0.7%
Longevity	1 year	+/- 2.0%	1 year	+/- 1.9%

SSE Southern

	At 31 March 2024		At 31 March 2023	
	Increase/decrease in assumption	Effect on scheme's liabilities	Increase/decrease in assumption	Effect on scheme's liabilities
Rate of increase in pensionable salaries	0.1%	+/- 0.1%	0.1%	+/- 0.1%
Rate of increase in pension payments	0.1%	+/- 1.2%	0.1%	+/- 1.2%
Discount rate	0.1%	+/- 1.3%	0.1%	+/- 1.3%
Longevity	1 year	+/- 3.5%	1 year	+/- 3.3%

Benefits paid	(158.1)	158.1	–	(175.0)	175.0	–
	(129.9)	158.0	28.1	(121.8)	174.9	53.1
Balance at 31 March	3,015.2	(2,593.6)	421.6	3,188.6	(2,647.5)	541.1

23.5. Pension scheme contributions and costs

Charges/(credits) recognised:

	2024 £m	2023 £m
Service costs (charged to operating profit)	18.6	33.9
(Credited)/charged to finance costs:		
Interest from pension scheme assets	(148.5)	(114.8)
Interest on pension scheme liabilities	122.3	98.6
	(26.2)	(16.2)

The return on pension scheme assets is as follows:

	2024 £m	2023 £m
Return on pension scheme assets	(43.5)	(1,000.8)

Defined contribution scheme

The total contribution paid by the Group to defined contribution pension schemes was £90.5m (2023: £58.7m).

Unfunded Unapproved Retirement Benefit Scheme (UURBS) pension costs

The decrease in the year in relation to UURBS was £6.1m (2023: decrease of £8.9m). This is included in Employee related provisions (note 20).

Staff costs analysis

The pension costs in note 8 can be analysed as follows:

	2024 £m	2023 £m
Service costs	18.6	33.9
Defined contribution scheme payments	90.5	60.1
	109.1	94.0

23.6. Pension scheme risk assessment and mitigation

Risks to which the Pension Schemes exposes the Group

The nature of the Group's defined benefit pension schemes expose the Group to the risk of paying unanticipated additional contributions to the schemes in times of adverse experience. The most financially significant risks are likely to be:

i. Asset volatility

The liabilities are calculated using a discount rate set with reference to corporate bond yields; if assets underperform this yield, this will create a deficit. The schemes hold a proportion of growth assets (equities and property) which, though expected to outperform corporate bonds in the long-term, create volatility and risk in the short-term. The allocation to growth assets is monitored to ensure it remains appropriate given the schemes' long term objectives. The SHEPS has a much lower proportion of growth assets than the SSE Southern Pension Scheme reflecting the maturity of each scheme.

ii. Changes in bond yields

A decrease in corporate bond yields will increase the value placed on the schemes' liabilities for accounting purposes. However, this will be partially offset by an increase in the value of the schemes' bond holdings and its interest rate hedging in both schemes.

iii. Inflation risk

The majority of the schemes' benefit obligations are linked to inflation, and higher inflation will lead to higher liabilities (although, in most cases, caps on the level of inflationary increases are in place to protect against extreme inflation). However, this will be partially offset by inflation hedging in both schemes.

iv. Life expectancy

The majority of the schemes' obligations are to provide benefits for the life of the members, so an increase in the life expectancy will result in an increase in the liabilities. The sensitivity analysis disclosed is intended to provide an indication of the impact on the value of the schemes' liabilities of the risks highlighted.

v. Liability versus asset risk

The risk that movement in the value of the schemes' liabilities are not met by corresponding movements in the value of the schemes' assets will expose the Group to movements in the overall funding surplus.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

FOR THE YEAR ENDED 31 MARCH 2024

23. Retirement benefit obligations continued

23.7. Risk mitigation

i. De-risking

The Trustees have taken a number of steps to control the level of investment risk including reducing the Schemes' exposures to higher risk assets and increasing the level of protection against adverse movements in interest rates and inflation. The Trustees of both schemes continue to review the risk exposures in light of the longer term objectives of the respective schemes, including consideration of the impact of climate-related risk. Detailed below are further details on the hedging of pensioner longevity risk.

ii. Asset buy-in

On 1 October 2019, the Scottish Hydro Electric Pension Scheme entered into an asset buy-in, transferring the risk of volatility in the assumptions used to calculate the obligation for 1,800 pensioners and 567 dependants (covering c£800m of the scheme's funding liabilities) to a third party. The asset buy-in is valued under the accounting principles of IFRS 13 and is considered a Level 3 instrument in the fair value hierarchy. This is in addition to a previous buy-in completed during the year ended 31 March 2018 when c.£250m of the scheme's assets and liabilities related to 617 pensioners and 190 dependants were transferred to a third party. The Group has now insured against volatility in obligations related to pensioners who retired before 1 October 2019 to third parties (insurer PIC) and is now only exposed to valuation fluctuations related to active and deferred members and any members who retired after 1 October 2019.

iii. Asset-liability matching strategies used by the Scheme

The Group and trustees of the schemes have agreed a long term investment strategy that seeks to reduce investment risk as and when appropriate. The asset-liability matching strategy is part of this approach which aims to reduce the volatility of the funding level of the pension schemes by investing in assets which perform in line with the liabilities of the schemes so as to protect against inflation being higher than expected. This has been adopted for a proportion of the schemes' assets, which is designed to provide partial protection against adverse movements in interest rates and inflation. The trustees of the respective schemes review the schemes' asset allocation on an ongoing basis in light of changes in the funding position and market opportunities.

23.8. Risk assessment

i. Maturity profile of the defined benefit obligations

The weighted average duration of the defined benefit obligation is 17 years (2023: 17 years) for the Scottish Hydro Electric Pension Scheme and 13 years (2023: 14 years) for the SSE Southern Pension Scheme.

ii. Information about the defined benefit obligations

Status of members is weighted by the liabilities of each scheme

	Scottish Hydro Electric %	SSE Southern %
Active members	23	16
Deferred members	14	8
Pensioners	63	76
	100	100

23.9. Pension scheme policies

i. Recognition of gains and losses

The Group recognises actuarial gains and losses in the Statement of Other Comprehensive Income following the re-measurement of the net defined benefit liabilities of the schemes.

ii. Methods and assumptions used in preparing the sensitivity analyses

The sensitivities disclosed are calculated using approximate methods taking into account the duration of the schemes' liabilities. While these have been calculated consistently with the previous financial year, the method applied may change over time with financial conditions and assumptions.

iii. Asset recognition

The Group has recognised net pension assets in relation to the Scottish Hydro Electric and SSE Southern pension schemes due to a surplus existing under IAS 19 accounting. The Group will only recognise a surplus should it have rights to that surplus under the rules of the pension scheme. The Group no longer applies the 'asset ceiling' restriction mandated by IFRIC 14. Details on this key accounting consideration are provided above.

iv. Fair value assessment of scheme assets

The Group seeks to assess whether there is a quotable market value (referenced as "quotable" above) in relation to pension scheme assets held. This assessment is based on regular reviews conducted in conjunction with the trustees of the schemes. For assets where no quotable market value exists, these assets will be valued based on a set methodology agreed by trustees and scheme advisors and then regularly assessed.

Currently only one unquotable value exists within the two pension schemes of the Group, this being insurance contracts (or 'buy-in') held by the Scottish Hydro Electric Pension Scheme. These assets are currently valued consistently with the scheme's liabilities with the expected return on these assets being set equal to the discount rate.

24. Financial instruments

For financial reporting purposes, the Group has classified derivative financial instruments into two categories, operating derivatives and financing derivatives. Operating derivatives include all qualifying commodity contracts including those for electricity, gas, oil, and carbon and the post-day 1 fair value movements on non-government backed contracts for difference in SSE Renewables. Financing derivatives include all fair value and cash flow interest rate hedges, non-hedge accounted (mark-to-market) interest rate derivatives, cash flow foreign exchange hedges and non-hedge accounted foreign exchange contracts. Non-hedge accounted contracts are treated as held for trading.

The Group provides guarantees in respect of certain activities of former subsidiaries and to certain current joint venture investments. Prior to adoption of IFRS 17, these contracts were designated as insurance contracts under IFRS 4, where existing accounting practices were grandfathered and the contracts were treated as contingent liabilities until such time as it became probable the Group would be required to make payment to settle the obligation. The adoption of IFRS 17 from 1 April 2022 resulted in a reassessment of these contracts and the Group elected to apply the valuation principles of IFRS 9 to these contracts.

24.1. Financial instruments – income statement

	2024 £m	2023 £m
Operating derivatives		
Total result on operating derivatives ⁽ⁱ⁾	(573.1)	(2,980.2)
Less: Amounts settled ⁽ⁱⁱ⁾	1,025.3	272.0
Movement in unrealised derivatives	452.2	(2,708.2)
Financing derivatives (and hedged items)		
Total result on financing derivatives ⁽ⁱ⁾	370.6	81.3
Less: Amounts settled ⁽ⁱⁱ⁾	(364.5)	120.6
Movement in unrealised derivatives	6.1	201.9
Financial guarantee liabilities		
Total result on financial guarantee liabilities ⁽ⁱⁱⁱ⁾	12.5	–
Net income statement impact	470.8	(2,506.3)

- (i) Total result on derivatives in the income statement represents the total amounts (charged) or credited to the income statement in respect of operating and financial derivatives, and is shown as certain re-measurements in note 7.
- (ii) Amounts settled in the year represent the result on derivatives transacted which have matured or been delivered and have been included within the total result on derivatives, and is shown as certain re-measurements in note 7.
- (iii) Total result on financial guarantee liabilities in the income statement represents the total amounts credited or (charged) to the income statement in respect of the unwind of the financial liabilities and new or expiring contracts.

The movement in unrealised operating derivative excludes a £8.8m loss (2023: £16.6m gain) on proprietary trades, which has been recognised in the underlying profit of the Group.

24.2. Financial instruments – balance sheet

The derivative financial assets and (liabilities) are represented as follows:

	2024 £m	2023 £m (restated*)
Derivative financial assets		
Non-current	64.2	246.0
Current	536.1	759.2
Total derivative assets	600.3	1,005.2
Derivative liabilities		
Non-current	(222.2)	(243.3)
Current	(345.2)	(1,021.0)
Total derivative liabilities	(567.4)	(1,264.3)
Net derivative asset/(liability)	32.9	(259.1)

The financial guarantee liabilities are represented as follows:

	2024 £m	2023 £m
Financial guarantee liabilities		
Non-current	(36.4)	(66.5)
Current	(3.1)	(4.4)
Total guarantee liabilities	(39.5)	(70.9)

* The comparative has been restated. See note 1.2.

Information on the Group's financial risk management and the fair value of financial instruments is available at [A6](#) and [A7](#).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

25. Commitments and contingencies

25.1. Capital commitments

	2024 £m	2023 £m
Capital expenditure:		
Contracted for but not provided	1,389.2	1,035.6

Contracted for but not provided capital commitments include the fixed contracted costs of the Group's major capital projects. In practice contractual variations may arise on the final settlement of these contractual costs. The increase from the prior year relates primarily to Transmission projects.

25.2. Contingent assets and liabilities

At 31 March 2024, the Group has unrecognised contingent assets in relation to the part disposal transaction of SSE Slough Multifuel Limited. In the prior year, the Group had further unrecognised contingent assets in relation to the part disposal transactions of Neos Networks Limited, Seagreen and Doggerbank C, which have lapsed during the current year. In total, contingent consideration receivable has decreased to £19.1m (2023: £149.1m), for which the Group has recognised a net receivable of £4.1m (2023: £4.1m). The payments of the remaining £15.0m (2023: £145.0m) are subject to various earn outs or contract and planning milestones, some of which the Group has assessed are unachievable or are out of the Group's control. At 31 March 2024, the Group has assessed that there is neither the required certainty of receipt, nor the ability to accurately assess the amounts receivable for recognition of these amounts.

Contingent liabilities for the Group solely relate to SSE plc, and have been disclosed within note 13 to the Company Financial Statements.

ACCOMPANYING INFORMATION

A1. Basis of consolidation and significant accounting policies**A1.1. Basis of consolidation**

The financial statements consolidate the results of the Company and its subsidiaries together with the Group's share of the results and net assets of its interests in joint arrangements and associates. Where necessary to ensure consistency, the accounting policies of the subsidiaries, joint arrangements or associates have been adjusted to align to the accounting policies of the Group. Intra-Group balances and any unrealised gains and losses or income and expenses arising from Intra-Group transactions are eliminated in preparing the consolidated financial statements. Unrealised gains and losses arising from transactions with joint arrangements and associates are eliminated to the extent of the Group's interest in the entity. Non-controlling interests represent the equity in subsidiaries that is not attributable, either directly or indirectly, to SSE plc shareholders.

Subsidiaries (Accompanying Information A3 )

Subsidiaries are those entities controlled by the Group or the Company. Control exists when the Group has the power, directly or indirectly, to govern the financial and operating policies of an entity in order to obtain variable returns from its activities. In assessing control, potential voting rights that are currently exercisable or convertible are taken into account. The financial statements of subsidiaries acquired are consolidated in the financial statements of the Group from the date that control commences until the date control ceases. Transactions with non-controlling interests that relate to their ownership interests and do not result in a loss of control are accounted for as equity transactions.

Interests in joint arrangements and associates (note 16 and Accompanying Information A3 )

Joint arrangements, as defined by IFRS 11 "Joint Arrangements", are those arrangements that convey to two or more parties 'joint control'. Joint control exists when decisions about the 'relevant activities', being the financial, operational or strategic policies of the arrangement, are made with the unanimous consent of the parties sharing control. Whilst this assessment is principally focused on any 'reserved matters', being the material activities that typically require all significant shareholders to approve, other contractual agreements such as Power Purchase Agreements and Management Services Agreements are also considered. The Group's investments in joint arrangements are classified as either joint operations or joint ventures depending on the investee's legal form and the investor's contractual rights and obligations over the assets and liabilities of the investee.

Associates are those investments over which the Group has significant influence but neither control nor joint control.

The Group's interests in its joint operations are accounted for by recognising its share of the assets, liabilities, revenue and expenses of the operation. In these arrangements, the Group's share of the revenue will be eliminated as it relates to its purchased share of the output from the arrangement.

The Group's joint ventures and associates are accounted for using the equity method of accounting where the joint venture and associate net investments (comprising both equity and long term loans) are carried at historical cost plus the Group's share of post-acquisition results, less any impairment in value. Where an impairment is recognised against the carrying value of an investment, it is recognised within the operating costs line of the consolidated financial statements. For those investments that were formerly subsidiaries of the Group, this will also include any fair value uplift arising from loss of control. The Group recognises its share of the results of these equity-accounted operations after tax and interest in the income statement.

Foreign currencies

The consolidated financial statements are presented in pounds sterling, which is the functional currency of the parent. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured accordingly.

Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange ruling at the balance sheet date. Any gain or loss arising on the restatement of such items is taken to the income statement as a finance cost, with the exception of exchange gains or losses on foreign currency borrowings that provide a hedge against a net investment in a foreign entity or exchange gains or losses incurred as part of a qualifying cash flow hedge. These exchange gains or losses are transferred to the translation reserve to the extent the hedge is effective. Non-monetary assets that are measured in terms of historical cost in a foreign currency are translated at the historic rate at the date of transaction.

For the purpose of presenting the consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into pounds sterling at the balance sheet closing rate. The results of these operations are translated at the average rate in the relevant period. Exchange differences on retranslation of the opening net assets and the results of foreign operations are transferred to the translation reserve and are reported in the consolidated statement of comprehensive income.

The average and spot rates for the principal functional currencies that the Group's foreign operations are denominated in are shown in the table below.

		2024	2023	Change
EUR v GBP	Year end spot rate	1.1697	1.1374	2.8%
	Average spot rate	1.1694	1.1564	1.1%
US\$ v GBP	Year end spot rate	1.2623	1.2337	2.3%
	Average spot rate	1.2710	1.2050	5.5%
JPY v GBP	Year end spot rate	191.0290	163.8230	16.6%
	Average spot rate	190.4400	163.2888	16.6%

A1. Basis of consolidation and significant accounting policies continued

A1.2. Significant accounting policies

Revenue (notes 2 and 5)

Revenue from contracts with customers is recognised to the extent that it reflects the expected consideration for goods or services provided to the customer under contract, over the performance obligations they are being provided. For each separable performance obligation identified, the Group determines whether it is satisfied at a “point in time” or “over time” based upon an evaluation of the receipt and consumption of benefits, control of assets and enforceable payment rights associated with that obligation. If the criteria required for “over time” recognition are not met, the performance obligation is deemed to be satisfied at a “point in time”.

Revenue principally arises as a result of the Group’s activities in energy production, storage, transmission, distribution, supply and related services in the energy markets in Great Britain and Ireland. The key policies applied by each Business Unit are as follows:

Transmission

Use of electricity transmission networks

Revenue from use of electricity transmission networks is derived from the allowed revenue as defined by the parameters in the relevant electricity transmission licence, which informs the tariffs set.

Electricity transmission revenue is determined in accordance with the regulatory licence, based on an Ofgem approved revenue model and is recognised “over time” as charged to National Grid. Where this revenue differs from the allowed revenue, there may be an over- or under-recovery of revenue which will be reflected in future financial years’ allowed revenue as set out in the regulatory licence. No accounting adjustments are made for over- or under-recoveries in the year that they arise as they are contingent on future events (being the transmission of electricity in a future period). The over or under recovery adjustment is recognised in the subsequent period when included within the tariffs that form allowed revenue under the regulatory agreement.

Transmission network contracted services

Where the Group has an ongoing obligation to provide contracted services (transmission network connections), revenues are recognised “over time” consistent with the customer receiving and consuming the benefits of that service across the expected contractual service period. Any assets constructed in order to deliver the service are capitalised and depreciated over their useful life. Payments are typically received from customers in advance of providing the contracted service and are deferred on balance sheet. No extended warranty periods are offered.

Distribution

Use of electricity distribution networks

Revenue from use of electricity distribution networks is derived from the allowed revenue as defined by the parameters in the relevant electricity distribution licence, which informs the tariffs set.

Electricity distribution revenue recognised is based on the volume of electricity distributed “over time”, as use of distribution service is determined by the customer, and the set customer tariff. As with electricity transmission revenue, any over- or under-recovery of revenue is reflected in future financial years’ allowed revenue as set out in the regulatory licence. No accounting adjustments are made for over- or under-recoveries in the year that they arise as they are contingent on future events (being the distribution of electricity in a future period). The over or under recovery adjustment is recognised in the subsequent period when included within the tariffs that form allowed revenue under the regulatory agreement. The policy also applies to the Group’s independent network business reported within SSE Enterprise.

Distribution network contracted services

Where the Group has an ongoing obligation to provide contracted services (such as for distribution network connections), revenues are recognised “over time” consistent with the customer receiving and consuming the benefits of that service across the expected contractual service period. Any assets constructed in order to deliver the service are capitalised and depreciated over their useful life. Payments are typically received from customers in advance of providing the contracted service and are deferred on balance sheet. The release of deferred income on customer funded additions is removed from the Group’s adjusted EBITDA measure. No extended warranty periods are offered.

Renewables

Electricity generation

Revenue from the physical generation of electricity is recognised “point in time” as generated and supplied to the national settlements body. Revenue is measured at either the spot price at the time of delivery, or trade price where that trade is eligible for “own use” designation.

Renewables contracted services

Revenue from national support schemes, such as Renewable Obligation Certificates, is recognised at the point the performance obligation has been met. This is typically considered to be either at the point electricity has been physically generated or over the contractual period, depending on the underlying performance obligation. Revenue is measured either at the market rate at the point of generation, or at the fixed contractual consideration, depending on the individual scheme mechanic.

Revenue from other ancillary generation services is recognised "over time" consistent with the customer receiving and consuming the benefits of those services across the expected contractual service period, and at the contracted consideration.

**Thermal
Electricity generation**

Revenue from the physical generation of electricity is recognised "point in time" as generated and supplied to the national settlements body. Revenue is measured at either the spot price at the time of delivery, or trade price where that trade is eligible for "own use" designation. This policy is also applied to the Group's Slough Heat & Power assets within the Enterprise business.

Gas storage

Revenue from gas storage trading activities is recognised "point in time" as injected back into the gas network. Revenue is measured at either the spot price at the time of delivery, or trade price where that trade is eligible for "own use" designation.

Thermal Generation contracted services

Revenue from national support schemes, such as the Capacity Market mechanism, is recognised at the point the performance obligation has been met. This is typically considered to be either at the point electricity has been physically generated or over the contractual period, depending on the underlying performance obligation. Revenue is measured either at the market rate at the point of generation, or at the fixed contractual consideration, depending on the individual scheme mechanic.

Revenue from other ancillary generation services is recognised "over time" consistent with the customer receiving and consuming the benefits of those services across the expected contractual service period, and at the contracted consideration.

Customers**Supply of energy**

Revenue on the supply of energy comprises sales to domestic (in Ireland) and business end-user customers (in GB and Ireland) is based on actual energy consumption including an estimate of the value of electricity and gas supplied to customers between the date of the last meter reading and the year end. Revenue is recognised "over time" consistent with the delivery of energy to the customer as we consider the receipt and consumption of the benefits of the energy to be simultaneous. Revenue is measured based on the applicable customer tariff rate and after deduction of any applicable contractual discounts.

Details of the judgements involved in the estimation process for the value of electricity and gas supplied to customers is given within note 4.1(iii).

Payments from customers may be received in advance of providing the contracted service and are deferred on balance sheet. Amounts received from customers in relation to energy management services provided by Third Party Intermediaries ('TPIs') are offset against payments to those TPIs, reflecting the responsibility for providing the energy management service.

Energy related services

Where the Group has an ongoing obligation to provide contracted energy related services, revenues are recognised "over time" consistent with the customer receiving and consuming the benefits of that service across the expected contractual service period at the fixed contracted rate. Where the Group has an obligation to perform a specific service, revenues are recognised "point in time", following performance of the service at the fixed contracted consideration. No extended warranty periods are offered.

ACCOMPANYING INFORMATION – CONTINUED

A1. Basis of consolidation and significant accounting policies continued

A1.2. Significant accounting policies continued

SSE Energy Markets

Commodity optimisation and other services

Income from sales commodity optimisation trading occurring in any business unit is presented net in cost of sales alongside purchase commodity optimisation trades. Revenue on physical power and gas supplies recognised "point in time" as delivered to the national settlements body or third parties. Revenue is measured at either the spot price at the time of delivery, or trade price where that trade is eligible for "own use" designation.

Revenue arising on commodities purchased in excess of the Group's requirements and recorded as inventory assets, such as Renewables Obligation Certificates, REGOs or carbon allowances, is recognised "point in time" on disposal of these inventory assets to third parties.

Revenue from other ancillary services is recognised "over time" consistent with the customer receiving and consuming the benefits of those services across the expected contractual service period, and at the contracted consideration.

Aside from where specifically noted above, consideration is due when the performance obligation has been satisfied. As the period between satisfaction of the performance obligation and receipt of consideration from the customer is expected to be less than a year, the Group has applied the practical expedient not to adjust revenue for the effect of any financing components.

Revenue from sources other than the Group's contracts with customers principally comprise meter rental income within the SSE Enterprise business, and Contract for Difference income within certain Joint Venture arrangements.

Income on meter rental agreements, which are classified as operating leases, are presented as revenue where they relate to the core operating activities of that business. Lease payments are recognised as income on a straight-line basis over the lease term.

Where the Group earns income from an asset during the commissioning period, the income is recognised in the income statement as revenue accordance with the relevant asset accounting policy set out above.

Other operating income – Government Grants (note 6)

Under UK and Irish governments' customer support schemes licensed energy suppliers are required to provide a discount on gas and electricity prices to customers. The level of discount applied to each customer varies dependent upon energy tariff and support scheme applicable to each customer. Where SSE provided a discount to customer through reduction of energy bill, the cost of applying these discounts is recovered from the Government. The amounts reclaimed under this scheme are recognised as government grant income within Other Operating Income in the consolidated income statement.

For the year ended 31 March 2024 the most significant customer support scheme administered by the Group was the Energy Bills Discount Scheme ('EBDS'), applicable to eligible non-domestic gas and electricity customers in GB and Northern Ireland during the period from 1 April 2023 to 31 March 2024. In the prior year the most significant scheme was the Energy Bill Relief Scheme ('EBRS'), applicable to GB commercial gas and electricity customer usage during the period 1 October 2022 to 31 March 2023. These schemes impact SSE Business Energy with discounts made to SSE's billings to customers and the unbilled income accrual, and a separate asset is recognised in respect of claimed or to-be-claimed receipts from the UK government.

Contract for Differences ('CfD') are agreements between a low carbon electricity generator and the Low Carbon Contracts Company ('LCCC'), a UK Government owned entity responsible for delivering support mechanisms for low-carbon electricity generation. These agreements are not considered to be contracts with a customer, as the LCCC does not receive any goods or services from the generator. These arrangements are instead considered to be Government Grants, with income arising from these grants recognised in the income statement in the period in which generation takes place. In the year, the Group recognised no income or expense (2023: none) related to Contracts for Difference with the LCCC within its wholly owned subsidiaries. The Group's joint venture investment, Beatrice Offshore Windfarm Limited, has a CfD with the LCCC which resulted in payments from the LCCC of £217.3m in the year with SSE's share of £86.9m recognised within share of profit (2023: £25.6m, with SSE's share of £12.8m recognised within share of profit). The Group's wholly owned Viking windfarm and joint venture investment Seagreen Wind Energy Limited also have a CfD arrangement in place with the LCCC. The LCCC government agreements for Viking and Seagreen are not yet effective and as such no income or cost was recognised during the year.

Where the CfD strike price falls below the spot price of generation and payments are made to the LCCC, these payments are expensed as incurred within operating costs. See 'financial instruments' below for the Group's policy in relation to commercial Contracts for Difference.

Presentation of grants related to assets

Income received from Government towards the capital cost of an asset are deducted from the carrying value presented in the financial statements.

Cost of sales (note 6)

Cost of sales includes fuel and energy purchases, direct employee benefits, and depreciation of property, plant and equipment.

The net result from sales and purchases of commodity optimisation trades – comprising both realised and unrealised gains and losses arising from optimisation trading activities – is also presented within cost of sales, reflecting the underlying economic purpose of this trading activity.

Finance income and costs (note 9)

Interest income and costs are recognised in the income statement as they accrue, on an effective interest method. The issue costs and interest payable on bonds and all other interest payable and receivable is reflected in the income statement on the same basis.

Interest on the funding attributable to major capital projects is capitalised during the period of construction and depreciated as part of the total cost over the useful life of the asset.

The accounting policy for foreign exchange translation of monetary assets and liabilities is described on [page 271](#) and for lease liability charges on [page 278](#).

Taxation (note 10)

Taxation on the profit for the year comprises current and deferred tax. Taxation is recognised in the income statement unless it relates to items recognised directly in equity, in which case it is recognised in other comprehensive income.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax is calculated using the balance sheet liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: goodwill not deductible for tax purposes, the initial recognition of assets or liabilities other than in business combinations that affect neither accounting nor taxable profit, and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date.

Deferred tax assets and liabilities are offset where there is a legally enforceable right of offset within the same tax authority and where the Group intends to either settle them on a net basis, or to realise the asset and settle the liability simultaneously. A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

During the year to 31 March 2024 Finance (No.2) Act 2023 was enacted, bringing Electricity Generator Levy ("EGL") into force, which is effective for periods from 1 January 2023 to 31 March 2028. The Group has assessed that the EGL has the characteristics of a levy rather than an income tax. The Group therefore recognises an accrual for the year within cost of sales.

Business Combinations (note 12)

The acquisition of subsidiaries, and joint operations that meet the definition of a business, is accounted for under the acquisition method as defined by IFRS 3 "Business Combinations".

The cost of acquisition is measured as being the aggregate fair value of consideration to be transferred at the date control is obtained. Goodwill is measured at the acquisition date as the fair value of consideration transferred, plus non-controlling interests, less the net recognised amount (which is generally fair value) of the identifiable assets and liabilities assumed. Goodwill is subject to an annual review for impairment (or more frequently if necessary) in accordance with the Group's impairment accounting policy.

Contingent consideration is classified as a liability and subsequently re-measured through the income statement. Acquisition costs are expensed as incurred.

Changes in ownership that do not result in a change of control are accounted for as equity transactions.

Held for sale assets and liabilities and discontinued operations

Non-current assets are classified as held for sale if their recoverable value is likely to be recovered via a sale or distribution as opposed to continued use by the Group. In order to be classified as assets held for sale, assets must meet all of the following conditions: the sale is highly probable; it is available for immediate sale; it is being actively marketed; and the sale is likely to occur within one year.

Assets that qualify as held for sale and related liabilities are disclosed separately from other assets and liabilities in the balance sheet prospectively from the date of classification. Non-current assets determined as held for sale are measured at the lower of carrying value and fair value less costs to sell, no depreciation is charged in respect of these assets after classification as held for sale.

Assets or groups of assets and related liabilities that qualify as held for sale are classified as discontinued operations when they represent a separate major line of business or geographical area, are part of a single plan to dispose of a separate major line of business or geographical area or are acquired exclusively with a view to resale. Income and expenses relating to these discontinued operations are disclosed in a single net amount after taxes in the income statement, with comparative amounts re-presented accordingly.

Intra-Group balances and any unrealised gains and losses or income and expenses arising from trading between continuing and discontinued operations continue to be eliminated in preparing the consolidated financial statements.

A1. Basis of consolidation and significant accounting policies continued

A1.2. Significant accounting policies continued

Intangible assets (note 13)

Goodwill and impairment testing

Goodwill arising on a business combination represents the excess of the cost of acquisition over the Group's interest in the fair value of the identifiable assets, liabilities and contingent liabilities of a subsidiary, associate or joint venture at the date of acquisition. Following initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is reviewed for impairment at least on an annual basis.

For the purpose of impairment testing, goodwill is allocated on initial recognition to the cash-generating units (CGUs) or groups of CGUs expected to benefit from the combination's synergies. The CGUs (or groups of CGUs) used for goodwill impairment testing purposes will represent how goodwill was attributed but may not represent reportable business segments.

Goodwill may also arise upon investments in joint arrangements and associates. Goodwill arising on a joint operation is recorded as a separate asset and any impairment loss is recognised in the income statement. Goodwill arising on a joint venture or associate is recorded within the carrying amount of the Group's investment and any impairment loss is included within the share of result from joint ventures and associates. On disposal or closure of a previously acquired investment or business, any attributed goodwill will be included in determining the profit or loss on disposal.

Allowances and certificates

Allowances and certificates consist of purchased carbon emissions allowances and generated or purchased obligations certificates. These allowances and certificates will be utilised in settlement of environmental obligations incurred by the Group's Thermal and SSE Business Energy businesses.

The EU Emissions Trading Scheme (EU ETS) has been in operation since 1 January 2005, with the Group operating under the established EU ETS carbon pricing system from that date. Since 1 January 2021, following Brexit, the UK Government has established a UK Emissions Trading Scheme (UK ETS) to replace the EU ETS with the Group's UK generation assets now operating under the UK ETS carbon pricing system. The Group continues to hold EU ETS certificates to settle obligations arising through the activities of its Irish Thermal generation assets. Carbon allowances purchased are recorded at cost within intangible assets. Forward carbon contracts are measured at fair value with gains or losses arising on re-measurement being recognised in the income statement. A liability is recognised based on the level of emissions recorded. Up to the level of allowances held, including forward carbon contracts, the liability is measured at the cost of purchase. When the carbon emission liability exceeds the carbon allowances held, the difference is measured at market value selling price. Subsequent movements in market value are prospectively recognised in operating profit.

The carbon allowance intangible asset is surrendered at the end of the compliance period to the extent requested reflecting the consumption of the economic benefit and is recorded as being utilised. As a result, no amortisation is booked but an impairment charge may be recognised should the carrying value of allowances exceed market or fair value.

Under the Renewable Obligations Certificates (ROCs) scheme, certificates obtained from own generation are awarded by a third party, Ofgem. ROCs can be traded with third parties and are ultimately used by suppliers to demonstrate to Ofgem that they have met their obligation to source a set proportion of the electricity they supply from renewable sources. The value of a ROC to a supplier comprises two elements: the "buy-out" price which is set annually in advance of the compliance period by Ofgem; and the "recycle" price which is determined after the compliance period by Ofgem. The recycle price element is estimated at the balance sheet date based on assumptions at that point in time around likely levels of renewable generation and supply over the remaining compliance period, and is therefore subject to possible future variation.

Where ROCs are self-generated or purchased to fulfil the Group's liability under the renewable obligation, they are recorded at market value at the point of generation or purchased within intangible assets. The Group can hold ROCs in excess of the Group's renewables obligation, which, due to limited evidence of liquidity or net settlement for ROC trades, are recorded at the lower of cost or net realisable value within inventories. Similarly, the fair value of any forward contracts entered into at the balance sheet date for the purchase or sale of ROCs in future periods are not recognised, as there is insufficient liquidity for net settlement. The Group's liability under the renewable obligation is recognised based on electricity supplied to customers, the obligation level set by Ofgem and the prevailing market price.

The Group's SSE Business Energy segment has a requirement under certain customer supply agreements to demonstrate the origin of electricity supplied to customers generated by renewable sources. Renewable Energy Guarantees of Origin ('REGO') certificates are procured from third parties or generated by the Group's Renewable accredited assets and retained for surrender under the scheme. Tickets that are held to be surrendered are recorded as intangible assets are recorded at cost, in line with the expense recognised by SSE Business Energy during the period. Excess tickets held by the Group are held in inventories at the lower of cost or net realisable value.

The ROCS and REGO intangible assets are surrendered at the end of the compliance period reflecting the consumption of economic benefit and release of the associated liability. As a result, no amortisation is recorded during the period.

Research and development

Expenditure on research activities is charged to the income statement as incurred.

Expenditure on development activities is capitalised as intangible assets if the project or process is considered to be technically and commercially feasible and the Group intends to complete the project or process for use or for sale. Development projects include wind farm developments, battery storage and solar developments, thermal generation projects and other developments relating to proven technologies. Costs incurred in bringing these projects to the consent stage include options over land rights, planning application costs and environmental impact studies and may be costs incurred directly or part of the fair value exercise on acquisition of an interest in a project. At the point that the project reaches the consent stage and is approved by the Board, the carrying value of the project is transferred

to property, plant and equipment as assets under construction. Revenue and costs incurred through pre-commissioning testing activities are reflected in the income statement. Once in operation, depreciation will be charged over the expected useful life of the asset. The asset is derecognised on disposal, or when no future economic benefits are expected to arise.

Other intangible assets

Other intangible assets that have been acquired separately by the Group are stated at cost less accumulated amortisation and impairment losses. Expenditure on internally generated brands or customer lists are expensed as incurred. Expenditure on internally developed software assets and application software licences includes contractors' fees and directly attributable labour and overheads. Amortisation is charged to the income statement on a straight-line basis over the estimated useful life of these assets. The amortisation periods utilised are as follows:

	Years
Brands	10
Customer lists	Contract term
Developed software assets and application software licences	3–15

The useful lives of all the intangible assets are reviewed annually and amended, as required, on a prospective basis. Intangible assets are derecognised on disposal, or when no future economic benefits are expected from their use.

Cloud computing arrangements

The Group has contracts for Software as a Service (SaaS) and Platform as a Service (PaaS) Cloud Computing Arrangements. Where the Group does not control the underlying assets in these arrangements, costs are expensed as incurred. Implementation costs in respect of these contracts are capitalised when the definition and recognition criteria of an intangible asset under IAS 38 are met.

Property, plant and equipment (note 14)

Owned assets

Items of property, plant and equipment are stated at cost less accumulated depreciation and impairments. The cost of self-constructed assets includes the cost of materials, direct labour and other directly attributable costs. Where the asset is a qualifying asset, for which a considerable period of time is required to prepare the asset for use or sale, borrowing costs will be capitalised as part of the asset's cost. Where an item of property, plant and equipment comprises major components having different useful lives, the components are accounted for as separate items of property, plant and equipment, and depreciated accordingly. An item of property, plant and equipment is derecognised on disposal or when no future economic benefits are expected to arise from the continued use of the asset.

Right of use assets

Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Where a modification to a lease agreement decreases the scope of the lease, the carrying amount of the right of use asset is adjusted and a gain or loss is recognised in proportion to the decrease in scope of the lease. All other modifications to lease agreements are accounted for as a reassessment of the lease liability with a corresponding adjustment to the right of use asset.

Hydro civil assets

The Group is obliged under the Reservoirs Act 1975 to maintain its hydro infrastructure network, including its dams, tunnels and other hydro civil engineering structures (hydro civil assets). All items of property, plant and equipment within hydro civil assets, with the exception of land, are subject to depreciation.

In accordance with the transition provisions of IFRS 1 "First-time Adoption of IFRS", the Group identified the carrying value of these assets at privatisation and has treated this value as deemed cost. Following this assessment, the assets, and all subsequent enhancement and replacement expenditure, has been subject to depreciation over a useful economic life of 75 years. All subsequent maintenance expenditure is chargeable directly to the income statement.

Depreciation

Depreciation is charged to the income statement to write off cost, less residual values, on a straight line basis over their estimated useful lives. Heritable and freehold land is not depreciated. Depreciation policy, useful lives and residual values are reviewed at least annually, for all asset classes to ensure that the current method is the most appropriate. Depreciation commences following the asset commissioning period and when the asset is available for commercial operation. The estimated useful lives for assets depreciated on a straight line basis are as follows:

	Years
Hydro civil assets (classified within Renewable power generation assets)	75 to 100
Thermal and hydro power stations including electrical and mechanical assets (classified within Thermal power generation assets)	20 to 60
Onshore wind farms (classified within Renewable power generation assets)	20 to 25
Offshore wind farms (classified within Renewable power generation assets)	23 to 30
Gas storage facilities (classified within Other assets)	25 to 50
Overhead lines, underground cables and other network assets (classified within Distribution or Transmission network assets)	5 to 80
Office buildings (classified within Land and buildings)	30 to 40
Fixtures, IT assets, vehicles and mobile plant (classified within Other assets)	3 to 15

Assets held under leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, over the term of the relevant lease agreement.

A1. Basis of consolidation and significant accounting policies continued

A1.2. Significant accounting policies continued

Property, plant and equipment (note 14) continued

Subsequent expenditure

It is the Group policy to capitalise qualifying replacement expenditure and depreciate it over the expected useful life of the replaced asset. Replaced assets are derecognised at this point and the costs recorded as costs of disposal. Where an item of property, plant and equipment is replaced and it is not practicable to determine the carrying amount of the replaced part, the cost of the replacement adjusted for inflation will be used as an approximation of the cost of the replaced part at the time it was acquired or constructed.

Expenditure incurred to replace a component of an item of property, plant and equipment that is accounted for separately is capitalised. Other subsequent expenditure is capitalised only when it increases the future economic benefits of the item of property, plant and equipment to which it relates. Maintenance and repair costs are expensed as incurred.

Derecognition

An item of property, plant or equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Gains and losses on disposals are determined by comparing the proceeds received with the carrying amount of the asset and are included in the income statement. Any gain or loss on derecognition of the asset is included in the income statement in the period of derecognition.

Lease arrangements (note 21)

Lease arrangements are separately distinguished from service contracts based on whether the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. If the Group is deemed to control the use of an identified asset, a right of use asset and a corresponding lease liability are recognised on the balance sheet.

Right of use assets are capitalised and held as part of property, plant and equipment. The accounting policy for such arrangements is described on [page 277](#).

Lease liabilities are initially measured at the present value of the future lease payments discounted using the rate implicit in the lease if that can be readily determined. If the interest rate implicit in the lease cannot be readily determined the incremental borrowing rate is used. Where the interest rate implicit in the lease is not readily determinable, the Group has applied the intercompany borrowing rate which is based on the Group's external medium-term borrowing rates with premia adjustments for any subsidiary specific risk factors.

In determining whether any break and/or extension clauses should be included within the lease term, the Group has considered that where an internal decision has been made to break or extend the lease agreement, that decision shall be applied in determining the appropriate lease term. Where an internal decision has not been made, and where the non-cancellable element of the lease term has longer than five years remaining, it is considered that any clauses will not be triggered as any decision beyond that date is not reasonably certain. For all leases with less than five years remaining, an assessment is made at each reporting period on a lease-by-lease basis on whether the clause is reasonably certain to be triggered. Reassessment of break and/or extension judgements made in prior periods could result in recalculation of the lease liability and adjustments to associated balances.

The lease liability is subsequently adjusted for the unwind of discounting, repayments and other modifications to the underlying agreement. Lease modifications are accounted for as a separate lease where the scope of the lease increases through the right to use one or more underlying assets and where the consideration of the lease increases by an amount that is equivalent to the standalone price of the increase in scope. Where a modification decreases the scope of the lease, the carrying amount of the right of use asset is adjusted and a gain or loss is recognised in proportion to the decrease in scope of the lease. All other modifications are accounted for as a reassessment of the lease liability with a corresponding adjustment to the right of use asset.

Leases with a duration of 12 months or less and leases for assets which are deemed "low value" are expensed to the income statement on a straight-line basis over the lease term.

Impairment review (note 15)

The carrying amounts of the Group's property, plant and equipment and other intangible assets and the Group's investments in joint ventures and associates, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable, or where there are indications that a previously recognised impairment loss has reduced. For property, plant and equipment assets that have previously been identified as exhibiting indications of impairment, the review of impairment will be performed annually until there is sufficient evidence to confirm that any potential impairment loss has been appropriately recognised, or until previously recognised impairment losses have been fully written back. For goodwill and other intangible assets with an indefinite life or which are not yet ready for use, the test for impairment is carried out annually. In addition, financial assets measured at amortised cost are also reviewed for impairment annually.

For assets subject to impairment testing, the asset's carrying value is compared to the asset's (or cash-generating unit's, in the case of goodwill), recoverable amount. The recoverable amount is determined to be the higher of the fair value less costs to sell ('FVLCS') and the value-in-use ('VIU') of the asset or cash-generating unit ('CGU'). For financial assets measured at amortised cost the impairment is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate.

If the carrying amount of the asset or CGU exceeds its recoverable amount, an impairment charge will be recognised immediately in the income statement. Reversals of previous impairment charges are recognised if the recoverable amount of the asset or CGU significantly exceeds the carrying amount. Previous impairments of goodwill are not reversed.

Value in use ('VIU') calculations require the estimation of future cash flows to be derived from the respective assets (or CGUs) and the selection of an appropriate discount rate in order to calculate their present value. The VIU methodology is consistent with the approach taken by management to evaluate economic value and is deemed to be the most appropriate for reviews of property, plant and equipment assets and the Group's identified goodwill-related CGUs. The methodology is based on the pre-tax cash flows arising from the specific assets, underlying assets or CGUs, and discounted using a pre-tax discount rate based on the Group's cost of funding and adjusted for any specific risks. The estimation of the timing and value of underlying projected cash flows and the selection of appropriate discount rates involves management judgement. Subsequent changes to these estimates or judgements may impact the carrying value of the assets.

The fair value less costs to sell methodology also uses a present value technique, unless there is a quoted price in an active market for that asset. The methodology is based on the post-tax cash flows arising from the specific assets, underlying assets or CGUs, and discounted using a post-tax discount rate determined in the same manner as the rates used in the VIU calculations, adjusted for the relevant taxation rate.

Any impairment charge identified will initially be adjusted against the goodwill allocated to the cash-generating unit. Any excess charge will be allocated against the remaining assets of the cash-generating unit. Reversals of previous impairment charges are allocated against the carrying value of assets previously subject to an impairment charge.

Inventories (note 17)

Inventories – aside from inventory purchased by the Gas Storage business for trading activities – are valued at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

Gas inventory purchased by the Gas Storage business for trading activities is held at fair value with reference to the forward month market price. Gains and losses on remeasurement at fair value are recognised within the Income Statement, as a "certain remeasurement" item.

Provisions (note 20)

A provision is recognised in the balance sheet when the Group has a present legal or constructive obligation as a result of a past event, it can be measured reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

Decommissioning

The Group engages independent experts to estimate the cost to decommission its Renewable, Thermal and Gas Storage assets every three years. In the intervening years, management updates the external valuation based on factors arising since the last formal valuation date. Provision is made for the net present value of the estimated cost of decommissioning gas storage facilities, wind farms and power stations at the end of the useful life of the facilities. This includes development assets, where if a present obligation exists, a provision is recognised during construction and prior to commencement of operations from the site. The estimates are based on technology and prices at the balance sheet date and exclude any salvage value related to those assets. A corresponding decommissioning asset is recognised and is included within property, plant and equipment when it gives access to future economic benefits, and is depreciated on a straight-line basis over the expected useful life of the asset. Changes in these provisions are recognised prospectively. The unwind of discounting of the provision is included in finance costs.

The Group retained a decommissioning obligation following the disposal of its Gas Production business. The decommissioning cost estimates are updated periodically by field operators based on current technology and prices. Field operators also provide estimated end of field life dates for each field, which can change based on market commodity prices.

Retirement benefit obligations (note 23)

Defined benefit pension schemes

The Group operates two defined benefit pension schemes, one of which is operated by the Company. Pension scheme assets are measured using bid market values. Pension scheme liabilities are measured using the projected unit credit actuarial method and are discounted at the current rate of return on a high quality corporate bond of equivalent term and currency to the liability.

Any increase in the present value of liabilities within the Group's defined benefit pension schemes expected to arise from employee service in the year is charged as service costs to operating profit.

Net interest costs are based on net scheme assets or liabilities, adjusted for minimum funding requirement and pension surplus restrictions under IFRIC 14 'IAS 19—The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction'. Actuarial gains and losses are recognised in full in the consolidated statement of comprehensive income. Pension scheme surpluses, to the extent that they are considered recoverable, or deficits are recognised in full and presented on the face of the balance sheet.

Defined contribution pension schemes

The Group also operates a number of defined contribution pension schemes. The assets of the schemes are held separately from those of the Group in independently administered funds. The amounts charged represent the contributions payable to the schemes in the year and are charged directly to the income statement.

A1. Basis of consolidation and significant accounting policies continued

A1.2. Significant accounting policies continued

Retirement benefit obligations (note 23) continued

Equity and equity-related compensation benefits

The Group operates a number of employee share schemes as described in the Remuneration Report. These schemes enable Group employees to acquire shares of the Company.

The exercise prices of the sharesave scheme are set at a discount to market price at the date of the grant. The fair value of the sharesave scheme option granted is measured at the grant date by use of a Black-Scholes model. The fair value of the options granted is recognised as an expense on a straight-line basis over the period that the scheme vests. Estimates are updated for non-market conditions at each balance sheet date with any adjustment in respect of the current and prior years being recognised in the income statement. The costs associated with the other main employee schemes are recognised over the period to which they relate. The charge related to the equity shares in the Company awarded under the share schemes is treated as an increase in the cost of investment held by the Company in the subsidiary companies of the Group. The disclosures on equity and equity-related compensation benefits have been removed on the grounds of materiality in relation to the Group.

Financial instruments (note 24)

The Group uses a range of financial instruments to hedge exposures to financial risks, such as interest rate, foreign exchange and energy price fluctuations in its normal course of business and in accordance with the Group's risk management policies. The Group's risk management policies are further explained in [A6](#).

The Group's review of the IFRS 9 hedge accounting model concluded that, whilst adoption would not change the treatment of existing hedging arrangements, the changes made would not result in any additional hedge designations either. As such, the existing hedge accounting model under IAS 39 appropriately reflects the Group's risk management activities in the financial statements. Therefore, as permitted by IFRS 9, the Group has elected to continue to apply the hedge accounting requirements of IAS 39. This policy choice will be periodically reviewed to consider any changes in our risk management activities.

Interest rate and foreign exchange derivatives

Financial derivative instruments are used by the Group to hedge interest rate and currency exposures. All such derivatives are recognised at fair value and are re-measured to fair value each reporting period. Certain derivative financial instruments are designated as being held for hedging purposes. The designation of the hedge relationship is established at the inception of the hedge and procedures are applied to ensure the derivative is highly effective in achieving its objective and that the effectiveness of the hedge can be reliably measured. The treatment of gains and losses on re-measurement is dependent on the classification of the hedge and whether the hedge relationship is designated as either a 'fair value' or 'cash flow' hedge. Derivatives that are not designated as hedges are treated as if held for trading, with all fair value movements being recorded through the income statement.

A derivative classified as a 'fair value' hedge recognises gains and losses from re-measurement immediately in the income statement. Loans and borrowings are measured at cost except where they form the underlying transaction in an effective fair value hedge relationship. In such cases, the carrying value of the loan or borrowing is adjusted to reflect fair value movements with the gain or loss being reported in the income statement.

A derivative classified as a 'cash flow' hedge recognises the portion of gains or losses on the derivative which are deemed to be effective directly in equity in the hedge reserve. Any ineffective portion of the gains or losses is recognised in the consolidated income statement. When hedged cash flows result in the recognition of a non-financial asset or liability, the associated gains or losses previously recognised in equity are included in the initial measurement of the asset or liability. For all other cash flow hedges, the gains or losses that are recognised in equity are transferred to the income statement in the same period in which the hedged cash flows affect the income statement.

Hedge accounting is discontinued when the hedging instrument expires, or is sold, terminated or exercised, or no longer qualifies for hedge accounting. At the point of discontinuation, any cumulative gain or loss on the hedging instrument recognised in equity remains in equity until the forecast transaction affects profit or loss. On settlement, the cumulative gain or loss recognised in equity is recognised in the income statement.

Commodity derivatives

Within its regular course of business, the Group routinely enters into sale and purchase derivative contracts for commodities such as electricity, gas, carbon allowances and oil. Where the contract was entered into and continues to be held for the purpose of receipt or delivery in accordance with the Group's expected sale, purchase or usage requirements, the contracts are designated as 'own use' contracts and are measured at cost. These contracts are not within the scope of IFRS 9.

Derivative commodity contracts which are not designated as own use contracts are accounted for as trading derivatives and are recognised in the balance sheet at fair value. Where a hedge accounting relationship is designated and is proven to be effective, the changes in fair value will be recognised in accordance with the rules noted above. There are currently no designated hedge relationships in relation to commodity contracts.

Other commodity contracts, where own use is not established and a hedge accounting relationship is not designated, are measured at fair value with gains and losses on re-measurement being recognised in the income statement in cost of sales.

Embedded derivatives

Derivatives embedded in other financial instruments or other host contracts are treated as separate derivatives where the characteristics of the derivatives are not closely related to those of the host contracts.

Net investment hedges

Hedges of net investments in foreign operations are accounted in a manner similar to effective cash flow hedges. Any gain or loss on the effective portion of the hedge is recognised in equity, in the translation reserve, and any gain or loss on the ineffective portion of the hedge is recognised in the income statement. On disposal of the foreign operation, the cumulative value of any gains or losses recognised directly in equity is transferred to the income statement.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits. Bank overdrafts that are repayable on demand and form an integral part of the Group's cash management are included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

Trade receivables

Trade receivables do not carry any interest and are measured at cost less an appropriate allowance for lifetime expected credit losses.

At the end of each reporting period a review of the allowance for impairment of trade receivables (or bad debt provision) is performed by the respective businesses. Trade receivables do not contain a significant financing element, and therefore expected credit losses are measured using the simplified approach permitted by IFRS 9, which requires lifetime expected credit losses to be recognised on initial recognition. A provision matrix is utilised to estimate the lifetime expected credit losses, based on the age, status and risk of each class of receivable, which is updated periodically to include changes to both forward-looking and historical inputs.

Interest-bearing loans and borrowings

All such loans and borrowings are initially recognised at fair value including transaction costs and are subsequently measured at amortised cost, except where the loan or borrowing is the hedged item in an effective fair value hedge relationship.

Commercial (and affiliate) contracts for difference

The Group has commercial Contracts for Difference (CfD) arrangements in place where the Group has agreed to provide a revenue support contract. Where the Group has entered into these arrangements and there is no relationship with a government entity, the instruments are classified as derivatives and accounted for under IFRS 9. The Group has assessed that due to the valuation complexity of these arrangements, they are Level 3 financial instruments in the fair value hierarchy. On day 1, the Group recognises no gain or loss arising from the instrument, but instead defers this gain or loss and recognises it progressively over the life of the instrument. At each balance sheet date the fair value of the instrument is assessed with any movement in fair value recognised in the income statement in the period it arises.

Seagreen Wind Energy Limited entered commercial operation in the current year and the day 1 gain on the commercial CfD arrangements is being recognised on a straight-line basis over the life of the instrument.

Financial guarantee liabilities

On 1 April 2023, the Group adopted IFRS 17 on a modified retrospective basis from the earliest period presented in these financial statements.

The Group issues financial guarantee contracts to make specified payments to reimburse holders for losses incurred if certain former subsidiaries and certain current joint venture investments fail to make payments when due in accordance with the original or modified terms of a debt instrument.

Prior to adoption of IFRS 17, these contracts were designated as insurance contracts under IFRS 4, where the contracts were treated as contingent liabilities until such time as it became probable the Group would be required to make payment to settle the obligation.

On transition to IFRS 17, the Group elected to apply IFRS 9 "Financial Instruments" to these contracts, as available under the transition arrangements of the new standard.

The financial guarantee contract is initially measured at fair value and subsequently measured at the higher of:

1. the loss allowance for expected credit losses, and
2. the initial fair value less any income recognised.

Share capital

Ordinary shares are accounted for as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction from the proceeds received. Own equity instruments that are reacquired are deducted from equity. No gain or loss is recognised in the Group Income Statement on the purchase, sale, issue or cancellation of the Group's own equity instruments.

Hybrid equity

Hybrid equity comprises issued bonds that qualify for recognition as equity. Accordingly, any coupon payments are accounted for as dividends and are recognised directly in equity at the time the payment obligation arises. This is because the coupon payments are discretionary and relate to equity. Coupon payments consequently do not have any impact on the income statement. Coupon payments are recognised in the cash flow statement in the same way as dividends to ordinary shareholders. Tax credits in relation to the coupon payments are linked to the past transactions or events that support the coupon payments and consequently the tax credits are reported in the income statement.

ACCOMPANYING INFORMATION – CONTINUED

A2. Taxation

The Group's primary tax disclosures are included at note 10. The following tables represent enhanced disclosures adopted in order to assist stakeholder understanding of the Group's tax position and policies as part of the Group's commitment to its Fair Tax Mark accredited status.

Reconciliation of tax charge to adjusted underlying current tax

	2024 £m	2024 %	2023 £m	2023 %
Group profit/(loss) before tax	2,495.1		(205.6)	
Less: share of results of associates and jointly controlled entities	(114.1)		(662.3)	
Profit/(loss) before tax	2,381.0		(867.9)	
Tax on profit/(loss) on ordinary activities at standard UK corporation tax rate of 25% (2023: 19%)	595.3	25.0	(164.9)	19.0
Tax effect of:				
Capital allowances less than depreciation	(55.7)	(2.3)	(41.6)	4.8
Movement in restructuring and settlement provisions	(0.6)	–	(1.6)	0.2
Non-taxable gain on sale of assets	(4.5)	(0.2)	–	–
Fair value movements on derivatives (including prior period adjustment)	(123.3)	(5.2)	448.8	(51.7)
Pension movements	(8.9)	(0.4)	(6.7)	0.8
Relief for capitalised interest and revenue costs	(38.0)	(1.6)	(27.5)	3.2
Hybrid equity coupon payments	(18.3)	(0.8)	(7.4)	0.9
Expenses not deductible for tax purposes	54.9	2.3	79.7	(9.3)
Utilisation of tax losses brought forward	(3.7)	(0.2)	0.1	–
Impact of foreign tax rates	(36.8)	(1.5)	(0.1)	–
Permanent benefit of super-deduction capital allowances	–	–	(5.1)	0.6
Adjustments to tax charge in respect of previous years	(25.6)	(1.0)	(16.7)	1.9
Other items	1.0	–	(2.3)	0.3
Reported current tax charge and effective rate	335.8	14.1	254.7	(29.3)
Depreciation in excess of capital allowances	74.5	3.1	34.3	(4.0)
Movement in provisions	0.6	–	1.6	(0.2)
Fair value movements on derivatives (including prior period adjustment)	123.3	5.2	(448.8)	51.7
Pension movements	8.9	0.4	6.7	(0.8)
Relief for capitalised interest and revenue costs	38.0	1.6	27.5	(3.2)
Impact of foreign tax rates	1.8	0.1	(12.8)	1.5
Adjustments to tax charge in respect of previous years	23.2	0.9	7.0	(0.8)
Change in rate of UK corporation tax	–	–	9.0	(1.0)
Tax losses utilised	5.1	0.2	1.9	(0.2)
Other items	(0.5)	–	8.9	(1.0)
Reported deferred tax credit and effective rate	274.9	11.5	(364.7)	42.0
Group tax charge/(credit) and effective rate	610.7	25.6	(110.0)	12.7

Included within 'Expenses not deductible for tax purposes' is £65m in respect of impairment of investments in joint ventures.

As noted at note 3 to the accounts, the Group's results are reported on an 'adjusted' basis in order to allow focus on underlying business performance. The following table explains the adjustments that are made in order to arrive at adjusted profit before tax. This is the measure utilised in calculation of the Group's 'adjusted effective rate of tax'.

	2024 £m	2023 £m
Profit/(loss) before tax	2,495.1	(205.6)
Add/(less):		
Exceptional items and certain re-measurements	(262.8)	2,312.8
Share of tax from jointly controlled entities and associates before exceptional items and certain re-measurements	74.1	143.1
Depreciation charge on fair value uplifts	19.0	28.8
Share of profit attributable to non-controlling interests	(134.4)	(28.8)
Adjustment to Gas Production decommissioning provision	9.9	(50.5)
Interest income on pension scheme assets/(liabilities)	(26.2)	(16.2)
Adjusted profit before tax ^{APM}	2,174.7	2,183.6

The adjusted current tax charge can therefore be reconciled to the adjusted profit before tax as follows:

	2024 £m	2024 %	2023 £m	2023 %
Adjusted profit before tax	2,174.7		2,183.6	
Tax on profit on ordinary activities at standard UK corporation tax rate	543.7	25.0	414.9	19.0
Tax effect of:				
Capital allowances in excess of depreciation	(107.5)	(4.9)	(41.7)	(1.9)
Non-taxable gain on sale of assets	(4.7)	(0.2)	(0.6)	–
Non qualifying depreciation	12.5	0.5	5.7	0.2
Adjustment for profit on internal trading	2.5	0.1	6.3	0.3
Movement in restructuring and settlement provisions	0.8	0.1	6.0	0.3
Pension movements	(2.4)	(0.1)	(3.6)	(0.2)
Relief for capitalised interest and revenue costs	(23.2)	(1.1)	(12.7)	(0.6)
Hybrid equity coupon payments	(18.3)	(0.8)	(7.4)	(0.3)
Expenses not deductible for tax purposes	23.6	1.1	24.1	1.1
Permanent benefit of super-deduction capital allowances	1.4	0.1	(7.0)	(0.3)
Losses carried back to earlier years	7.2	0.3	3.9	0.2
Adjustments to tax charge in respect of previous years	(25.6)	(1.2)	(22.0)	(1.1)
Impact of foreign tax rates	(37.9)	(1.7)	(9.4)	(0.4)
Other	(1.1)	(0.1)	2.3	0.1
Adjusted current tax charge and effective rate APM	371.0	17.1	358.8	16.4

The above reconciling adjustments differ from those analysed in the Group tax charge reconciliation above because they include SSE's share of associates and joint ventures, and are based on adjusted profit before tax.

The majority of the Group's profits are earned in the UK, with the standard rate of UK corporation tax being 25% for the year to 31 March 2024 (2023: 19%). Profits earned by the Group in the Republic of Ireland are taxable at either 12.5% or 25%, depending upon the nature of the income.

Capital allowances are tax reliefs provided in law for the expenditure the Group makes on property, plant and equipment. The rates are determined by Parliament annually and spread the tax relief due over a number of years. This contrasts with the accounting treatment for such spending, where the expenditure on property, plant and equipment is treated as an asset with the cost being depreciated over the useful life of the asset, or impaired if the value of such assets is considered to have reduced materially.

The different accounting treatment of property, plant and equipment for tax and accounting purposes means that the taxable income of the Group is not the same as the profit reported in the financial statements. The substantial reversals of impairments and impairments undertaken in previous years in relation to certain property, plant and equipment assets, result in the depreciation or impairment charge to profit for the year differing to the amount of capital allowances due to the Group.

Short term temporary differences arise on items such as provisions for restructuring costs and onerous contracts, and retirement benefit obligations, because the treatment of such items is different for tax and accounting purposes. These differences usually reverse in the year following that in which they arise, as is reflected in the deferred tax charge in these financial statements. Where interest charges or other costs are capitalised in the accounts, tax relief is either given as the charges are incurred or when the costs are taken to the income statement.

As explained at Accompanying Information [A1](#) and [A6](#), the Group measures its operating and financing derivatives at fair value under IFRS 9. As a result of the Group's subsidiaries applying the HMRC's "disregard regulations", the vast majority of the re-measurement movements have no current tax effect impacting only the deferred tax position.

As detailed at note 22 and explained in the Accompanying Information [A1](#), the Group has issued Hybrid equity securities which are treated as a component of equity. While the coupon payments relating to these securities are treated as distributions to the holders of the equity instruments, tax relief is allowed on the amount paid in the year. These tax credits are linked to the past transactions or events that support the coupon payments and consequently the tax credits are reported in the income statement.

ACCOMPANYING INFORMATION – CONTINUED

A4. Joint ventures and associates continued

In addition to the above at 31 March 2024, the Group was owed the following loans from its principal joint ventures: Marchwood Power Limited £12.2m (2023: £25.7m); Clyde Windfarm (Scotland) Limited £127.1m (2023: £127.1m); Dunmaglass Wind Farm Limited £46.6m (2023: £46.6m); Stronelairg Wind Farm Limited £88.7m (2023: £88.7m); Neos Networks Limited £57.7m (2023: £56.0m); Seagreen Wind Energy Limited £686.4m (2023: £593.1m); SSE Slough Multifuel Limited £157.8m (2023: £128.0m) and Doggerbank A Offshore Windfarm Limited £87.7m (2023: £nil).

This represents 93% (2023: 96%) of the loans provided to equity-accounted joint ventures and associates.

A5. Related party transactions

The immediate parent and ultimate controlling party of the Group is SSE plc (incorporated in Scotland). Balances and transactions between the Company and its subsidiaries, which are related parties of the Company, have been eliminated on consolidation and are not disclosed in this note. Details of transactions between the Group and other related parties are disclosed below.

Trading transactions

The following transactions took place during the year between the Group and entities which are related to the Group, but which are not members of the Group. Related parties are defined as those in which the Group has control, joint control or significant influence over.

Other Joint Ventures	18.0	(209.4)	6.7	(63.9)	14.0	(219.2)	1.1	(50.8)

The transactions with Marchwood Power Limited relate to the contracts for the provision of energy or the tolling of energy under power purchase arrangements.

Details of the Group's 15-year Affiliate Contract for Difference agreement with Seagreen Wind Energy Limited are included in note A7.2. [🔗](#)

The amounts outstanding are trading balances, are unsecured and will be settled in cash. No provisions have been made for doubtful debts in respect of the amounts owed by related parties. Aggregate capital loans to joint ventures and associates are shown in note 16.

A6. Financial risk management

This note presents information about the fair value of the Group's financial instruments, the Group's exposure to the risks associated with those instruments, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital. Further qualitative disclosures are included throughout these consolidated financial statements.

The Group has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Commodity risk
- Currency risk
- Interest rate risk

The Board has overall responsibility for the establishment and oversight of the Group's risk management framework. The Group's policies for risk management are established to identify the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Exposure to commodity, currency and interest rate risks arise in the normal course of the Group's business and derivative financial instruments are entered into to hedge exposure to these risks.

SSE has a Group wide Risk Committee reporting to the Group Executive Committee, which is responsible for reviewing the strategic, market, credit, operational and liquidity risks and exposures that arise from the Group's operating activities. In addition, the Group has two dedicated Energy Market risk committees reporting to the Group Executive Committee and Board respectively, with the Group Executive Sub-committee chaired by the Chief Financial Officer (the "Group Energy Markets Exposures Risk Committee") and the Board Sub-committee chaired by Non-Executive Director Tony Cocker (the "Energy Markets Risk Committee (EMRC)"). These Committees oversee the Group's management of its energy market exposures, including its approach to hedging.

During the year ended 31 March 2024, the Group continued to be exposed to the economic conditions impacting the primary commodities to which it is exposed (Gas, Carbon and Power). The Group's approach to hedging, and the diversity of its energy portfolios (across Wind, Hydro, Thermal and Customers) has provided certain mitigation of these exposures.

At 31 March, the Group's collateral position was as follows:

	Note	2024 £m	2023 £m
Collateral posted included within trade and other receivables	18	9.3	316.3
Collateral held included within trade and other payables	19	(362.5)	–
Net collateral posted		(353.2)	316.3

Exposure to the commodity, currency and interest rate risks noted arise in the normal course of the Group's business and derivative financial instruments are entered into to hedge exposure to these risks. The objectives and policies for holding or issuing financial instruments and similar contracts, and the strategies for achieving those objectives that have been followed during the year are explained below.

A6.1. Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty fails to meet its contractual obligations.

Credit risk arising from the Group's normal commercial operations is controlled by individual business units operating in accordance with Group policies and procedures. Generally, for significant contracts, individual business units enter into contracts or agreements with counterparties having investment grade credit ratings only, or where suitable collateral or other security has been provided. Counterparty credit validation is undertaken prior to contractual commitment.

Credit risk management for the Group's SSEN Transmission and SSEN Distribution businesses is performed in accordance with industry standards as set out by the Regulator and is financially controlled by the individual business units. The Group's greatest credit risks lie with the operations of the Customers business, the wholesale procurement activities conducted by SSE Energy Markets under a trust arrangement and the activities carried out by the Group's Treasury function. In all cases, specific credit risk controls that match the risk profile of those activities are applied. Exposure to credit risk in the retail supply of electricity and gas to end user customers arises from the potential of a customer defaulting on their invoiced payables. The Group exposure to domestic retail supply customers is limited to customers of the Group's Airtricity business. The creditworthiness of these customers is reviewed from a variety of internal and external information. The financial strength and creditworthiness of business customers is assessed prior to commencing, and for the duration of, their contract of supply.

Exposure to credit risk in the procurement of wholesale energy and fuel is managed by reference to agreed transaction credit limits which are determined by whether the counterparty:

- holds an investment grade credit rating; or
- can be assessed as adequately creditworthy in accordance with internal credit rules using information from other external credit agencies; or
- can provide a guarantee from an investment grade rated entity or post suitable collateral or provide other acceptable assurances in accordance with group procedures where they have failed to meet the above conditions; or
- can be allocated a non-standard credit limit approved by the relevant authority as delegated by the Group Board.

Credit support clauses and Master Netting Agreements are typically included or entered into in order to mitigate the impact to the Group against counterparty failure or non-delivery. As part of its normal activities, SSE Energy Markets transacts significant volumes of commodity derivative products through cleared exchanges to mitigate credit risk. Such exchanges are subject to strict regulation by the UK Financial Conduct Authority (FCA) and participants in these exchanges are obliged to meet rigorous capital adequacy requirements.

Individual counterparty credit exposures are monitored regularly and are subject to approved limits. At 31 March 2024, SSE Energy Markets had pledged no cash collateral (2023: £316.3m) and £459.9m (2023: £443.6m) of letters of credit, and had received £353.2m (2023: none) of cash collateral and £130.8m (2023: £110.8m) of letters of credit principally to reduce exposures on credit risk.

Bank credit exposures, which are monitored and reported on daily, are calculated on a mark-to-market basis and adjusted for future volatility and probability of default. Any issues relating to these credit exposures are presented for discussion and review by the Tax and Treasury Committee.

Credit exposure also exists in relation to financial guarantees issued by Group companies under which the total outstanding exposure at 31 March 2024 was £684.9m (2023: £869.7m) in respect of liabilities of joint ventures and associates and £479.3m (2023: £633.3m) in respect of the liabilities of former subsidiaries. An amount of £39.5m (2023: £70.9m) is recorded as a liability at 31 March 2024 in respect of the carrying value of these guarantees. Expected loss allowances for financial guarantee contracts have been reviewed at the balance sheet date and will be reviewed on an annual basis.

ACCOMPANYING INFORMATION – CONTINUED

A6. Financial risk management continued

A6.1. Credit risk continued

Cash and cash equivalents comprise cash in hand and deposits which are readily convertible to cash. These are subject to insignificant risk of change in value or credit risk.

Derivative financial instruments are entered into to cover the Group's market risks – commodity risk, interest rate risk, currency risk – and are consequently covered elsewhere in this note.

Trade receivables represent the most significant exposure to credit risk and are stated after an allowance for impairment.

A6.2. Concentrations of risk

Trade receivables recorded by reported segment held at the 31 March were:

	2024 £m	2023 £m
SSEN Transmission	5.9	8.0
SSEN Distribution	133.5	137.2
SSE Renewables	97.9	88.3
SSE Thermal	39.1	41.0
Gas Storage	1.0	1.5
Energy Customer Solutions		
SSE Business Energy	545.4	386.9
SSE Airtricity	115.5	125.1
SSE Enterprise	12.3	31.8
SSE Energy Markets	311.7	567.5
Corporate Unallocated	43.2	16.7
Total SSE Group	1,305.5	1,404.0

Energy Customers Solution (SSE Business Energy and SSE Airtricity) accounts for 50.6% (2023: 36.5%) of the Group's trade receivables from continuing operations. Trade receivables associated with the Group's 1.1 million electricity and gas customers are recorded within this business unit. The Group also has significant trade receivables associated with its SSE Energy Markets activities which are generally settled within two to four weeks from invoicing. The Group's exposure to credit risk is therefore subject to diversification with no exposure to individual retail customers totalling >10% of trade receivables. The largest customer balance, due from a SSE Energy Markets customer (also a SSE Energy Markets supplier), is 3% (2023: 8%) of the total trade receivables.

The ageing of trade receivables at the reporting date was:

	2024 £m	2023 £m
Not past due	962.6	1,229.0
Past due but not individually impaired:		
0 – 30 days	132.5	116.3
31 – 90 days	119.9	65.6
Over 90 days	343.9	162.3
	1,558.9	1,573.2
Less: allowance for impairment	(253.4)	(169.2)
Net trade receivables	1,305.5	1,404.0

The Group has past due debt which has not had an impairment allowance set aside to cover potential credit losses. The Group has certain procedures to pursue customers in significant arrears and believes its impairment policy in relation to such balances is appropriate. The increased ageing of the trade receivables results in an increase in provisions held in respect of them under the provision matrix approach employed. The increase in aged debt across all periods is predominantly due to factors associated with the migration of SSE Business Energy customer accounts and balances to a new billing system and associated issues relating to collection activities alongside other wider economic factors such as lower levels of government support to customers. This factor and the associated increase in subjectivity related is commented upon in Note 4.3(iii). The Group also considers various risk factors when assessing the level of provision to recognise. Trade receivables and contract assets are written off when there is no reasonable expectation of recovery.

The Group has other receivables which are financial assets totalling £4.1m (2023: £12.8m).

The movement in the allowance for impairment of trade receivables (continuing operations only) was:

	2024 £m	2023 £m
Balance at 1 April	169.2	78.2
Increase/(decrease) in allowance for impairment	121.5	116.8
Impairment losses recognised	(37.3)	(25.8)
Balance at 31 March	253.4	169.2

A6.3. Liquidity risk and Going Concern

Liquidity risk, the risk that the Group will have insufficient funds to meet its liabilities, is managed by the Group's Treasury function. The Group can be exposed to significant movements in its liquidity position due to changes in commodity prices, working capital requirements, the impact of the seasonal nature of the business and phasing of its capital investment and recycling programmes.

Treasury is responsible for managing the banking and liquidity requirements of the Group, risk management relating to interest rate and foreign exchange exposures, and for managing the credit risk relating to the banking counterparties with which it transacts. Short term liquidity is reviewed daily by Treasury, while the longer-term liquidity position is reviewed on a regular basis by the Board. The department's operations are governed by policies determined by the Board and any breaches of these policies are reported to the Tax and Treasury Committee and Audit Committee.

In relation to the Group's liquidity risk, the Group's policy is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

During the year, the Group's internal approach to managing liquidity was to seek to ensure that the Group had available committed borrowings and facilities equal to at least 105% of forecast borrowings over a rolling 6 month period.

The Group uses cash flow forecasts to monitor its ongoing borrowing requirements. Typically, the Group will fund any short-term borrowing positions by issuing commercial paper or borrowing from committed and uncommitted bank lines and will invest in money market funds when it has a cash surplus. Details of the Group's borrowings are disclosed at note 21. In addition to the borrowing facilities listed at note 21.3, the Group has a £15m overdraft facility.

The refinancing requirement in the 24/25 financial year is £1.1bn, being the £852m of short-term Commercial Paper that matures between April and May, and \$320m (£204m) of US Private Placement maturing 16 April 2024. The Directors are confident in the ability of the Group to maintain a funding level above 105% for the going concern assessment period based on the strong credit standing and borrowing history of the Group for both fixed debt and commercial paper, as discussed more fully below.

Given the committed bank facilities of £3.5bn, £2.75bn excluding Scottish Hydro Electric Transmission plc facilities, maintained by the Group and the current commercial paper market conditions, the Directors have concluded that both the Group and SSE plc as parent company have sufficient headroom to continue as a going concern. In coming to this conclusion, the Directors have taken into account the Group's credit rating and the successful issuance of £15.5bn of medium to long term debt and Hybrid equity since February 2012, including £1.1bn of long term funding in the 23/24 financial year being a €750m 8 year Eurobond at 4.0% in August 2023 for SSE plc and a 20 year £500m Eurobond at a coupon of 5.5% for Scottish Hydro Electric Transmission plc.

The Group's period of Going Concern assessment is performed to 31 December 2025, 21 months from the balance sheet date, which is at least 12 months from the filing deadline of its subsidiary companies. As well as taking account of the factors noted, the Going Concern conclusion is arrived at after applying stress testing sensitivities to the Group's cash flow and funding projections including removal of proceeds from unconfirmed future divestments, negative and positive sensitivities on operating cash flows and uncommitted capex and other adjustments. The Group has also considered its obligations under its debt covenants. There have been no breaches of covenants in the year and the Group's projections support the expectation that there will be no breach of covenants over the period to 31 December 2025. The statement of going concern is included in the Audit Committee Report.

As at 31 March 2024, the net value of outstanding cash collateral held in respect of mark-to-market related margin calls on exchange traded positions was £353.2m (2023: cash posted £316.3m).

The contractual cash flows shown in the following tables are the contractual undiscounted cashflows under the relevant financial instruments. Where the contractual cashflows are variable based on a price, foreign exchange rate or index in the future, the contractual cashflows in the following tables have been determined with reference to the relevant price, foreign exchange rate, interest rate or index as at the balance sheet date. In determining the interest element of contractual cashflows in cases where the Group has a choice as to the length of interest calculation periods and the interest rate that applies varies with the period selected, the contractual cashflows have been calculated assuming the Group selects the shortest available interest calculation periods. Where the holder of an instrument has a choice of when to redeem, the amounts in the following tables are on the assumption the holder redeems at the earliest opportunity.

(i) The Group believes the liquidity risk associated with out-of-the-money operating derivative contracts needs to be considered in conjunction with the profile of payments or receipts arising from derivative financial assets. It should be noted that cash flows associated with future energy sales and commodity contracts which are not IFRS 9 financial instruments are not included in this analysis, which is prepared in accordance with IFRS 7 "Financial Instruments: Disclosures".

ACCOMPANYING INFORMATION – CONTINUED

A6. Financial risk management continued

A6.4. Commodity risk

The Group's Energy Markets business implements the hedging policy through trading in the commodity markets and manages the requirement for the delivery of the Group's physical commodity needs as part of its normal course of business. The risk management activity carried out by SSE Energy Markets arises from the Group's requirement to source gas, electricity or other commodities such as renewable obligation certificates for SSE Business Energy and SSE Airtricity, and to procure fuel and other commodities and provide a route-to-market and risk management services for SSE Renewables, SSE Thermal, and Gas Storage.

Current hedging approach

The Group has traded in three principal commodities during the year, as well as the spreads between two or more commodity prices: power (baseload and other products); gas; and carbon (emissions allowances). Each commodity has different liquidity characteristics, which impacts on the degree of hedging possible. Similarly, each of the Group's assets carries different exposures to the commodity market and thus requires a different approach to hedging. As such, the Group's current hedging approach varies by each class of asset as follows:

Asset class	Minimum Hedge Target	Principal Commodity Exposures
GB Wind	Target to hedge less than 100% of anticipated wind energy output for the coming 12 months, progressively establishing the hedge over the 36 months prior to delivery. From September 2023, this has been around 80%.	Power, Gas, Carbon
Hydro	80% of forecast generation 12 months in advance of delivery, progressively established over the 36 months prior to delivery.	Power, Gas, Carbon
GB Thermal	100% of expected output 6 months in advance of delivery, progressively established over the 18 months prior to delivery.	Power, Gas, Carbon
Gas Storage	The assets were commercially operated throughout the year and the business managed its exposure to changes in the spread between summer and winter prices, market volatility and plant availability.	Gas
SSE Business Energy	Sales to contract customers are 100% hedged: at point of sale for fixed, upon instruction for flexi and on a rolling basis for tariff customers.	Power, Gas

However, there are three principal areas where significant variations in earnings cannot be fully mitigated through hedging:

- The impact of the weather on the volume of electricity produced from renewable sources;
- The impact of operational matters such as unplanned outages; and
- The ability of flexible thermal power stations to earn extrinsic income by providing services to the electricity system and by responding to shorter-term electricity market conditions.

Hedging is carried out by each asset class trading internally with SSE Energy Markets to effect these hedges and SSE Energy Markets then trading onwards with external counterparties and markets. SSE Energy Markets is only able to accept internal trades when there is sufficient liquidity to offset them in the external market or they can be offset with internal trades from other asset classes. In this way, the commodity risks to which SSE Energy Markets is individually exposed, are minimised.

The volumetric extent to which assets are hedged are reported monthly to the Group Energy Markets Exposures Risk Committee, and to the Energy Markets Risk Committee ('EMRC') on at least a quarterly basis. Variations to the hedging approach above will be required as markets and other factors (such as asset disposals) change. The EMRC also receives reporting on credit risk, other risk measures, and market liquidity in assessing whether any variations to the hedging approach are required.

The Group measures and manages the Commodity Risk associated with the financial and non-financial commodity contracts it is exposed to. However, within the Group's financial statements only certain commodity contracts are designated as financial instruments under IFRS 9. As a result, it is only the fair value of those IFRS 9 financial instruments which represents the exposure of the Group's commodity price risk under IFRS 7. This is a consequence of the Group's accounting policy which stipulates that commodity contracts which are designated as financial instruments under IFRS 9 should be accounted for on a fair value basis with changes in fair value reflected in profit or equity. Conversely, commodity contracts that are not designated as financial instruments under IFRS 9 will be accounted for as 'own use' contracts. As fair value changes in own use contracts are not reflected through profit or equity, these do not represent the IFRS 7 commodity price risk. Furthermore, other physical contracts can be treated as the hedging instrument in documented cash flow hedging relationships where the hedged item is the forecast future purchase requirement to meet production or customer demand. The accounting policies associated with financial instruments are explained in the Accompanying Information section [A1](#).

Sensitivity analysis

The Group's exposure to commodity price risk according to IFRS 7 is measured by reference to the Group's IFRS 9 commodity contracts. IFRS 7 requires disclosure of a sensitivity analysis for market risks that is intended to illustrate the sensitivity of the Group's financial position and performance to changes in market variables impacting upon the fair value or cash flows associated with the Group's financial instruments.

Therefore, the sensitivity analysis provided discloses the effect on profit or loss and equity at the balance sheet date assuming that a reasonably possible change in the relevant commodity price had occurred and been applied to the risk exposures in existence at that date. The reasonably possible changes in commodity prices used in the sensitivity analysis were determined based on calculated or implied volatilities where available, or historical data.

The sensitivity analysis has been calculated on the basis that the proportion of commodity contracts that are IFRS 9 financial instruments remains consistent with those at that point. Excluded from this analysis are all commodity contracts that are not financial instruments under IFRS 9.

	2024		2023	
	Base Price ⁽ⁱ⁾	Reasonably possible increase/decrease in variable	Base Price ⁽ⁱ⁾	Reasonably possible increase/decrease in variable
Commodity prices				
UK gas (p/therm)	91	+73/-54	113	+90/-71
UK power (£/MWh)	72	+43/-34	149	+89/-72
UK carbon (£/tonne)	37	+31/-22	74	+54/-39
EU emissions (€/tonne)	40	+20/-16	98	+69/-54
UK oil (US\$/bbl)	–	–	597	+290/-244
IRL power (€/MWh)	106	+86/-63	172	+138/-108
EU power (€/MWh)	24	+12/-10	–	–

(i) The base price represents the weighted average forward market price over the duration of the active market curve used to calculate the sensitivity analysis. The reasonably possible increase/decrease in market prices has been determined via SSE Energy Markets price model simulations and the volatility assumptions of the model have been calibrated from a look-back analysis over the previous 12 month period.

The impacts of reasonably possible changes in commodity prices on profit after taxation based on the rationale described are as follows:

	2024 Impact on profit and equity (£m)	2023 Impact on profit and equity (£m)
Incremental profit/(loss)		
Commodity prices combined – increase	(7.1)	399.3
Commodity prices combined – decrease	(0.4)	(306.3)

The sensitivity analysis provided is hypothetical and is based on the exposure to energy-related commodities, and their corresponding valuation under IFRS 9, that the Group has at each period end. This analysis should be used with caution as the impacts disclosed are not necessarily indicative of the actual impacts that would be experienced given it does not consider all interrelationships, consequences and effects of such a change in those prices.

A6.5. Currency risk

The Group publishes its consolidated financial statements in Sterling but also conducts business in foreign currencies. As a result, it is subject to foreign currency exchange risk arising from exchange rate movements which will be reflected in the Group's transaction costs or in the underlying foreign currency assets of its foreign operations.

The Group's policy is to use forward contracts, swaps and options to manage its exposures to foreign exchange risk. All such exposures are transactional in nature, and relate primarily to procurement contracts, commodity purchasing and related freight requirements, commodity hedging, long term plant servicing and maintenance agreements and the purchase and sale of carbon emission certificates. The policy is to seek to hedge 100% of its currency requirements arising under all committed contracts excepting commodity hedge transactions, the requirements for which are significantly less predictable. The policy for these latter transactions is to assess the Group's requirements on a rolling basis and to enter into cover contracts as appropriate.

The Group has foreign operations with significant Euro-denominated and JPY-denominated net assets. The Group's policy is to hedge its net investment in its foreign operations by ensuring the net assets whose functional currency cash flows are denominated in foreign currencies are matched by borrowings in the same currency. For SSE Pacifico, whose functional currency is JPY but which presently has limited capital commitments, SSE has no JPY denominated borrowings and hence has no current net investment hedge. For the acquired net assets whose functional cash flows are in Sterling, the Group will ensure Sterling denominated borrowings are in place to minimise currency risk.

Significant exposures are reported to, and discussed by, the Tax and Treasury Committee on an ongoing basis and additionally form part of the bi-annual Treasury report to the Audit Committee.

At the balance sheet date, the total nominal value of outstanding forward foreign exchange contracts that the Group has committed to is:

	2024 £m	2023 £m
Forward foreign exchange contracts	3,197.1	2,516.5

ACCOMPANYING INFORMATION – CONTINUED

A6. Financial risk management continued

A6.5. Currency risk continued

The Group's exposure to foreign currency risk was as follows:

	2024					2023				
	SEK (million)	\$ (million)	€ (million)	CNH (million)	CHF (million)	SEK (million)	\$ (million)	€ (million)	CNH (million)	
Loans and borrowings	–	564.0	3,750.0	–	–	–	564.0	3,700.0	–	
Purchase and commodity contract commitments	5,344.7	10.7	1,296.1	530.0	10.4	420.9	7.9	123.9	334.2	
Gross exposure	5,344.7	574.7	5,046.1	530.0	10.4	420.9	571.9	3,823.9	334.2	
Forward exchange/swap contracts	5,344.7	574.7	2,671.3	530.0	10.4	420.9	571.9	2,266.1	334.2	
Net exposure (in currency)	–	–	2,374.8	–	–	–	–	1,557.8	–	
Net exposure (in £m)	–	–	2,030.2	–	–	–	–	1,369.6	–	

This represents the net exposure to foreign currencies, reported in pounds Sterling, and arising from all Group activities. All sensitivity analysis has been prepared on the basis of the relative proportions of instruments in foreign currencies being consistent as at the balance sheet date. This includes only monetary assets and liabilities denominated in a currency other than Sterling and excludes the translation of the net assets of foreign operations but not the corresponding impact of the net investment hedge.

The sensitivity analysis is indicative only and it should be noted that the Group's exposure to such market rate changes is continually changing. The calculations are based on linear extrapolations of rate changes which may not reflect the actual result which would impact upon the Group.

The majority of these contracts are held to limit exposure to foreign currency movements on asset procurement contracts. A 10% change in foreign currency exchange rates would have had the following impact on profit after taxation, based on the assumptions presented above:

	Equity		Income statement	
	At 31 March 2024 £m	At 31 March 2023 £m	At 31 March 2024 £m	At 31 March 2023 £m
US Dollars	–	–	–	–
Euro	142.5	98.9	26.7	24.4
SEK	–	–	–	–
CHN	–	–	–	–
CHF	–	–	–	–
	142.5	98.9	26.7	24.4

The impact of a decrease in rates would be an identical reduction in the annual charge.

A6.6. Interest rate risk

Interest rate risk derives from the Group's exposure to changes in the value of an asset or liability or future cash flows through changes in interest rates.

The Group's policy is to manage this risk by stipulating that a minimum of 50% of Group borrowings be subject to fixed rates of interest, either directly through the debt instruments themselves or through the use of derivative financial instruments. The floating rate borrowings are provided by banks including the European Investment Bank (EIB). Such instruments include interest rate swaps and options, forward rate agreements and, in the case of debt raised in currencies other than Sterling, cross currency swaps. These practices serve to reduce the volatility of the Group's financial performance.

Although interest rate derivatives are primarily used to hedge risk relating to current borrowings, under certain circumstances they may also be used to hedge future borrowings. Any such pre-hedging is unwound at the time of pricing the underlying debt, either through cash settlement on a net present value basis or by transacting offsetting trades. The floating rate borrowings mainly comprise cash advances from the European Investment Bank (EIB), however the Group is currently carrying a surplus cash position of £1,035.9m (2023: £891.8m).

The impact of a change in interest rates is dependent on the specific details of the financial asset or liability in question. Changes in fixed rate financial assets and liabilities, which account for the majority of cash, loans and borrowings, are not measured at fair value through the income statement. In addition to this, changes to fixed-to-floating hedging instruments which are recorded under cash flow hedge accounting also do not impact the income statement. Changes in hedged items and hedging instruments recorded under fair value hedge accounting are recorded through the income statement. The exposure measured is therefore based on variable rate debt and instruments.

The net exposure to interest rates at the balance sheet date can be summarised thus:

	2024 Carrying amount £m	2023 Carrying amount £m
Interest bearing/earning assets and liabilities:		
– fixed	(8,766.1)	(8,473.9)
– floating	685.5	441.0
	(8,080.6)	(8,032.9)
Represented by:		
Cash and cash equivalents	1,035.9	891.8
Derivative financial liabilities	17.2	135.2
Loans and borrowings	(8,726.2)	(8,654.0)
Lease liabilities	(407.5)	(405.9)
	(8,080.6)	(8,032.9)

Following from this, the table below represents the expected impact of a change of 100 basis points in short term interest rates at the reporting date in relation to equity and income statement. The analysis assumes that all other variables, in particular foreign currency rates, remain constant. An increase in exchange rates would be a change to either the income statement or equity. The assessment is based on a revision of the fair value assumptions included in the calculated exposures in the previous table.

All sensitivity analysis has been prepared on the basis of the proportion of fixed to floating instruments being consistent as at the balance sheet date and is stated after the effect of taxation.

The sensitivity analysis is indicative only and it should be noted that the Group's exposure to such market rate changes is continually changing. The calculations are based on linear extrapolations of rate changes which may not reflect the actual result which would impact upon the Group.

	2024 £m	2023 £m
Income statement	2.6	3.7

The impact of a decrease in rates would be an equal reduction in the annual charge. There is no impact on equity as the analysis relates to the Group's net exposure at the balance sheet date. Contracts qualifying for hedge accounting are, by definition, part of the Group's covered position.

ACCOMPANYING INFORMATION – CONTINUED

A7. Fair value of financial instruments

A7.1. Fair value of financial instruments within the Group

The fair values of the primary financial assets and liabilities of the Group together with their carrying values are as follows:

	2024	2024	2024	2024	2023	2023	2023	2023

* The comparative information has been restated. See notes 1.2 and 2.1.

(i) Financial assets and liabilities that are measured at amortised cost.

(ii) Financial assets and liabilities that are measured at either Fair Value through Profit and Loss (Derivative Financial Assets and Liabilities) or Fair Value through Other Comprehensive Income (Unquoted Equity Investments)

A7.1.1. Basis of determining fair value

Certain assets and liabilities have been classified and carried at amortised cost on inception in line with IFRS 9 criteria. The carrying value of these assets are approximately equivalent to fair value due to short term maturity aside from loans and borrowings which are subject to longer maturity dates.

All other financial assets and liabilities are measured at either Fair Value through Profit and Loss ('FVTPL') or Fair Value through Other Comprehensive Income ('FVTOCI'). Fair values for energy derivatives are based on unadjusted quoted market prices, where actively traded. For energy derivatives that are not actively traded, interest rate instruments, foreign currency hedge contracts and cross currency swap contracts associated with foreign currency denominated long-term fixed rate debt, the fair values are determined by reference to closing rate market prices for similar instruments. Fair values for unquoted equity instruments are derived from venture capital or growth equity firm valuation statements. Fair values for financial guarantee contracts are equal to the premium or fee received/charged.

The fair values are stated at a specific date and may be different from the amounts which will actually be paid or received on settlement of the instruments. The fair value of items such as property, plant and equipment, internally generated brands or the Group's customer base are not included as these are not considered financial instruments.

A7.2. Fair value hierarchy

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable.

- Level 1 fair value measurements are those derived from unadjusted quoted market prices for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data.

	2024 Level 1 £m	2024 Level 2 £m	2024 Level 3 £m	2024 Total £m
Financial assets				
Energy derivatives	357.7	121.6	0.5	479.8
Interest rate derivatives	–	113.0	–	113.0
Foreign exchange derivatives	–	7.5	–	7.5
Unquoted equity investments	–	–	3.2	3.2
	357.7	242.1	3.7	603.5
Financial liabilities				
Energy derivatives	–	(327.1)	(101.3)	(428.4)
Interest rate derivatives	–	(95.8)	–	(95.8)
Foreign exchange derivatives	–	(43.2)	–	(43.2)
Loans and borrowings	–	(0.9)	–	(0.9)
	–	(467.0)	(101.3)	(568.3)

The table above excludes financial guarantee liabilities measured in accordance with IFRS 17. There were no significant transfers out of Level 1 into Level 2 and out of Level 2 into Level 1 during the year ended 31 March 2024. There were no significant transfers out of Level 2 into Level 3 or out of Level 3 into Level 2 during the year ended 31 March 2024.

In December 2023, the Group entered into an additional Affiliate Contract for Difference ("ACfD") agreement with Seagreen Wind Energy Limited ("SWEL") with a 5 year term. SWEL is a wholly owned subsidiary of Seagreen Holdco 1 Limited, a joint venture between the Group (49%) and TOTAL SE (51%) and TOTAL SE entered into an equivalent ACfD with SWEL on the same day. The Group also has some smaller commercial CfD arrangements entered into with non-government third parties that are also classified as derivatives. The ACfD and the commercial CfDs meet the definition of financial instruments and are classified as Level 3 on the fair value hierarchy due to significant unobservable inputs in the determination of fair value.

The fair value measurement impact in the income statement attributable to Level 3 CfDs was a loss of £99.0m (2023: £1.8m). The fair value was determined using the income approach with reference to future market prices which are beyond the liquid period in the forward market.

The non-government CfDs were issued for £nil consideration, being the deemed transaction price. The Group has calculated that the contracts had a fair value on day 1, being the difference between the strike price per the contract and the forward market spot price. This valuation is based on unobservable inputs and is considered judgemental. Key assumptions applied when deriving the fair value are related to discount rates; electricity volumes; and electricity prices. In line with IFRS 9, the day 1 gain is deferred and will be recognised over the life of the contract.

Seagreen Offshore Wind Farm reached full commercial operations during October 2023. The deferred day 1 fair value across all Seagreen contracts commenced amortisation in December 2023 with a £7.4m deferred measurement gain recognised during the year.

ACCOMPANYING INFORMATION – CONTINUED

A7. Fair value of financial instruments continued

A7.2. Fair value hierarchy continued

The following table represents the difference between the Level 3 financial instruments at fair value at the start of the reporting period and at the reporting date:

	£m
Level 3 financial instrument fair value as at 31 March 2022	8.7
Additions (cash contributions)	19.1
Remeasurement loss recognised in income statement	(1.8)
Remeasurement loss recognised in other comprehensive income	(0.4)
Additions – new instruments entered in the year	400.1
Deferred day 1 gains on instruments entered in the year	(400.1)
Level 3 financial instrument fair value as at 31 March 2023	25.6
Additions (cash contributions)	
Transfer from financial assets (note 1.2)	(24.1)
Cash settlement	(0.4)
Disposals in year	(0.4)
Remeasurement loss recognised in income statement	(106.0)
Remeasurement loss recognised in other comprehensive income	0.3
Additions – new instruments entered in the year	11.5
Deferred day 1 gains on instruments entered in the year	(11.5)
Amortisation of day 1 gains in the year	7.4
Level 3 financial instrument fair value as at 31 March 2024	(97.6)

The following table details the valuation technique, significant unobservable inputs and the range of values for the energy derivatives measured at fair value on a recurring basis and classified as Level 3.

	Carrying value (net) £m	Valuation technique	Significant unobservable input	Market price range (min-max) £/MWh
31 March 2024	100.8	Discounted cash flow	Electricity prices, Generation volumes	53 – 147
31 March 2023	1.8	Discounted cash flow	Electricity prices, Generation volumes	68 – 147

Deferred measurement differences

	£m
Deferred measurement difference as at 31 March 2022	–
Deferred measurement difference arising during the year on new instruments	400.1
Deferred measurement difference as at 31 March 2023	400.1
Deferred measurement difference adjustment in the year	9.3
Deferred measurement difference arising during the year on new instruments	11.5
Deferred measurement difference recognised during the year	(7.4)
Deferred measurement difference as at 31 March 2024	413.5

The following table shows the impact on the fair value of the Level 3 energy derivatives when applying reasonably possible alternative assumptions to the valuation obtained using the discounted cash flow model.

Assumption	At 31 March 2024		At 31 March 2023	
	Increase/ decrease in assumption	Effect on fair value of deferred measurement differences £m	Increase/ decrease in assumption	Effect on fair value of deferred measurement differences £m
Discount rate	+1%/-1%	22.2/(19.9)	+1%/-1%	(29.5)/35.3
Volumes	+10%/-10%	29.3/(31.3)	+10%/-10%	39.8/(39.8)
Prices	+10%/-10%	135.7/(135.7)	+10%/-10%	108.7/(108.7)

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable for the year ended 31 March 2023.

	2023 Level 1 £m	2023 Level 2 £m	2023 Level 3 £m	2023 Total £m
Financial assets				
Energy derivatives	–	743.9	22.0	765.9
Interest rate derivatives	–	227.8	–	227.8

Unquoted equity investments	–	–	27.4	27.4
	–	983.2	49.4	1,032.6
Financial liabilities				
Energy derivatives	(189.6)	(939.4)	(23.8)	(1,152.8)
Interest rate derivatives	–	(92.6)	–	(92.6)
Foreign exchange derivatives	–	(18.9)	–	(18.9)
Loans and borrowings	–	(154.6)	–	(154.6)
	(189.6)	(1,205.5)	(23.8)	(1,418.9)

There were no significant transfers out of Level 1 into Level 2 and out of Level 2 into Level 1 during the year ended 31 March 2023.

A8. Hedge accounting

A8.1. Cash flow hedges

The Group designates contracts which qualify as hedges for accounting purposes either as cash flow hedges or fair value hedges. Cash flow hedges are contracts entered into to hedge a forecast transaction or cash flow risk generally arising from a change in interest rates or foreign currency exchange rates and which meet the effectiveness criteria prescribed by IFRS 9. The Group's accounting policy on cash flow hedges is explained in the Accompanying Information section [A1](#).

The following table indicates the contractual maturities of the expected transactions and the qualifying cash flow hedges associated. Non-Sterling denominated contractual cash flows have been converted at the forward foreign exchange rate.

	2024 Carrying amount £m	2024 Expected cash flows £m	2024 0 – 12 months £m	2024 1–2 years £m	2024 2–5 years £m	2024 > 5 years £m	2023 Carrying amount £m	2023 Expected cash flows £m	2023 0 – 12 months £m	2023 1–2 years £m	2023 2–5 years £m	2023 > 5 years £m

A8.2. Net investment hedge

The Group's net investment hedge consists of debt issued in the same currency (€) as the net investment in foreign subsidiaries with € denominated functional currencies being the Airtricity Supply business, the thermal plants in Ireland and wind farms in Ireland and Southern Europe. The hedge compares the element of the net assets whose functional cash flows are denominated in € to the matching portion of the € borrowings held by the Group. This therefore provides protection against movements in foreign exchange rates. There is no net investment hedge in relation to SSE Pacifico as the Group has no JPY denominated debt.

Gains and losses in the hedge are recognised in equity and will be transferred to the income statement on disposal of the foreign operation (2024: £30.9m gain, 2023: £43.1m loss). Gains and losses on the ineffective portion of the hedge are recognised immediately in the income statement (2024: £nil, 2023: £nil).

(i) Investment in own shares is the purchase of own shares less the settlement of Treasury shares for sharesave schemes.

* The comparative Company statement of changes in equity has been restated. See note 1.2.

NOTES TO THE COMPANY FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2024

1. Principal accounting policies

1.1. General information

SSE plc (the Company) is a company domiciled in Scotland. The address of the registered office is given on the back cover. The Company financial statements present information about the Company as a separate entity and not about the Group.

1.2. Basis of preparation

The financial statements have been prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law) including Financial Reporting Standard 101, "Reduced Disclosure Framework".

Under section 408 of the Companies Act 2006 the Company is exempt from the requirement to present its own income statement and related notes.

It has also taken advantage of the following disclosure exemptions available under FRS 101.

- A Cash flow statement and related notes;
- Related party disclosures;
- Disclosures in respect of capital management; and
- The effects of new but not yet effective IFRSs.

As the consolidated financial statements of SSE plc include the equivalent disclosure, the Company has also taken advantage of the exemptions, under FRS 101, available in respect of the following disclosure:

- Certain disclosures required by *IFRS 13 Fair value measurement* and the disclosures required by *IFRS 7 Financial instrument disclosures*

The Company previously assessed that, on the basis of materiality, the disclosures required under *IFRS 2 Share-based Payment* should be removed. The Company has assessed that at 31 March 2024 these disclosures continue to be immaterial to the Company's financial statements.

New standards, amendments and interpretations effected or adopted by the Company

On 1 April 2023, the Company adopted IFRS 17 on a modified retrospective basis from the earliest period presented in these financial statements.

The Company provides guarantees in respect of certain activities of subsidiaries, former subsidiaries and to certain current joint venture investments both held directly and indirectly by the Company's subsidiaries. Prior to adoption of IFRS 17, these contracts were designated as insurance contracts under IFRS 4, where existing accounting practices were grandfathered and the contracts were treated as contingent liabilities until such time as it became probable the Company would be required to make payment to settle the obligation. The adoption of IFRS 17 from 1 April 2022 resulted in a reassessment of these contracts and the Company elected to apply the valuation principles of IFRS 9 to these contracts. Adoption resulted in the recognition of financial guarantee liabilities of £140.6m; a £50.0m increase in investments; and a £90.6m adjustment to retained earnings. In the year to 31 March 2023, the Company recognised a decrease in financial guarantee liabilities of £3.0m; an increase in investments of £4.0m and net income statement credit of £7.0m.

During the financial year to 31 March 2024, the Company recognised a net decrease in financial guarantee liabilities of £21.0m, a reduction in the value of its subsidiary investments of £16.6m and a net income statement credit of £4.4m.

The Company provides guarantees of £10.4bn (2023: £10.4bn) to certain subsidiaries, in order to maintain the stand-alone credit ratings and to support licence conditions. These contracts are out of scope for IFRS 17 and IFRS 9 and are accounted for under IAS 37.

There were no other standards, amendments to standards or interpretations relevant to the Company's operations which were adopted during the year.

Going concern

The Directors consider that the Company has adequate resources to continue in operational existence for the foreseeable future (further details are contained in [A6](#) Accompanying Information of the consolidated financial statements). The financial statements are therefore prepared on a going concern basis.

Basis of measurement

The financial statements of the Company are prepared on the historical cost basis except for derivative financial instruments and assets of the Company pension scheme which are stated at their fair value, and liabilities of the Company pension scheme which are measured using the projected unit credit method. The directors believe the financial statements present a true and fair view. The financial statements of the Company are presented in pounds sterling.

Critical accounting judgements and estimation uncertainty

In the process of applying the Company's accounting policies, management necessarily makes judgements and estimates that have a significant effect on the amounts recognised in the financial statements. Changes in the assumptions underlying the estimates could result in a significant impact to the financial statements. The Group's key accounting judgement and estimation areas are noted in note 4.1 of the consolidated financial statements, with the most significant financial judgement areas as specifically discussed by the Audit Committee being highlighted separately. In particular, note 4.1 (ii) Retirement benefit obligations, and the related disclosures in note 23, note 4.1 (iv) Valuation of other receivables and note 4.3 (ii) Decommissioning costs, of the consolidated financial statements are relevant to the Company.

Significant accounting policies

The significant accounting policies applied in the preparation of these individual financial statements are set out below. These policies have been applied consistently to all the years presented, unless otherwise stated.

Investments

Investments in subsidiaries are carried at cost less any impairment charges.

Interests in joint arrangements and associates

Associates are those investments over which the Company has significant influence but neither control nor joint control.

The Company's joint ventures and associates are stated at cost less any impairment.

Applicable Group accounting policies

The following significant accounting policies are consistent with those applied for the Group consolidated financial statements:

- Equity and equity-related compensation benefits (Supplementary information [A1.2](#))
- Defined benefit pension scheme (Supplementary information [A1.2](#))
- Taxation (Supplementary information [A1.2](#))
- Financial instruments (Supplementary information [A1.2](#) and [A6](#))
- Financial guarantee liabilities (Supplementary information [A1.2](#))

2. Supplementary financial information

2.1. Auditor remuneration

The amounts paid to the Company's auditor in respect of the audit of these financial statements was £0.4m (2023: £0.4m).

Amounts paid to the Company's auditor in respect of services to the Company other than the audit of the Company's financial statements have not been disclosed as the information is required instead to be disclosed on a consolidated basis.

2.2. Employee numbers

The average number of people employed by the Company (including Executive Directors) during the year was 3 (2023: 3).

The costs associated with the employees of the Company, who are the Executive Directors of the Group, are borne by Group companies. No amounts are charged to the Company.

2.3. Directors' remuneration and interests

Information concerning Directors' remuneration, shareholdings, options, long term incentive schemes and pensions is shown in the Remuneration Report on [pages 158 to 180](#). No Director had, during or at the end of the year, any material interest in any other contract of significance in relation to the Group's business.

3. Investments in associates and joint ventures

	2024			2023		
	Equity £m	Loans £m	Total £m	Equity £m	Loans £m	Total £m
Share of net assets/cost						
At 1 April	50.4	81.6	132.0	12.7	129.2	141.9
Additions	30.0	47.7	77.7	19.5	15.8	35.3
Transfers	–	–	–	50.0	(50.0)	–
Repayment of shareholder loans	–	(13.4)	(13.4)	–	(13.4)	(13.4)
Impairment	(45.8)	(46.1)	(91.9)	(31.8)	–	(31.8)
At 31 March	34.6	69.8	104.4	50.4	81.6	132.0

The impairment recognised in the year related to the equity investment in Neos Networks Limited. The transfer in the prior year related to a Neos Network Limited debt for equity swap of £50.0m.

NOTES TO THE COMPANY FINANCIAL STATEMENTS – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

4. Subsidiary undertakings

Details of the Company's subsidiary undertakings are disclosed in the Accompanying Information section (A3 [🔗](#)).

Investment in subsidiaries

	2024 £m	2023 £m (restated*)
At 1 April	1,958.1	1,933.6
Increase/(decrease) in existing investments ⁽ⁱ⁾	22.1	20.5
Investment (decrease)/increase in respect of financial guarantees ⁽ⁱⁱ⁾	(16.6)	4.0
At 31 March	1,963.6	1,958.1

(i) The overall increase in investments held by the Company primarily relates to equity shares in the Company awarded to the employees of the subsidiaries of the Group under the Group's share schemes, which are recognised as an increase in the cost of investment in those subsidiaries as directed by IFRIC 11 (2024: £22.1m; 2023: £20.7m (both before tax)).

(ii) The investment (decrease)/increase in respect of financial guarantees relates to £19.6m (2023: £12.0m) of unwind and expiry of guarantee contracts, less £3m (2023: £16.0m) for the fair value of fees receivable on guarantees granted to subsidiary investments during the year.

* The comparative has been restated see note 1.2.

5. Trade and other receivables

The balances of current and non-current trade and other receivables in the current and prior financial year predominantly consists of amounts owed by subsidiary undertakings. At 31 March 2024 the Company assessed its exposure to expected credit losses on related party receivables under IFRS 9 and held a provision against future losses of £59.2m (2023: £137.8m).

During the year ended 31 March 2024 the Company waived £624m (2023: £nil) of intercompany funding receivables due from other SSE Group companies, with the related charge being expensed in the income statement.

6. Trade and other payables

The balances of current trade and other payables in the current and prior financial year predominantly consists of amounts due to subsidiary undertakings.

7. Taxation

Current tax liability/(asset)

	2024 £m	2023 £m
Corporation tax liability/(asset)	26.3	(1.4)

Deferred taxation

The following are the deferred tax liabilities and assets recognised by the Company and movements thereon during the current and prior reporting periods:

	Fair value gains (losses) on derivatives £m	Retirement benefit obligations £m	Other £m	Total £m
At 31 March 2022	(56.7)	129.4	(7.7)	65.0
Charge to income statement	50.0	0.2	–	50.2
Credit to other comprehensive income/(loss)	(0.9)	(38.0)	–	(38.9)
Charge to equity	–	–	2.0	2.0
At 31 March 2023	(7.6)	91.6	(5.7)	78.3
Charge to income statement	3.3	2.5	–	5.8
Charge/(credit) to other comprehensive income/(loss)	5.9	(9.3)	–	(3.4)
Charge to equity	–	–	1.8	1.8
At 31 March 2024	1.6	84.8	(3.9)	82.5

Certain deferred tax assets and liabilities have been offset, including the asset balances analysed in the tables above. The following is an analysis of the deferred tax balances (after offset) for financial reporting purposes:

	2024 £m	2023 £m
Deferred tax liabilities	86.8	92.1
Deferred tax assets	(4.3)	(13.8)
Net deferred tax liability	82.5	78.3

The deferred tax assets/liabilities disclosed include the deferred tax relating to the Company's pension scheme liabilities.

8. Loans and borrowings

	2024 £m	2023 £m
Current		
Other short-term loans	1,044.5	1,588.5
	1,044.5	1,588.5
Non-current		
Loans	4,561.7	4,307.8
	4,561.7	4,307.8
Total loans and borrowings	5,606.2	5,896.3
Cash and cash equivalents	(796.9)	(788.9)
Unadjusted Net Debt	4,809.3	5,107.4
Add:		
Hybrid equity (note 9)	1,882.4	1,882.4
Adjusted net debt and hybrid capital	6,691.7	6,989.8

Cash and cash equivalents (which are presented as a single class of assets in the face of the balance sheet) comprise cash at bank and short term highly liquid investments with a maturity of three months or less.

8.1. Borrowing facilities

The Company has an established €1.5bn Euro commercial paper programme (paper can be issued in a range of currencies and swapped into Sterling) and as at 31 March 2024 there was £840m commercial paper outstanding (2023: £919m).

During the year to 31 March 2024 SSE plc issued an 8 year €750m Green Bond at a coupon of 4.0%. The bond has been left in Euros as a net investment hedge for the Group's Euro denominated subsidiaries. In the year, SSE plc also redeemed US Private Placement debt of combined £155.0m and a €700m Eurobond with coupon at 1.75%.

The Company also has £2.5bn of revolving credit facilities (see note 21.3). These facilities continue to provide back-up to the commercial paper programme and, as at 31 March 2024 these facilities were undrawn (2023: undrawn).

NOTES TO THE COMPANY FINANCIAL STATEMENTS – CONTINUED

Over five years		1,989.8	1,994.8	1,984.5		1,864.4	1,883.4	1,857.8
Fair value adjustment ⁽ⁱⁱⁱ⁾				0.9				154.6
Total non-current borrowings		4,571.7	4,552.8	4,561.7		4,164.9	4,143.8	4,307.8
Total borrowings		5,628.2	5,666.4	5,606.2		5,763.9	5,742.2	5,896.3

(i) Balances include term loans and EIB debt and is a mixture of fixed and floating rate debt.

(ii) Balances include Commercial Paper and facility advances (£840m of Commercial Paper outstanding at 31 March 2024).

(iii) The fair value adjustment relates to the change in the carrying amount of the borrowings as a result of fair value hedges that are in place. The movement in the fair value adjustment is recognised in the income statement with a corresponding movement on the hedging instrument also being recognised in the income statement.

(iv) The 1.250% €600m Eurobond maturing 16 April 2025 has been swapped to Sterling giving an effective interest rate of 2.43%.

(v) The 1.375% €650m Eurobond maturing 4 September 2027 has been swapped to Sterling giving an effective interest rate of 2.56%.

(vi) The 1.750% €500m Eurobond maturing 16 April 2030 has been swapped to Sterling giving an effective interest rate of 2.89%.

(vii) The 4.0% €750m Eurobond maturing 5 September 2031 has been left in Euros as a net investment hedge for the Group's Euro denominated subsidiaries.

(viii) Bonds have been issued under the Group's Green Bond Framework.

9. Equity

Share capital

	Number (millions)	£m
Allotted, called up and fully paid:		
At 1 April 2022	1,073.1	536.5
Issue of shares ⁽ⁱ⁾	27.7	13.9
Share repurchases ⁽ⁱⁱ⁾	(6.9)	(3.4)
At 31 March 2023	1,093.9	547.0
Issue of shares ⁽ⁱ⁾	2.3	1.1
At 31 March 2024	1,096.2	548.1

The Company has one class of ordinary share which carries no right to fixed income. The holders of ordinary shares are entitled to receive dividends as declared and are entitled to one vote per share at meetings of the Company.

- (i) Shareholders were able to elect to receive ordinary shares in place of the final dividend of 67.7p per ordinary share (in relation to year ended 31 March 2023) and the interim dividend of 20.0p (in relation to the current year) under the terms of the Company's scrip dividend scheme. This resulted in the issue of 1,779,529 and 493,654 new fully paid ordinary shares respectively (2023: 18,241,941 and 9,413,103). In addition, the Company issued 0.8m (2023: 1.9m) shares during the year under the savings-related share option schemes (all of which were settled by shares held in Treasury) for a consideration of £9.2m (2023: £18.0m).
- (ii) Under the share buyback programme announced in the year to 31 March 2023, 6.9m of shares were repurchased and cancelled for a total consideration of £107.6m (including stamp duty and commission). The nominal value of share capital repurchased and cancelled is transferred out of share capital and into the capital redemption reserve. The scrip dividend take-up for the financial year ended 31 March 2023 was 18.0%, which is below the 25.0% required by the share buyback programme, therefore there have been no share buybacks in the current financial year ended 31 March 2024.

Of the 1,096.2m shares in issue, 2.8m are held as treasury shares. These shares will be held by the Group and used to award shares to employees under the Sharesave scheme in the UK.

During the year, on behalf of the Company, the employee share trust purchased 1.3m shares for a total consideration of £21.8m (2023: 1.4m shares, consideration of £23.4m) to be held in trust for the benefit of employee share schemes. At 31 March 2024, the trust held 6.9m shares (2023: 6.5m) which had a market value of £113.9m (2023: £118.0m).

Capital redemption reserve

The capital redemption reserve comprises the value of shares redeemed or purchased by the Company from distributable profits.

Hedge reserve

The hedge reserve comprises the effective portion of the cumulative net change in the fair value of cash flow hedge derivative instruments related to hedged transactions that have not yet occurred.

Hybrid equity

	2024 £m	2023 £m
GBP 600m 3.74% perpetual subordinated capital securities	598.0	598.0
EUR 500m 3.125% perpetual subordinated capital securities	453.0	453.0
EUR 1,000m 4.00% perpetual subordinated capital securities	831.4	831.4
	1,882.4	1,882.4

Further details regarding the hybrid equity can be found in note 22 of the Group consolidated financial statements.

NOTES TO THE COMPANY FINANCIAL STATEMENTS – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

10. Retirement benefit obligations

Defined benefit scheme

The Company has a funded final salary pension scheme ('Scottish Hydro Electric Pension Scheme') which provides defined benefits based on final pensionable pay. The scheme is subject to an independent valuation at least every three years. The future benefit obligations are valued by actuarial methods on the basis of an appropriate assessment of the relevant parameters.

Pension summary:

	Scheme type	Net actuarial loss recognised in respect of the pension asset in the statement of comprehensive income		Net pension asset	
		2024 £m	2023 £m	2024 £m	2023 £m
Scottish Hydro Electric	Defined benefit	(37.1)	(152.0)	339.3	366.6
Net actuarial loss		(37.1)	(152.0)	339.3	366.6

IFRIC 14 surplus restrictions

The value of Scottish Hydro Electric Pension Scheme assets recognised was previously impacted by the asset ceiling test which restricts the surplus that can be recognised to assets that can be recovered through future refunds or reductions in future contributions to the schemes, and may increase the value of scheme liabilities where there are minimum funding liabilities in relation to agreed contributions.

In 2016/17 the Group agreed with the trustees to the Scottish Hydro Electric Pension Scheme an amendment to the scheme rules to clarify that the Company has a clear right to any surplus upon final winding up of the scheme. This amendment removes the previous restriction on recognition of any surplus. The net pension asset of the Scottish Hydro Electric Pension Scheme at 31 March 2024 was equal to £339.3m (2023: £366.6m).

The individual pension scheme details based on the latest formal actuarial valuations are as follows:

	Scottish Hydro Electric
Latest formal actuarial valuation	31 March 2021
Valuation carried out by	Hymans Robertson
Value of assets based on valuation	£2,050.5m
Value of liabilities based on valuation	£1,782.2m
Valuation method adopted	Projected Unit
Average salary increase	RPI +0.5%
Average pension increase	RPI
Value of fund assets/accrued benefits	115.1%

Other matters

On 16 June 2023 the High Court issued a ruling in respect of Virgin Media v NTL Pension Trustees II Limited (and others) calling into question the validity of rule amendments made to defined benefit pension schemes contracted-out on a Reference Scheme Test basis between 6 April 1997 and 5 April 2016. Amendments to these pension schemes over this time required confirmation from the Scheme Actuary that the Reference Scheme Test would continue to be met. In the absence of such a confirmation, the Rule amendment would be void. This ruling could have wide ranging implications for many UK pension schemes and will be subject to an Appeal in 2024.

The Trustees of the Scottish Hydro Electric Pension Scheme have not performed a detailed assessment over the impact of this ruling. The Trustees believe it is appropriate to await the outcome of the Appeal process in 2024 before taking any further action, and the Company supports their position. Due to the uncertainty, it is not possible to assess the potential impact of the Virgin Media High Court ruling on the Scottish Hydro Electric Pension Scheme.

10.1. Pension scheme assumptions

The scheme has been updated to 31 March 2024 by qualified independent actuaries. The valuations have been prepared for the purposes of meeting the requirements of IAS 19. The major assumptions used by the actuaries in the scheme were:

	At 31 March 2024	At 31 March 2023
Rate of increase in pensionable salaries	3.4%	3.5%
Rate of increase in pension payments	3.1%	3.2%
Discount rate	4.8%	4.8%
Inflation rate	3.1%	3.2%

The assumptions relating to longevity underlying the pension liabilities at 31 March 2024 are based on standard actuarial mortality tables, and include an allowance for future improvements in longevity. The assumptions, equivalent to future longevity for members in normal health at age 65, are as follows:

	At 31 March 2024 Male	At 31 March 2024 Female	At 31 March 2023 Male	At 31 March 2023 Female
Currently aged 65	22	24	22	24
Currently aged 45	24	26	24	26

The impact on the scheme's liabilities of changing certain of the major assumptions is as follows:

	At 31 March 2024		At 31 March 2023	
	Increase/ decrease in assumption	Effect on scheme liabilities	Increase/ decrease in assumption	Effect on scheme liabilities
Rate of increase in pensionable salaries	0.1%	+/-0.1%	0.1%	+/-0.1%
Rate of increase in pension payments	0.1%	+/-0.7%	0.1%	+/-0.7%
Discount rate	0.1%	+/-0.7%	0.1%	+/-0.7%
Longevity	1 year	+/-2.0%	1 year	+/-1.9%

These assumptions are considered to have the most significant impact on the scheme valuations.

Asset buy-in

On 1 October 2019, the Scottish Hydro Electric Pension Scheme entered into an asset buy-in, transferring the risk of volatility in the assumptions used to calculate the obligation for 1,800 pensioners and 567 dependents (covering c£800m of the scheme's funding liabilities) to a third party. The asset buy-in is valued under the accounting principles of IFRS 13 and is considered a Level 3 instrument in the fair value hierarchy. This is in addition to a previous buy-in completed during the year ended 31 March 2018 when c£250m of the scheme's assets and liabilities related to 617 pensioners and 190 dependents were transferred to a third party. The Company has now insured against volatility in obligations related to all pensioners to third parties (insurer PIC) and is now only exposed to valuation fluctuations related to active and deferred members.

10.2. Valuation of pension scheme

	Quoted £m	Unquoted £m	Value at 31 March 2024 £m	Quoted £m	Unquoted £m	Value at 31 March 2023 £m
Equities	30.7	–	30.7	34.3	–	34.3
Government bonds	333.5	–	333.5	441.8	–	441.8
Insurance contracts	–	500.3	500.3	–	532.4	532.4
Other investments	464.1	–	464.1	381.0	–	381.0
Total fair value of plan assets	828.3	500.3	1,328.6	857.1	532.4	1,389.5
Present value of defined benefit obligation			(989.3)			(1,022.9)
Surplus in the scheme			339.3			366.6
Deferred tax thereon ⁽ⁱ⁾			(84.8)			(91.7)
Net pension asset			254.5			274.9

(i) Deferred tax is recognised at 25% (2023: 25%) on the surplus

Experience assumptions	–	3.7	3.7	–	(74.2)	(74.2)
Return on plan assets excluding interest income	(68.3)	–	(68.3)	(518.0)	–	(518.0)
	(68.3)	31.2	(37.1)	(518.0)	366.0	(152.0)
Other						
Contributions paid by the employer	1.0	–	1.0	1.0	–	1.0
Benefits paid	(58.3)	58.3	–	(65.5)	65.5	–
	(57.3)	58.3	1.0	(64.5)	65.5	1.0
Balance at 31 March	1,328.6	(989.3)	339.3	1,389.5	(1,022.9)	366.6

10.4. Pension scheme contributions and costs

Charges/(credits) recognised:

	2024 £m	2023 £m
Current service cost (charged to operating profit)	7.3	11.1
Past service cost	1.4	2.8
	8.7	13.9
Charged/(credited) to finance costs:		
Interest from pension scheme assets	(64.7)	(51.0)
Interest on pension scheme liabilities	47.2	37.0
	(17.5)	(14.0)

The return on pension scheme assets is as follows:

	2024 £m	2023 £m
Return on pension scheme assets	(3.6)	(467.0)

Unfunded Unapproved Retirement Benefit Scheme (“UURBS”) pension costs

The decrease in the year in relation to UURBS was £6.1m (2023: decrease of £8.9m). This is included in other provisions.

Further discussion of the pension scheme assets, liabilities, policies, risk and strategy can be found in note 23 of the Group consolidated financial statements.

11. Financial instruments

For financial reporting purposes, the Company has classified derivative financial instruments as financing derivatives. Financing derivatives include all fair value and cash flow interest rate hedges, non-hedge accounted (mark-to-market) interest rate derivatives, cash flow foreign exchange hedges and non-hedge accounted foreign exchange contracts. Non-hedge accounted contracts are treated as held for trading.

The derivative financial assets and liabilities are represented as follows:

	2024 £m	2023 £m
Derivative Assets		
Non-current	35.7	48.2
Current	67.3	167.1
Total derivative assets	103.0	215.3
Derivative Liabilities		
Non-current	(64.1)	(79.2)
Current	(32.7)	(13.5)
Total derivative liabilities	(96.8)	(92.7)
Net asset/(liability)	6.2	122.6

Information on the Group's Financial risk management and the fair value of financial instruments is available at [A6](#) and [A7](#)

12. Financial guarantee liabilities

	2024 £m	2023 £m
Non-current liabilities		
Financial guarantee liabilities	107.3	125.4
Current liabilities		
Financial guarantee liabilities	9.3	12.2
Total financial guarantee liabilities	116.6	137.6

SSE plc has provided guarantees in respect of certain activities of subsidiaries, former subsidiaries and to certain current joint venture investments both held directly and indirectly by the Company's subsidiaries with carrying values as follows:

	2024			2023	
	SSE on behalf of subsidiary £m	SSE on behalf of joint operations and ventures £m	SSE on behalf of 3rd parties £m	Total £m	Total £m
Financial guarantee liabilities	77.9	27.2	11.5	116.6	137.6

On 1 April 2023, the Company adopted IFRS 17 'Insurance Contracts' on a modified retrospective basis from the earliest period presented in these financial statements.

Where the Company issued financial guarantee contracts to guarantee indebtedness of the other companies within its Group, prior to adoption of IFRS 17, the Company considered these contracts to be insurance arrangements, and accounted for them as such.

In this respect, the contracts were treated as contingent liabilities until such time as it became probable the Company would be required to make payment to settle the obligation.

On transition to IFRS 17, the Company elected to apply IFRS 9 "Financial Instruments" to these financial guarantee contracts, as available under the transition arrangements of the new standard and they are valued on initial recognition and subsequently measured at the higher of the loss allowance for expected credit loss and the initial value less any income recognised.

The Company provided a new guarantee with a value of £3.3m on behalf of its joint ventures Saltend Cogeneration Company Limited and Indian Queens Power Limited, replacing a previous guarantee with a value of £15.4m and a guarantee with a value of £5.0m on behalf of SSE Renewables Developments (UK) Limited in relation to Seagreen Wind Energy Limited expired.

Additionally, the Company continues to provide a guarantee to Group Trustee Independent Trustees in respect of SSE Southern Group of the Electricity Supply Pension Scheme in respect of funding required by the scheme.

On behalf of Scottish Hydro Electric Transmission plc, SSE plc continues to provide a guarantee to ABB Limited in connection with the use of HVDC Replica Control Panels for Caithness-Moray Project.

On behalf of SSE Contracting Limited (which was disposed on 30 June 2021), SSE plc continues to provide a guarantee to Tay Street Lighting (Leeds) Limited, Tay Valley Lighting (Newcastle & North Tayside) Limited and Tay Valley Lighting (Stroke on Trent) Limited in respect of provision and maintenance of public street lighting and illuminated traffic signage. Furthermore, on behalf of SSE E&P (UK) Limited, previously a wholly owned subsidiary of the Company, now owned by a third party, SSE plc has provided the following 3 guarantees: a guarantee to Hess Limited in respect of decommissioning liabilities, a guarantee to Britoil Limited and Arco British Limited in respect of the acquisition of the Sean Field and also a guarantee to Perenco UK Limited in respect of a Sale and Purchase Agreement for the Minerva, Apollo and Mercury Fields.

NOTES TO THE COMPANY FINANCIAL STATEMENTS – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

13. Commitments and contingencies

Guarantees, indemnities and other contingent liabilities

Internal guarantees

The Company has in issue perpetual and long term guarantees of £10.4bn (2023: £10.4bn) in order to maintain the stand-alone credit ratings of certain subsidiaries and to support electricity distribution licence conditions. These guarantees are not expected to be called.

Letters of credit

The Company indemnifies letters of credit issued to the following:

	2024 £m	2023 £m
UK subsidiaries and certain joint ventures	849.9	739.3
European subsidiaries and certain joint ventures	119.7	119.4
Former UK subsidiaries	189.3	22.7
	1,158.9	881.4

Letters of credit in substitution of cash collateral

The Company provides standby letters of credit in substitution for cash covering initial and delivery margins for exchange traded products and is repayable on demand. As at 31 March 2024, there were letters of credit covering £100.0m (2023: £nil) of initial and variation margins.

Subsidiaries have provided guarantees on behalf of the Company as follows:

	2024 £m	2023 £m
Bank borrowings	656.0	811.6

14. Provisions

	Decommissioning £m	Legal and restructuring £m	Total £m

	219.7	–	219.7
At 31 March 2023			
Non-current	196.5	–	196.5
Current	4.9	0.4	5.3
	201.4	0.4	201.8

Decommissioning provision

The Company recognises a provision for the estimated net present value of decommissioning of Gas Production assets (retained as part of the disposal agreement for this business). Estimates are based on the forecast remediation or clean-up costs at the projected date of decommissioning and are discounted for the time value of money. Within the agreement for the disposal of its Gas Production assets to Viaro Energy through its subsidiary RockRose Energy Limited on 14 October 2021, the Company agreed to retain 60% of the decommissioning provision within the business. £9.9m (2023: £50.5m released) has been added to decommissioning during the current year due to reassessment, movements in inflation and discounting assumptions. It is expected that the costs associated with decommissioning of these Gas Production assets will be incurred between 2024 and 2040.

Legal and restructuring provisions

The Company holds provisions related to reorganisation of the Group and certain provisions arising on disposal of subsidiaries or investments. The 31 March 2023 provision was fully utilised in the current year.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF SSE PLC

Opinion

In our opinion:

- SSE plc's group financial statements and parent company financial statements (the "financial statements") give a true and fair view of the state of the group's and of the parent company's affairs as at 31 March 2024 and of the group's profit for the year then ended;
- the group financial statements have been properly prepared in accordance with UK adopted international accounting standards;
- the parent company financial statements have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice, including FRS101 "Reduced Disclosure Framework"; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements of SSE plc (the 'parent company') and its subsidiaries (the 'group') for the year ended 31 March 2024 which comprise:

Group	Parent company
Consolidated income statement for the year ended 31 March 2024	
Consolidated statement of comprehensive income for the year then ended	
Consolidated balance sheet as at 31 March 2024	Balance sheet as at 31 March 2024
Consolidated statement of changes in equity for the year then ended	Statement of changes in equity for the year then ended
Consolidated cash flow statement for the year then ended	
Related notes 1 to 25 and A1 to A8 to the group financial statements, including material accounting policy information	Related notes 1 to 14 to the financial statements including material accounting policy information

The financial reporting framework that has been applied in the preparation of the group financial statements is applicable law and UK adopted international accounting standards. The financial reporting framework that has been applied in the preparation of the parent company financial statements is applicable law and United Kingdom Accounting Standards, including FRS 101 "Reduced Disclosure Framework" (United Kingdom Generally Accepted Accounting Practice).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the group and parent in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard as applied to listed public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

The non-audit services prohibited by the FRC's Ethical Standard were not provided to the group or the parent company and we remain independent of the group and the parent company in conducting the audit.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate. Our evaluation of the directors' assessment of the group and parent company's ability to continue to adopt the going concern basis of accounting included:

- Confirming our understanding of management's Going Concern process as well as the review controls in place over the preparation of the group's Going Concern model and the memoranda on going concern;
- Engaging early with management to ensure all key matters were considered in their assessment;
- Obtaining management's board approved forecast cash flows, covenant forecasts and sensitivities prepared by management to 31 December 2025, ensuring the same forecasts are used elsewhere within the group for accounting estimates and that the forecasts reflect the spend to come on the committed part of the NZAP+ programme. We tested the models for arithmetical accuracy, as well as checking the net debt position at the year-end date which is the starting point for the model. We assessed the reasonableness of the cashflow forecast by analysing management's historical forecasting accuracy. We also ensured climate change considerations were factored into future cash flows. We performed reverse stress testing to understand how severe the downside scenarios would need be to result in negative liquidity or a covenant breach and how plausible were the scenarios. The EY assessment included consideration of all maturing debt through to 31 March 2026;
- Reviewing management's assessment of mitigating options potentially available to the group to reduce cash flow spend in the Going Concern period, to determine their plausibility and whether such actions could be implemented by management. We have obtained support to determine whether these were within the control of management and evaluated the impact of these mitigations in light of our understanding of the business and its cost structures;
- Reading the borrowing facilities agreements to assess their continued availability to the group and to ensure completeness of covenants identified by management;
- Reviewing market data for indicators of potential contradictory evidence to challenge the company's going concern assessment including review of profit warnings within the sector and review of industry analyst reports. We held discussions with the Audit Committee to confirm the going concern position prepared by management; and
- Considering whether management's disclosures in the financial statements sufficiently and appropriately reflect the going concern assessment and outcomes.

The audit procedures performed in evaluating the director's assessment were performed by the group audit team. We also considered the financial and non-financial information communicated to us from our component teams for sources of potential contrary indicators which may cast doubt over the going concern assessment.

Our key observation

The group is forecast to continue to be profitable and generate positive cashflows during the going concern period. Our reverse stress test scenario indicated that the group would need to be exposed to severe downside events impacting profitability and cash flows in order to breach liquidity or covenants. The severe downside scenario assumed full repayment of debt maturing over the going concern period, no new refinancing over the going concern period, no uncommitted disposal proceeds, a £500m group contingency to mitigate any downside performance against budget, offset by mitigating actions within managements control. We consider such a scenario to be highly unlikely, however, in unlikely events, including the business not performing in line with budget, management consider that the impact can be mitigated by further cash and cost saving measures, which are within their control, or through external fund raising, or a combination of both during the going concern period.

Having considered our severe downside and reverse stress test scenarios, we have not identified a plausible scenario where the group would be unable to maintain cash flow liquidity and covenant headroom during the going concern period.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the group and parent company's ability to continue as a going concern for a period to 31 December 2025.

In relation to the group and parent company's reporting on how they have applied the UK Corporate Governance Code, we have nothing material to add or draw attention to in relation to the directors' statement in the financial statements about whether the directors considered it appropriate to adopt the going concern basis of accounting.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the group's ability to continue as a going concern.

Overview of our audit approach

Audit scope	<ul style="list-style-type: none"> – We performed an audit of the complete financial information of 20 components and audit procedures on specific balances for a further 15 components. – The components where we performed full or specific audit procedures accounted for 91% of Adjusted Profit before tax, 99% of Revenue and 90% of Total assets.
Key audit matters	<ul style="list-style-type: none"> – Impairment of specific non-current assets – Group and parent pension obligation – Accounting for estimated revenue recognition – Business Energy Evolve system transition
Materiality	– Overall group materiality of £115.3m which represents 5% of adjusted profit before tax.

An overview of the scope of the parent company and group audits

Tailoring the scope

Our assessment of audit risk, our evaluation of materiality and our allocation of performance materiality determine our audit scope for each company within the group. Taken together, this enables us to form an opinion on the consolidated financial statements. We take into account size, risk profile, the organisation of the group and effectiveness of group-wide controls, changes in the business environment, the potential impact of climate change and other factors such as recent Internal audit results when assessing the level of work to be performed at each company.

In assessing the risk of material misstatement to the group financial statements, and to ensure we had adequate quantitative coverage of significant accounts in the financial statements, of the 252 (2023: 220) reporting components of the group, we selected 35 (2023: 38) components covering entities within the UK and Ireland, which represent the principal business units within the group.

Of the 35 components selected, we performed an audit of the complete financial information of 20 (2023: 19) components ("full scope components") which were selected based on their size or risk characteristics. For the remaining 15 (2023: 21) components ("specific scope components"), we performed audit procedures on specific accounts within that component that we considered had the potential for the greatest impact on the significant accounts in the financial statements either because of the size of these accounts or their risk profile.

The reporting components where we performed audit procedures accounted for 91% (2023: 95%) of the group's Adjusted profit before tax, 99% (2023: 95%) of the group's Revenue and 90% (2023: 94%) of the group's Total assets. For the current year, the full scope components contributed 70% (2023: 82%) of the group's Adjusted profit before tax, 97% (2023: 94%) of the group's Revenue and 62% (2023: 48%) of the group's Total assets. The specific scope component contributed 21% (2023: 13%) of the group's Adjusted profit before tax, 2% (2023: 1%) of the group's Revenue and 28% (2023: 46%) of the group's Total assets. The audit scope of these components may not have included testing of all significant accounts of the component but will have contributed to the coverage of significant accounts tested for the group. We also instructed 4 locations to perform specified procedures over certain aspects of Cash & Bank, Goodwill and Equity Investments in associates and jointly controlled entities, due to significant balances held within each location.

Of the remaining 217 (2023: 182) components that together represent 9% (2023: 5%) of the group's Adjusted profit before tax, none are individually greater than 1% (2023: 1%) of the group's Adjusted profit before tax. For these components, we performed other procedures, including analytical review, intercompany eliminations and obtaining audit evidence to respond to any potential risks of material misstatement to the group financial statements.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF SSE PLC – CONTINUED

The charts on the left illustrate the coverage obtained from the work performed by our audit teams.

Changes from the prior year

There have been minimal changes in scoping from the prior year, other than Seagreen coming into full scope given it started trading during the year. There were some minor changes to specific scope components to maintain appropriate coverage.

Involvement with component teams

In establishing our overall approach to the group audit, we determined the type of work that needed to be undertaken at each of the components by us, as the primary audit engagement team, or by component auditors from other EY global network firms operating under our instruction. Of the 20 full scope components, audit procedures were performed on 2 of these directly by the primary audit team. For the 18 remaining full scope components and 15 specific scope components, where the work was performed by component auditors, we determined the appropriate level of involvement to enable us to determine that sufficient audit evidence had been obtained as a basis for our opinion on the group as a whole.

The majority of full and specific scope components were led by the lead audit engagement partner, Annie Graham. For the remaining entities there were regular calls held between the lead audit engagement partner and component partners, with either file reviews performed by the primary team over audit documentation that has not been retained within the group audit file, or retention of key audit documentation on the group audit file.

This was the second year where a non-EY auditor was involved in a specific scope component, following the acquisition of Triton. We issued instructions, held regular calls with them and attended an on site file review and closing meeting. Other than the Irish Airtricity and Triton entities in scope, all other entities in scope were based within Scotland (Perth and Glasgow), where lead audit partner Annie Graham visited UK divisions throughout the year-end audit. Management meetings were held in person and remotely throughout the year across both the UK and Ireland. Members of the primary team also visited the non-EY component auditors of Triton.

The division and non-EY component visits involved discussion of audit approach, attending planning and closing meetings (some of which were held virtually), meeting with local management and reviewing relevant audit working papers on risk areas. The primary team interacted regularly with the component teams where appropriate during various stages of the audit, reviewed relevant working papers and were responsible for the scope and direction of the audit process. This, together with the additional procedures performed at group level, gave us appropriate evidence for our opinion on the group financial statements.

Climate change

The financial statement and audit risks related to climate change and the energy transition remain an area of audit focus in FY24. Stakeholders are increasingly interested in how climate change will impact SSE plc. SSE operates principally within the UK and Ireland and both are seeking to achieve net zero across their economies by 2050.

SSE has determined that the most significant future impacts from climate change on its operations will be from variable wind generation risk caused by changes in climate patterns, storm damage network risk through increased severity of extreme weather events, accelerated gas closure risk through climate change and wind-capture market risk where the average wholesale power prices are lower as a result of more zero marginal cost wind generation coming on to the electricity system. These are explained on [pages 104 to 105](#) in the required Task Force on Climate Related Financial Disclosures and on [pages 89 to 90](#) in the principal risks and uncertainties. These disclosures form part of the "Other information," rather than the audited financial statements. Our procedures on these unaudited disclosures therefore consisted solely of considering whether they are materially inconsistent with the financial statements, or our knowledge obtained in the course of the audit or otherwise appear to be materially misstated, in line with our responsibilities on "Other information". As described in note 4, the financial statement impact of climate is considered to have most impact on the valuation of property, plant and equipment impairment assessment of goodwill, valuations of decommissioning provisions, defined benefit schemes and going concern and viability statement.

In planning and performing our audit we assessed the potential impacts of climate change on the group's business and any consequential material impact on its financial statements.

The group has explained in their Basis of Preparation how they have reflected the impact of climate change in their financial statements including where assumptions applied align with their commitment to the aspirations of the Paris Agreement to achieve net zero emissions by 2050.

Significant judgements and estimates relating to climate change are included in note 4.

Government and societal responses to climate change risks are still developing, and are interdependent upon each other, and consequently financial statements cannot capture all possible future outcomes as these are not yet known. The degree of certainty of these changes may also mean that they cannot be taken into account when determining asset and liability valuations and the timing of future cash flows under the requirements of IAS 36. Budgets and forecasts for SSE plc reflect the spend to come on the NZAP + investment programme. In notes 15 and 20 to the financial statements supplementary sensitivity disclosures reflecting the impact of climate with regards to valuation of property, plant and equipment, impairment assessment of goodwill and valuation of decommissioning provisions and the impact of reasonably possible changes in key assumptions have been provided and significant judgements and estimates relating to climate change have been described within the aforementioned notes. We have ensured the completeness of climate consideration as part of our impairment and going concern audit procedures, including those referred to within our impairment KAM below.

In order to respond to the impact of climate change, we ensured we had the appropriate skills and experience on the audit team. Our audit team included professionals with significant experience in climate change and energy valuations. Our audit procedures were carried out by the group and component teams, with the component teams working under the direction of the group team.

Our audit effort in considering climate change focused on ensuring that the effects of material climate risks disclosed on [pages 104 to 105](#) have been appropriately reflected within the going concern cashflows, asset values and useful life and associated disclosures where values are determined through modelling future cash flows, being impairment considerations over Intangible assets and PP&E and in the timing and nature of liabilities recognised, being decommissioning provisions. In addition, we performed detailed testing of the sensitivities noted in the accounts. Details of our procedures and findings on impairment are included in our key audit matters below.

In FY24 as in the previous year SSE conducted scenario analysis of its material climate related opportunities and risks. With the support of our climate change internal specialists, we considered managements scenario planning and modelling of these four risks and five opportunities disclosed on [pages 98 to 105](#). We reviewed and challenged the impact pathways developed and basis of the key assumptions included within these scenarios. We verified the transition risk scenario frameworks used within the modelling to challenge the appropriateness, applicability to SSE current and future business model to ensure the accuracy of the financial impact ranges disclosed on [pages 102 to 105](#).

We challenged the Directors' considerations of climate change in their assessment of going concern and viability and associated disclosures. We also read the Other information in the annual report, and in doing so, considered whether the Other information, which includes SSE's climate targets, is materially consistent with the financial statements. We also considered consistency to other areas of assumptions, judgements and estimates and where applicable the procedures performed have been included within our KAMs below.

Based on our work, whilst we have not identified the impact of climate change on the financial statements to be a standalone key audit matter, we have considered the impact on the following key audit matters: Impairment of specific non-current assets. Details of the impact, our procedures and findings are included in our explanation of key audit matters below.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified. These matters included those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in our opinion thereon, and we do not provide a separate opinion on these matters.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF SSE PLC – CONTINUED

Risk	Our response to the risk	Key observations communicated to the Audit Committee
<p>Impairment of specific non-current assets (Impairment charge £212.7m; Impairment reversal 2023: £63.5m) Refer to the Audit Committee Report (page 147 🔗); Accounting policies – significant judgements (page 209 🔗); and Note 15 of the Consolidated Financial Statements (page 241 🔗)</p> <p>Thermal power plants and gas storage assets Certain power stations and gas storage assets are at risk of impairment or impairment reversal. This is due to a number of global and national factors reducing or increasing their value in use or fair value less costs of disposal, triggering an impairment assessment. Our risk focussed on the following power stations: Peterhead, Keadby, Keadby 2, Medway, Marchwood, Great Island CCGT and Triton assets and Gas Storage facilities (Atwick and Aldbrough).</p> <p>The key assumptions include future power prices, price volatility, mean reversion rate, forecast power demand, carbon prices, load factors, discount rate, useful economic life and operating expenditure.</p> <p>The estimated recoverable amount is subjective due to the inherent uncertainty involved in forecasting and discounting future cash flows as a result of the above factors.</p> <p>Renewables developments We have expanded the impairment significant risk to also include the risk of impairment in the SSE Pacifico and SSE Southern Europe goodwill and intangible development assets valuations. This has been included due to the early stages of development and passage of time from the acquisition date and the high sensitivity of models to changes in key assumptions.</p> <p>For SSE Pacifico, the key assumptions include pricing for revenue support contracts, generation volumes, the proportion of external funding achievable, discount rate and projected probability of success. For SSE Southern Europe, the key assumptions are discount rate, generation volume and the development probability of success.</p>	<p>Scoping: Testing was performed over this risk area, covering both full and specific scope components (covering nine components), which represented 100% of the risk amount.</p> <p>All audit work in relation to this key audit matter was undertaken by the component audit teams, with oversight from the group audit team.</p> <p>We obtained management's assessment of potential impairment indicators in accordance with IAS 36 for powerplants and for gas storage assets.</p> <p>Audit procedures included: We have understood management's process and methodology for assessing assets for indicators of impairment, including indicators of reversal and, where applicable, we have understood management's modelling of value in use cash flows including the source of the key input assumptions.</p> <p>We checked the historical accuracy of management's forecasting and verified that the assumptions are consistent with those used in other areas such as fixed asset useful life and decommissioning provision.</p> <p>Thermal power plants and gas storage assets We considered prior period impairments for indication of reversal. This involved considering indicators of reversal, focussed on demand, load factors and prices.</p> <p>We involved two EY specialists in our assessment: a discount rate specialist and a specialist with industry experience of assessing forward energy prices. Using our sector experience and our specialists, we assessed any unusual or unexpected trends identified within the cashflows year on year and assessed the impact on the overall forecasted position.</p> <p>We considered incremental repairs and committed capital expenditure on commenced projects and obtained management's assessment of the technical feasibility of useful life extensions and reviewed the extensions to contracted power contracts.</p> <p>We assessed the appropriateness of the model parameters and clerical accuracy of the models used.</p> <p>We considered load factors relative to the UK Governments as yet unlegislated target of no unabated gas post 2030 and reviewed impact on carrying values included within the disclosures should this legislation arise.</p> <p>We applied sensitivities to management's models to evaluate headroom, including sensitivities relating to climate change reflecting useful life assessment versus climate commitments and price and margin sensitivities.</p>	<p>Thermal power plants and gas storage assets We confirmed that the impairment charge of £134.1m recognised for Gas Storage assets and the charge of £63.2m in the Triton investment were appropriate. Gas Storage impairment was driven predominantly by market conditions and a significant decline in gas prices in the period, reflecting prices returning to normal following a period of high volatility. The Triton investment is carried at fair value and highly sensitive to changes in prices. Market prices have declined from their peak at the date of acquisition.</p> <p>We communicated that the pricing assumptions applied were appropriate. We concluded that, while the discount rates used were above the top end of EY accepted range, any adjustment to bring in line with EY independent range would only increase the headroom (previous impairments have already fully reversed). We also communicated that certain aspects of the pricing were deemed to be optimistic compared to the EY view, however still within our acceptable range.</p> <p>We also noted that we are satisfied with the adequacy of disclosure within the group financial statements including climate related disclosures.</p> <p>Renewables developments We confirmed that the impairment charge of £15.4m recognised for SSE Southern Europe was appropriate, with no impairment charge recorded for SSE Pacifico, which we also concluded was appropriate.</p> <p>While our sensitivities applied supported the remaining headroom on both CGUs, we note that both are highly sensitive to incremental changes in assumptions which could extinguish headroom.</p> <p>We also noted that we are satisfied with the adequacy of disclosure within the group financial statements including climate related disclosures.</p>

Risk

Our response to the risk

Key observations communicated to the Audit Committee

Impairment of specific non-current assets (Impairment charge £212.7m; Impairment reversal 2023: £63.5m)

continued

Renewables developments

We considered the infancy of the Japanese renewable market in our SSE Pacifico considerations, and due to this, the model is highly sensitive to the key assumptions.

As the Southern Europe platform is in early-stage development, the assessment was based on the discounted pre-tax cash flows from the acquisition model with updates to underlying assumptions, to reflect changes in the market and the projects since the acquisition.

We involved two EY specialists in our assessment: a discount rate specialist and a specialist with experience of assessing forward prices in the overseas market. We consulted with colleagues in Japan, with deep experience of the renewables sector. Using our sector experience and our specialists, we assessed any unusual or unexpected trends identified within the cashflows year on year and assessed the impact on the overall forecasted position.

We applied sensitivities to management's models to evaluate headroom. For SSE Pacifico, this included sensitivities relating to discount rate, fixed prices, volumes and financing costs. For SSE Southern Europe, this included sensitivities relating to discount rate, merchant exposure, volumes and probability of success of each project.

Key assumptions:

Using our sector experience and our specialists we benchmarked to industry sources, where appropriate, the directors' judgement on the key assumptions.

For Thermal assets, this included future power prices, power volatility, forecast power demand, carbon prices, load factors, discount rate, useful economic life and operating expenditure.

For SSE Pacifico, this included revenue support contract price, generation volumes, the proportion of external funding achievable, discount rate and projected probability of success.

For SSE Southern Europe this included non-contract revenue price, discount rate, generation volume and the development probability of success.

We verified that the assumptions are consistent with those used in other areas.

Disclosures

We assessed the accuracy and adequacy of the disclosures in line with IAS 36, ensuring key assumptions are included and that the disclosures adequately reflect the risks inherent in the valuation of non-current assets and the impact of changes in assumptions on the impairment booked.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF SSE PLC – CONTINUED

Risk	Our response to the risk	Key observations communicated to the Audit Committee
<p>Group and parent pension obligation (2024: £421.6m surplus, 2023: £541.1m surplus) Refer to the Audit Committee Report (page 147 🔗); Accounting policies – significant judgements (page 209 🔗); and Note 23 of the group financial statements (page 264 🔗)</p> <p>Subjective valuation: Small changes in the assumptions and estimates used to value the group and parent company pension obligations (before deducting scheme assets) would have a significant effect on the carrying value of those pension obligations.</p> <p>The effect of these matters is that, as part of our risk assessment, we determined that the group and parent company's pension obligation has a high degree of estimation uncertainty, with a potential range of reasonable outcomes greater than our materiality for the financial statements as a whole.</p> <p>The principal assumptions considered include rate of increase in pensionable salaries and pension payments, discount rate and mortality rates.</p> <p>There has been no change in this risk from the prior year.</p>	<p>Scoping: We performed audit procedures over this risk area centrally by the group team, which covered 100% of the risk amount. Our procedures included:</p> <p>Assessing management process: We have understood management's process and methodology for calculating the pension liability for each scheme, including discussions with management's external actuaries, walkthrough of the processes, understanding the key inputs and the design and implementation of key controls. We performed a fully substantive audit approach rather than testing the operating effectiveness of key controls.</p> <p>Assessing management experts: We have assessed the independence, objectivity and competence of the group's external actuaries, which included understanding of the scope of services being provided and considering the appropriateness of the qualifications of the external actuary.</p> <p>Assessing source data: We tested a sample of the membership data used by the actuaries to the group's records.</p> <p>Benchmarking assumptions: With the support of our pension actuarial specialists, we assessed the appropriateness of the assumptions adopted by the directors by comparing them to the expectations of our pension actuarial specialists which they derived from broader market data.</p> <p>Disclosure: We considered the adequacy of IAS 19 disclosures, including presentation of commitments associated with deficit recovery plans and in respect of sensitivity of the defined benefit obligation to changes in the key assumptions.</p>	<p>We conclude that management's actuarial assumptions are appropriate and sit within our independently determined range. We are satisfied with the adequacy of disclosure within the financial statements.</p>

Risk	Our response to the risk	Key observations communicated to the Audit Committee
<p>Accounting for estimated revenue recognition</p> <p>Unbilled energy income (2024: £663.7m, 2023: £666.1m) Refer to the Audit Committee Report (page 147 🔗); Accounting policies – significant judgements (page 209 🔗); and Note 18 of the group financial statements (page 253 🔗)</p> <p>Subjective estimate: 62% of the unbilled revenue is recognised within the Business Energy division and is based on estimates of values and volumes of electricity and gas supplied between last meter date and year end date.</p> <p>The method of estimating such revenues is complex, judgemental and significant for UK business customers. There is elevated estimation complexity in the current year due to the increase in the operational backlog on billing as a result of the Evolve billing system migration.</p> <p>The key estimates and assumptions are in relation to:</p> <ol style="list-style-type: none"> the volumes of electricity and gas supplied to the customers between the meter reading and year-end; the value attributed to those volumes in the range of tariffs; and embedded impairment risk over the unbilled revenue. <p>As a result of the estimation uncertainty this has been identified as a significant risk.</p>	<p>Scoping: This balance relates to one component, Business Energy. Testing was performed covering 100% of the unbilled balance in GB Business Energy which accounts for 62% of the unbilled balance at 31 March 2024. Unbilled energy income in Airtricity in Northern Ireland was not included in the scope of this KAM due to reduced estimation complexity and materiality respectively.</p> <p>All audit work in relation to this key audit matter was undertaken by the component audit team with oversight from the group audit team.</p> <p>Audit methodology: Our response to the assessed risk included understanding the process for estimating unbilled revenue, testing selected IT general and application key controls, substantive audit procedures and revenue data analytics.</p> <p>Tests of detail: We agreed the opening unbilled accrued income to the closing 31 March 2023 balance sheet.</p> <p>We agreed the volume data for customer usage of energy in the year used in the calculation to external settlement systems and agreed the volume data in relation to customer billings for the year to SSE's internal billing systems to assess for consistency and to understand remaining estimation risk.</p> <p>We have tested the unbilled unit pricing by agreeing historical pricing to sample bills, tested a sample of billing dates from the listing to confirm billing frequency and agreeing to post year end billing prices. We have understood and tested the historical accuracy of management's forecasting of final settlement volumes.</p> <p>We considered contra indicators to management's assumptions by assessing the impact of macro-economic conditions on demand and consumption volatility and benchmarked assumptions in the underlying unbilled calculations to external publications from the industry.</p> <p>We have obtained and tested post year end billings.</p> <p>We estimated the impact on bills still to come as a result of operational billing delays, considering unbilled MPAN's (Meter Point Administration Number) and apportioning volumes of the day sales outstanding and price to estimate expected billing.</p> <p>Analytical Review: We set expectations as to the likely level of total unbilled revenue, and compared this with actual unbilled revenue accrual, obtaining explanation for significant variances.</p> <p>We compared the unbilled revenue estimation to benchmark expectation. Benchmark expectation was derived from the external settlements data combined with billing frequency, usage and price movement from last billing date to year end. We have analysed and assessed explanations for variances arising from the benchmark expectation. We also tested the appropriateness of manual adjustments made by management.</p> <p>Evolve system migration: We have understood the reporting from the Evolve system which support the unbilled estimate and performed integrity testing.</p> <p>Full details of work performed around the billing system migration is disclosed within the subsequent KAM.</p> <p>Disclosure: We assessed the adequacy of the group's disclosures about the degree of estimation and judgement involved in arriving at the estimated revenue.</p>	<p>In performing our procedures we independently calculated an estimated range for accrued income of £408m – £413m with SSE's position being within the top end of our acceptable range.</p> <p>Overall, through procedures performed over accrued revenue within the Business Energy business, we are satisfied that the accrued revenue recognised by management in relation to unbilled revenue is appropriate.</p>

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF SSE PLC – CONTINUED

Risk	Our response to the risk	Key observations communicated to the Audit Committee
<p>Business Energy Evolve system transition Refer to the Audit Committee Report (page 147 🔗)</p> <p>We have introduced a new KAM relating to the transition from CS Live to the new Evolve billing system within Business Energy during the current year.</p> <p>Our risk focused on the completeness and accuracy of the migrated data and the whether the IT General Controls underpinning the new system were designed and operating effectively over the reliance period.</p> <p>Impacts of the system migration on unbilled revenue calculations have been separately considered within the unbilled KAM.</p>	<p>Scoping: The data migration audit testing has been performed by the Business Energy component, alongside support from the IT audit team.</p> <p>All audit work in relation to this key audit matter was undertaken by the component audit team with oversight from the group audit team.</p> <p>Data Migration We understood management's approach for the data migration and review procedures performed by internal audit.</p> <p>We performed each of the following procedures for each tranche of customer data migrations throughout the year:</p> <ul style="list-style-type: none"> – Obtained management's reconciliations of the data points and retested the reconciliations over all relevant customer data verifying the CS Live input to the final Evolve extracts. – Performed specific integrity testing over the input reports in excel back to the CS Live system. – Performed specific integrity testing over new and existing customers from CS Live to Evolve. <p>IT General Controls (ITGCs) We assessed the design and operating effectiveness of Evolve ITGCs, focussing on change management, manage access and IT general operations.</p> <p>We concluded on controls reliance over ITGCs from 1 September 2023 to 31 March 2024, with only £7m of billings raised in the system prior to 1 September. Separate integrity testing has been performed over these billings prior to ITGC reliance.</p> <p>We tested the controls and access throughout the "hypercare" period (a period of heightened support after a system implementation).</p> <p>We understood and tested key automated controls over billed receivables to cash receipts business processes and augmented with substantive testing where there was not evidence of the controls operating throughout the period.</p> <p>We confirmed appropriate report configuration as used in our testing and performed integrity testing over each key report relied upon for financial reporting purposes.</p> <p>Impact on audit approach: We performed detailed walkthroughs with management over changes to their revenue and debtors' processes as a result of the new Evolve system. We understood the impact this has on key estimates and judgements, including unbilled revenue and bad debt provisioning.</p>	<p>We are satisfied with the completeness and accuracy of the data migrations between the CS Live and Evolve systems with no material findings arising.</p> <p>Testing evidenced ITGC in operation, upon which we relied from 1 September 2023, with additional integrity procedures performed over billings of £7m in the period from 31 March 2023 to 31 August 2023.</p>

In the current year, we have included a new KAM on the Business Energy Evolve system transition, given the level of audit effort and focus required in this year during year ended 31 March 2024.

Our application of materiality

We apply the concept of materiality in planning and performing the audit, in evaluating the effect of identified misstatements on the audit and in forming our audit opinion.

Materiality

The magnitude of an omission or misstatement that, individually or in the aggregate, could reasonably be expected to influence the economic decisions of the users of the financial statements. Materiality provides a basis for determining the nature and extent of our audit procedures.

We determined materiality for the group to be £115.3m (2023: £85.2m), which is 5% (2023: 5% of normalised adjusted profit before tax) of adjusted profit before tax. Our key criterion in determining materiality remains our perception of the needs of SSE's stakeholders. We consider which earnings, activity or capital-based measure aligns best with their expectations. With the volatility in the energy market in the prior year we used normalised profit before tax, as we believed it provided us with a consistent measure of underlying year-on-year performance as it excluded the impact of non-recurring items which can significantly fluctuate year-on-year and do not provide a true picture of the profit benchmark that would affect the decisions of the users of the financial statements. Given the volatility has settled this year, we returned to our previous measure of adjusted profit before tax.

We determined materiality for the Parent Company to be £127.1m (2023: £137.1m), which is 2% (2023: 2%) of net assets. The materiality has been capped at the group materiality of £115.3m.

Starting basis	<ul style="list-style-type: none"> – Profit before tax – £2,495.1m
Adjustments	<ul style="list-style-type: none"> – Movement on operating and financing derivatives – (£513.5m) – Non-recurring exceptional items – £266m – JV Tax – £58.8m
Materiality	<ul style="list-style-type: none"> – Totals £2,306.4m adjusted profit before tax – Materiality of £115.3m (5% of materiality basis)

During the course of our audit, we reassessed initial materiality and amended it for final adjusted profit before tax figures.

Performance materiality

The application of materiality at the individual account or balance level. It is set at an amount to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality.

On the basis of our risk assessments, together with our assessment of the group's overall control environment, our judgement was that performance materiality was 75% (2023: 75%) of our planning materiality, namely £86.5m (2023: £63.9m). We have set performance materiality at this percentage due to a low number and value of corrected and uncorrected misstatements in the prior year audit.

Audit work at component locations for the purpose of obtaining audit coverage over significant financial statement accounts is undertaken based on a percentage of total performance materiality. The performance materiality set for each component is based on the relative scale and risk of the component to the group as a whole and our assessment of the risk of misstatement at that component. In the current year, the range of performance materiality allocated to components was £12.8m to £30.2m (2023: £8.9m to £21.0m).

Reporting threshold

An amount below which identified misstatements are considered as being clearly trivial.

We agreed with the Audit Committee that we would report to them all uncorrected audit differences in excess of £5.8m (2023: £4.3m), which is set at 5% of planning materiality, as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds.

We evaluate any uncorrected misstatements against both the quantitative measures of materiality discussed above and in light of other relevant qualitative considerations in forming our opinion.

Other information

The other information comprises the information included in the annual report set out on [pages 1 to 187](#), including the strategic report and the directors' report (Governance section) set out on [pages 1 to 109 and 110 to 187](#) respectively, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF SSE PLC – CONTINUED

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, the part of the directors' remuneration report to be audited has been properly prepared in accordance with the Companies Act 2006.

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the strategic report and the directors' report have been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the group and the parent company and its environment obtained in the course of the audit, we have not identified material misstatements in the strategic report or the directors' report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements and the part of the Directors' Remuneration Report to be audited are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Corporate Governance Statement

We have reviewed the directors' statement in relation to going concern, longer-term viability and that part of the Corporate Governance Statement relating to the group and company's compliance with the provisions of the UK Corporate Governance Code specified for our review by the Listing Rules.

Based on the work undertaken as part of our audit, we have concluded that each of the following elements of the Corporate Governance Statement is materially consistent with the financial statements or our knowledge obtained during the audit:

- Directors' statement with regards to the appropriateness of adopting the going concern basis of accounting and any material uncertainties identified set out on [page 65](#);
- Directors' explanation as to its assessment of the company's prospects, the period this assessment covers and why the period is appropriate set out on [page 109](#);
- Director's statement on whether it has a reasonable expectation that the group will be able to continue in operation and meets its liabilities set out on [page 187](#);
- Directors' statement on fair, balanced and understandable set out on [page 146](#);
- Board's confirmation that it has carried out a robust assessment of the emerging and principal risks set out on [pages 86 to 95](#);
- The section of the annual report that describes the review of effectiveness of risk management and internal control systems set out on [page 150](#); and;
- The section describing the work of the audit committee set out on [page 144](#).

Responsibilities of directors

As explained more fully in the directors' responsibilities statement set out on [page 187](#), the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the group and parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or the parent company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the company and management.

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the group and determined that the most significant are IFRS, FRS101, the Companies Act 2006 and UK Corporate Governance Code and relevant tax compliance regulations in the jurisdictions in which the group operates. We also considered non-compliance of regulatory requirements, including the Office of Gas and Electricity Markets (Ofgem) and regulations levied by the UK Financial Conduct Authority and Prudential Regulatory Authority. We confirmed our understanding with the Internal Head of Regulation.
- We understood how SSE plc is complying with those frameworks by making enquiries of management, internal audit, those responsible for legal and compliance procedures and the company Secretary. We verified our enquiries through our review of board minutes and papers provided to the Audit Committee.
- We assessed the susceptibility of the group's financial statements to material misstatement, including how fraud might occur by meeting with management from various parts of the business to understand where it considered there was susceptibility to fraud. We also considered performance targets and their propensity to influence on efforts made by management to manage earnings. We considered the programmes and controls that the group has established to address risks identified, or that otherwise prevent, deter and detect fraud; and how senior management monitors those programmes and controls. Where the risk was considered to be higher, we performed audit procedures to address each identified fraud risk.
- Based on this understanding we designed our audit procedures to identify non-compliance with such laws and regulations. Our procedures involved: journal entry testing, with a focus on manual consolidation journals and journals indicating large or unusual transactions based on our understanding of the business; enquiries of legal counsel, group management, internal audit, business area management at all full and specific scope management; and focused testing. In addition, we completed procedures to conclude on the compliance of the disclosures in the annual report and accounts with all applicable requirements.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Other matters we are required to address

- Following the recommendation from the audit committee we were appointed by the company on 18 July 2019 to audit the financial statements for the year ending 31 March 2020 and subsequent financial periods.
- The period of total uninterrupted engagement including previous renewals and reappointments is 5 years, covering the years ending 31 March 2020 to 31 March 2024.
- The audit opinion is consistent with the additional report to the audit committee.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Annie Graham (Senior statutory auditor)

for and on behalf of Ernst & Young LLP, Statutory Auditor

Glasgow

SSE CONSOLIDATED SEGMENTAL STATEMENT FOR THE YEAR ENDED 31 MARCH 2024

Year ended 31 March 2024	Unit	Electricity supply	Gas supply	Aggregate Supply business
		Non-domestic	Non-domestic	
Total revenue	£m	2,862.9	330.1	3,193.0
Sales of electricity and gas	£m	2,857.1	326.7	3,183.8
Other revenue	£m	5.8	3.4	9.2
Total operating costs	£m	2,826.2	261.2	3,087.4
Direct fuel costs	£m	1,486.7	165.4	1,652.1
Transportation costs	£m	565.8	41.4	607.2
Environmental and social obligation costs	£m	532.1	(0.6)	531.5
Other direct costs	£m	10.9	1.9	12.8
Indirect costs	£m	230.7	53.1	283.8
EBITDA	£m	36.7	68.9	105.6
Depreciation and amortisation	£m	6.4	1.2	7.6
EBIT	£m	30.3	67.7	98.0
Volume	TWh/ mTherms	10.7	167.5	–
WACOE/G	£/MWh/p/th	139.0	98.8	–
Customer numbers	'000s	335.7	60.9	396.6

Basis of preparation and disclosure notes

The Group's operating segments are those used internally by the Board to run the business and make strategic decisions. The types of products and services from which each reportable segment derives its revenues are:

Business Area	Reported Segments	Description
Continuing operations		
Transmission	SSEN Transmission	The economically regulated high voltage transmission of electricity from generating plant to the distribution network in the North of Scotland. Revenue earned from constructing, maintaining and renovating our transmission network is determined in accordance with the regulatory licence, based on an Ofgem approved revenue model and is recognised as charged to National Grid. The revenue earned from other transmission services such as generator plant connections is recognised in line with delivery of that service over the expected contractual period and at the contracted rate. On 25 November 2022 the Group sold a 25.0% non-controlling interest in this business to the Ontario Teachers' Pension Plan.
Distribution	SSEN Distribution	The economically regulated lower voltage distribution of electricity to customer premises in the North of Scotland and the South of England. Revenue earned from delivery of electricity supply to customers is recognised based on the volume of electricity distributed to those customers and the set customer tariff. The revenue earned from other distribution services such as domestic customer connections is recognised in line with delivery of that service over the expected contractual period and at the contracted rate.
Renewables	SSE Renewables	The generation of electricity from renewable sources, such as onshore and offshore windfarms and run of river and pumped storage hydro assets in the UK and Ireland, and the development of similar wind assets in Japan and Southern Europe and the development of wind, solar and battery opportunities. Revenue from physical generation of electricity in Great Britain is sold to SSE Energy Markets and in Ireland is sold to SSE Airtricity and is recognised as generated, based on the contracted or spot price at the time of delivery. Revenue from national support schemes (such as Renewable Obligation Certificates or the Capacity Market in Great Britain or REFIT in Ireland) may either be recognised in line with electricity being physically generated or over the contractual period, depending on the underlying performance obligation.
Thermal	SSE Thermal	The generation of electricity from thermal plants including CCGTs and the Group's interests in multifuel assets in the UK and Ireland. Revenue from physical generation of electricity in Great Britain and Ireland is sold to SSE Energy Markets and is recognised as generated, based on the contract or spot price at the time of delivery. Revenue from national support schemes (such as the Capacity Market) and ancillary generation services may either be recognised in line with electricity being physically generated or over the contractual period, depending on the underlying performance obligation.
	Gas Storage	The operation of gas storage facilities in Great Britain, utilising capacity to optimise trading opportunity associated with the assets. Contribution arising from trading activities is recognised as realised based on the executed trades or withdrawal of gas from caverns.

Business Area	Reported Segments	Description
Energy Customer Solutions	SSE Business Energy (covered by CSS)	The supply of electricity and gas to business customers in Great Britain and smart buildings (BEMS) activity. Revenue earned from the supply of energy is recognised in line with the volume delivered to the customer, based on actual and estimated volumes, and reflecting the applicable customer tariff after deductions or discounts.
	SSE Airtricity	The supply of electricity, gas and energy related services to residential and business customers in the Republic of Ireland and Northern Ireland. Revenue earned from the supply of energy is recognised in line with the volume delivered to the customer, based on actual and estimated volumes, and reflecting the applicable customer tariff after deductions or discounts. Revenue earned from energy related services may either be recognised over the expected contractual period or following performance of the service, depending on the underlying performance obligation.
SSE Enterprise	SSE Enterprise	The provision of low carbon energy solutions to customers; behind-the-meter solar and battery solutions, EV charging activities, private electric networks and heat and cooling networks. During the year, smart buildings (BEMS) activity was transferred to SSE Business Energy.
SSE Energy Markets	SSE Energy Markets	The provision of a route to market for the Group's Renewable and Thermal generation businesses and commodity procurement for the Group's energy supply businesses in line with the Group's stated hedging policies. Revenue from physical sales of electricity, gas and other commodities produced by SSE is recognised as supplied to either the national settlements body or the customer, based on either the spot price at the time of delivery or trade price where that trade is eligible for "own use" designation. The sale of commodity optimisation trades is presented net in cost of sales alongside purchase commodity optimisation trades.

Amendments to licence conditions became effective from 29 March 2024, removing the financial reporting provisions relating to Ofgem's Standard condition 16B of Electricity Generation licence. The Group's Electricity Generation reported segments, SSE Renewables and SSE Thermal, which were previously reported in the Consolidated Segmental Statement ('CSS') are therefore not included in the Group's CSS for the year ended 31 March 2024.

The modified financial reporting requirements are still applicable to the Group's electricity and gas supply businesses included in the Group's 'SSE Business Energy' reporting segment as noted above. This reporting operating segment is substantially aligned to 'SSE Business Energy' as reported in the CSS. However, it should be recognised that there are differences between the two disclosures, primarily driven by the Licence requirements - these are described in the notes below and shown in the table reconciling the CSS to the financial statements.

How the accounts are presented

The financial information presented in the CSS is based on operating activities of the Group's non-domestic electricity and gas supply business ("SSE Business Energy" segment described above) in Great Britain. The paragraphs that follow describe how SSE's SSE Business Energy (non-domestic supply) interacts with SSE Energy Markets, which is the Group's energy markets business. The basis of preparation defines the revenues, costs and profits of the business and describes in more detail the transfer pricing arrangements in place for the financial year ended 31 March 2024. The CSS has been prepared on a going concern basis as set out in note A6.3 of SSE plc's Annual Report.

Summary

'SSE Business Energy' sells electricity and gas to circa 0.2m business customer accounts in Great Britain and procures electricity, gas REGOS, RGGOs and ROCs from SSE Energy Markets.

SSE Energy Markets acts as a counterparty with the external market for the procurement of electricity and gas for SSE Energy Services and SSE Business Energy. SSE Energy Markets does not form part of the CSS as it is not within the scope defined by Ofgem. The policies governing the forward hedging activity undertaken by SSE Energy Markets are overseen by Energy Markets Risk Committee, whose responsibilities and roles are described on [page 152](#) of SSE Annual Report for the year ended 31 March 2024.

SSE Business Energy (Non Domestic)

Revenue from Sales of Electricity and Gas – revenues are the value of electricity and gas supplied to business customers in Great Britain during the year and includes an estimate of the value of units supplied between the date of the last bill and the year end. Non-domestic volumes are expressed at customer meter point. Government Scheme Support (Energy Bills Discount Scheme) of £9.2m is included in 'Other revenue'.

Direct Fuel Costs – SSE Business Energy does not engage in the trading of electricity and gas and procures all of its electricity and gas from SSE Energy Markets. The method by which SSE Energy Markets procures energy is at an arm's length arrangement on behalf of SSE Business Energy, and is governed by SSE Business Energy's forward hedging policy. The forward trades between SSE Business Energy and SSE Energy Markets are priced at wholesale market prices at the time of execution and any differences in volume and reconciliation at the time of delivery is marked to the spot price on the day. WACOG (weighted average cost of gas) also includes all Allocation reconciliations and Unidentified Gas. The WACOE (weighted average cost of electricity) and WACOG also consist of trades marked to wholesale prices when committed at the point of sale for fixed price customer contracts or when a customer instructs SSE to purchase energy in respect of flexi-priced contracts. This transfer pricing methodology reflects how SSE Business Energy actually acquired its energy. There have been no material changes in the transfer pricing policy in respect of SSE Business Energy since the CSS for the financial year ending 31 March 2023.

SSE CONSOLIDATED SEGMENTAL STATEMENT – CONTINUED FOR THE YEAR ENDED 31 MARCH 2024

Transportation Costs – these include transportation, transmission and distribution use of system costs and balancing services use of system costs.

Environmental and Social Obligation Costs – relate to policies designed to modernise and decarbonise the energy system in Great Britain and include ROCs, Feed in Tariff, charges under the Capacity Mechanism and CfD schemes and charges in relation to ‘assistance for areas with high electricity distribution costs’ (AAHEDC). REGO, RGGOs and GOO costs related to these schemes are also included in this section of the CSS.

Other Direct Costs – include: industry settlement costs, management and market access charges from SSE Energy Markets and other miscellaneous costs.

Indirect Costs – include: sales and marketing, customer service, bad debts and collections, metering costs, commercial costs, central costs - including information technology, property, corporate, telecoms costs and costs incurred to meet Smart Metering rollout obligations for the year. Where costs cannot be directly allocated to a fuel (electricity/gas), they have been allocated using costing models based on activity, customer revenue or customer numbers – whichever is the most appropriate.

SSE Business Energy’s profit and loss account bears the risk and rewards arising from the volatility in demand for energy, caused by the weather, consumption per customer and customer churn. It is also exposed to swings in wholesale costs and the uncertainty surrounding its share of government environmental and social schemes.

SSE Energy Markets

SSE Energy Markets is responsible for optimising the Group’s electricity, gas and other commodity requirements. The hedging activity undertaken by SSE Energy Markets is governed by the Group’s Energy and Markets Risk Committee.

Business Functions

The business functions in SSE have already been described in this document. The column headed ‘Other’ principally relates to SSE Energy Markets.

Business function	Note	Generation (not covered by CSS)	Supply (covered by CSS)	Other (not covered by CSS)
Operates and maintains generation assets		●		
Responsible for scheduling decisions	1	P/L		F
Responsible for interactions with the Balancing Market	2	P/L		F
Responsible for determining hedging policy	3	●	●	
Responsible for implementing hedging policy/makes decisions to buy/sell energy	4	P/L	P/L	F
Interacts with wider market participants to buy/sell energy	5			●
Holds unhedged positions (either short or long)	3	●	●	●
Procures fuel for generation		P/L		F
Procures allowances for generation		P/L		F
Holds volume risk on positions sold (either internal or external)		●	●	
Matches own generation with own supply	6			●
Forecasts total system demand	7	P/L	P/L	F
Forecasts wholesale price		P/L	P/L	F
Forecasts customer demand	8		P/L	F
Determines retail pricing and marketing strategies			●	
Bears shape risk after initial hedge until market allows full hedge	9	P/L	P/L	F
Bears short term risk for variance between demand and forecast	10		●	

Key:

- function and P&L impacting that area;
- P/L profit/losses of function recorded in that area;
- F function performed in that area.

Glossary and notes

- 1 “Scheduling decisions” means the decision to run individual power generation assets.
- 2 “Responsible for interactions with the Balancing Market” means interactions with the Balancing Mechanism in electricity.
- 3 Hedging policy was the responsibility of the Energy Markets Risk Committee which is a sub committee of the SSE Executive Committee.
- 4 SSE Energy Markets implements the hedging policy determined by the Energy Markets Risk Committee on behalf of SSE Business Energy and SSE Energy Services.
- 5 “Interacts with wider market participants to buy/sell energy” means the business unit responsible for interacting with wider market participants to buy/sell energy, not the entity responsible for the buy/sell decision itself, which falls under “Responsible for implementing hedging policy/makes decisions to buy/sell energy”.
- 6 “Matches own generation with own supply” means where there is some internal matching of generation and supply before either generation or supply interact with the wider market. The total electricity demand for SSE Business Markets Risk Committee (expressed at NBP) was 11.5TWh and the total UK Generation output was 18.7TWh (61%).
- 7 “Forecasts total system demand” means forecasting total system electricity demand or total system gas demand.
- 8 “Forecasts customer demand” means forecasting the total demand of own supply customers.
- 9 “Bears shape risk after initial hedge until market allows full hedge” means the business unit which bears financial risk associated with hedges made before the market allows fully shaped hedging.
- 10 “Bears short term risk for variance between demand and forecast” means the business unit which bears financial risk associated with too little or too much supply for own customer demand.

Reconciliation of CSS to SSE Financial Statements 2023/24

The table below shows how the CSS reconciles with the adjusted earnings before tax in the SSE financial statements (note 5 of SSE's financial statements):

Reconciliation of CSS to Financial Statements	Note	Revenue £m	EBIT £m
SSE Business Energy			
CSS Supply – SSE Business Energy		3,193.0	98.0
Government support scheme income	1	(9.2)	–
Smart buildings (BEMS) activity	2	47.9	(2.2)
Total SSE Business Energy in SSE Financial Statements		3,231.7	95.8

There are some differences between SSE's financial statements and the CSS. There are items which are in the financial statements and not in the CSS.

Notes

- Income from the Energy Bill Discount Scheme to support non-domestic customers is recognised in 'Other operating income' in the SSE Financial Statements.
- As noted in the description of operating segments above, smart buildings (BEMS) activity is reported within the SSE Business Energy operating segment in the SSE Financial Statements, but is not in scope for reporting within the CSS.

Adjustments to reported profit before tax.

SSE focuses its internal and external reporting on 'adjusted profit before tax' which excludes exceptional items, re-measurements arising from IFRS 9, depreciation on fair value uplifts and removes taxation on profits of joint ventures and associates, because this reflects the underlying profits of SSE, reflects the basis on which it is managed and avoids the volatility that arises out of IFRS 9. Therefore, these items have been excluded from the CSS.

INDEPENDENT AUDITOR'S REPORT TO THE CONSOLIDATED SEGMENTAL STATEMENT

Opinion

We have audited the Consolidated Segmental Statement financial statements of SSE plc (the Company) for the year ended 31 March 2024, which comprise the Consolidated Segmental Statement (CSS), Basis of preparation, Reconciliation of CSS to the Annual Report of SSE plc and the related disclosure notes. The financial reporting framework that has been applied in their preparation is a special purpose framework comprising the financial reporting provisions of Ofgem's Standard condition 19A of Electricity and Gas Supply Licenses.

In our opinion, the accompanying CSS of the Company for the year ended 31 March 2024 is prepared, in all material respects, in accordance with the requirements of Standard condition 19A of Electricity and Gas Supply Licenses and the basis of preparation on [pages 336 to 338](#).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) including '*ISA (UK) 800 (Revised) Special Considerations – Audits of Financial Statements Prepared in Accordance with Special Purpose Frameworks*'. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the CSS financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the CSS, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the CSS is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of 19 months through to 31 December 2025.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the group's ability to continue as a going concern.

Emphasis of Matter – Basis of Accounting and Restriction on Distribution and Use

We draw attention to [pages 336 to 338](#) of the CSS, which describes the basis of accounting. The CSS is prepared to assist the Company in complying with the financial reporting provisions of the contract referred to above. As a result, the CSS may not be suitable for another purpose. Our report is intended solely for the Company, in accordance with our engagement letter dated 14 April 2023, and should not be distributed to or used by parties other than the Company. Our opinion is not modified in respect of this matter.

Other information

The other information comprises the information included in the annual report, other than the CSS and our auditor's report thereon. The directors are responsible for the other information contained within the annual report.

Our opinion on the CSS does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the CSS or our knowledge obtained in the course of the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the CSS itself. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

Management is responsible for the preparation of the CSS in accordance with the financial reporting provisions of Section Z of the contract, and for such internal control as management determines is necessary to enable the preparation of the CSS that is free from material misstatement, whether due to fraud or error.

In preparing the CSS, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the CSS as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the CSS.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Company and determined that the most significant to the CSS is consideration of any non-compliance of regulatory requirements, including the Office of Gas and Electricity Markets (Ofgem) and regulations levied by the UK Financial Conduct Authority and Prudential Regulatory Authority. We have spoken with the SSE head of regulation to confirm our understanding.
- We understood how SSE plc is complying with those frameworks by making enquiries of management, internal audit, those responsible for legal and compliance procedures and the company Secretary. We verified our enquiries through our review of board minutes and papers provided to the Audit Committee.
- We assessed the susceptibility of the Company's CSS to material misstatement, including how fraud might occur by meeting with management from various parts of the business to understand where it considered there was susceptibility to fraud. We also considered performance targets and their prosperity to influence on efforts made by management to manage earnings. We considered the programmes and controls that the Group has established to address risks identified, or that otherwise prevent, deter, and detect fraud; and how senior management monitors those programmes and controls. Where the risk was considered to be higher, we performed audit procedures to address each identified fraud risk.
- Based on this understanding we designed our audit procedures to identify noncompliance with such laws and regulations. Our procedures involved: enquiries of legal counsel, Group management, internal audit, and focused testing. In addition, we completed procedures to conclude on the compliance of the disclosures in the CSS with all applicable requirements.

A further description of our responsibilities for the audit of the CSS financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Other matter

We have reported separately on the statutory financial statements of SSE plc.

Shareholder information

Shareholder enquiries

The Company's register of members is maintained by our appointed Registrar, Computershare Investor Services PLC ("Computershare"). Shareholders with queries relating to their shareholdings should contact Computershare directly at:

Computershare Investor Services PLC,
The Pavilions, Bridgwater Road, Bristol
BS99 6ZZ

Telephone: +44 (0) 345 143 4005

Web: www-uk.computershare.com/investor/#contact/enquiry

Investor Centre

Manage your sharers online at www.sse-shares.com

Shareholders can manage their holdings online using Investor Centre, the free and secure online portal provided by Computershare. It's easy for shareholders to register for Investor Centre by logging on to www.sse-shares.com, entering their Shareholder Reference Number (SRN) which can be found on any recent communications from SSE and their postcode, and following the instructions online. Once registered, shareholders can:

- View, update and calculate the market value of their shareholdings;
- Change address details and dividend payment instructions; and
- View share price data and trading graphs of listed companies.

Website

SSE's website, sse.com, provides ease of shareholder access to information about the Company and its performance. It includes a dedicated 'Investors' section where shareholders can find electronic copies of Company reports and a wide range of other information including:

- share price information;
- regulatory news;
- dividend history and trading graphs;
- terms and conditions of the Scrip Dividend Scheme; and
- Registrar contact details.

Digital news

SSE uses a dedicated news and views website (available at www.sse.com/news-and-views) and X (formerly Twitter) (www.twitter.com/sse) to keep shareholders, investors, journalists, employees and other interested parties up-to-date with news from the Company.

It is also possible to sign up to receive email alerts for regulatory news and press releases relating to SSE at www.sse.com/investors/regulatory-news/.

Elect to receive electronic communication today

In line with SSE's commitment to sustainability and for cost efficiency, all new shareholders are automatically registered as opting to access shareholder documentation through the Investors section of our website, meaning shareholders will receive notification, by post, when new relevant documentation has been placed on the website. SSE only sends printed copies of documentation where shareholders specifically request a copy.

Alternatively, shareholders can, and are encouraged to, elect to receive electronic communications from SSE because of the benefits for shareholders, SSE and the environment:

- **Fast access:** shareholders will receive immediate notification by email once shareholder documentation is available online. Documentation cannot get lost or delayed in the post.
- **Cost-effective:** reduced printing and postage costs will save the Company, and therefore its shareholders, money.
- **Environmentally friendly:** using less paper and reducing the environmental impact of printing and delivery of paper documents aligns with SSE's commitment to sustainability.

Shareholders can easily elect to receive electronic communications or change their communication preference on the online Investor Centre, www.sse-shares.com or by contacting Computershare.

Financial calendar

Publication of Annual Report	14 Jun 2024
Q1 Trading Statement	18 Jul 2024
AGM	18 Jul 2024
Ex-dividend date for final dividend	25 Jul 2024
Record date for final dividend	26 Jul 2024
Final date for Scrip elections	22 Aug 2024
Payment date	19 Sept 2024
Notification of Close Period for six months to 30 September	Around 30 Sept 2024
Results for six months to 30 September	13 Nov 2024

Dividend payments direct to your bank account

The Company typically pays dividends twice yearly. Interim dividends are paid in March, and final dividends are paid in September once approved by shareholders at the AGM. All dividends are credited to a shareholder's nominated UK bank/building society account. Shareholders can register or amend their UK bank/building society account details on the online Investor Centre, www.sse-shares.com, or by contacting Computershare.

Shareholders who do not have a UK bank or building society account, can receive their dividends directly into a bank account outside of the UK using Computershare's International Payment Service (IPS). For further information on IPS please visit www.sse-shares.com or contact Computershare.

Scrip dividend

Shareholders may elect to participate in SSE's Scrip Dividend Scheme (the "Scheme") to receive future dividends in the form of additional new shares. Further details of the Scheme can be found at <https://www.sse.com/investors/shareholder-services/dividends-and-scrip-scheme/>. Shareholders who elect to participate in the Scheme should also complete a bank mandate to ensure they can receive future dividend payments should they ever withdraw from the Scheme.

Share dealing

Please go to www.computershare.com/dealing/uk for a range of dealing services provided by Computershare. If you would like to speak to the Computershare Dealing Services team directly, please call +44 (0) 370 703 0084.

American Depositary Receipts

SSE has established a sponsored Level I American Depositary Receipt (ADR) program with Deutsche Bank Trust Company Americas (Deutsche Bank). Each ADR represents one SSE Ordinary Share. Further information and Deutsche Bank's contact details can be found at <https://www.sse.com/investors/adrs>.
